

# HANSA FLEX

Hydraulic components

## Hose Replacement Service – 24h hour rapid response

Our 280 service vans from the hydraulic emergency service are always just a call away. Whether on the construction site, during the harvest or in industrial applications: in case of a machine failure the job is carried out on site – and around the clock.

Tel. 24/7: 0800 77 12345 (Int. +49 421 9897 7690)

## Industrial Service – maintain and optimise

Your machines must be running, around the clock. Preventative maintenance of the HANSA-FLEX Industrial Services helps you to save money and guarantees maximum machine uptime. We will advise you from the selection of the right hydraulic components to the optimisation of your plant and machinery.

[www.hansa-flex.com/en/industrial\\_service](http://www.hansa-flex.com/en/industrial_service)

## Power Unit Construction – engineering from the specialist

Units are the heart of any hydraulic system. In order to produce a state of the art power unit a high degree of engineering skill is required. The HANSA-FLEX power unit construction offers all services as a single source: from planning, design to installation and commissioning at the customer site.

[www.hansa-flex.com/en/unit\\_manufacture](http://www.hansa-flex.com/en/unit_manufacture)

## Online Shop – 24/7 convenient shopping

In our online shop you will find the same variety and quality of products that our customers have been used to for over 50 years: from hydraulic hoses and hose fittings to couplings, ball valves and cylinders – “everything from a single source.”

[www.hansa-flex.com/en/shop](http://www.hansa-flex.com/en/shop)

## X-CODE – hose management

Our customer portal My.HANSA-FLEX offers the perfect solution for preventative maintenance. Users can see the technical data of a hose line at a glance: Manufacturing date, period of use, proposed replacement date, as well as machine and location. Thus, inspection and maintenance intervals can be planned well ahead.

[www.hansa-flex.com/en/hose\\_line\\_management](http://www.hansa-flex.com/en/hose_line_management)

## HANSA-FLEX – always close to our customers

Through our tight-knit network of branches we are always close to our customers. At each of our 400 locations we offer the complete range of hydraulics: from the standard replacement of a hose line to powerful hydraulic cylinders – personal, fast and reliable.

## 1. GENERAL NOTES

The potential hazards to man and the environment posed by hydraulic systems is very often underestimated in practice. The wrong choice or improper use of components, hoses, fittings and accessories can compromise the product's functional reliability, causing it to fail and possibly posing a threat of personal injury or material damage. In extreme cases, violently spraying oil, shearing fittings and ruptured lines can even cause fatal injuries. Exceeding of the maximum permissible working pressure must be avoided.

**We therefore expressly recommend that the applicable safety guidelines are strictly observed!**

**The owner of machines also bears a particular responsibility.**

**He is responsible for:**

- Ensuring that all components and parts are used only for their intended purpose
- Scheduled monitoring and systematic inspection by qualified persons
- Identifying and eliminating defects
- Scheduled maintenance and replacement of hoses

This active assumption of responsibility is enshrined in the legal framework. Based on the principles of industrial safety, the equipment and product safety act, the machine and pressure device directive and the ordinance on industrial safety and health, tasks are specified further and set out in procedural regulations for those concerned.

## 2. COMMISSIONING OF HYDRAULIC SYSTEMS

The proper functioning of hydraulic systems presupposes compliance with the respective commissioning and maintenance instructions. All work on hydraulic systems and the components contained must be carried out in strict observance of the safety regulations. There must be no pressure inside the oil-dynamic circuit, i.e. loads must be lowered, pumps switched off and pressure accumulators relieved.

The maximum loads (pressures, forces, temperatures) given in the product documentation must not be exceeded. Furthermore, the hydraulic system must be protected by a pressure relief valve and soiling must be prevented by the use of appropriate filters.

Installation and commissioning of hydraulic systems or their components may only be carried out by suitably qualified personnel. This applies in particular to the connection and commissioning of all electrical assemblies, such as electric motors and electrically actuated components. Operating voltages and the direction of rotation of the electric motor (with DC motors also the polarity) must be strictly observed.

Hydraulic systems with electronic controllers are subject to special commissioning conditions. Pressures and speeds of the pump(s) must first be set to a low value in order to avoid damage caused by faults in the circuitry (electrical or hydraulic). Only when you have ensured that the switching sequences are correct, the consumers are correctly controlled and limits are properly monitored by limit switches, etc. can pressure and delivery rates be increased to the required values.

Hydraulic systems and components may only be employed for their respective intended use. With pipe and hose installations, all lines must be flushed and welded pipes must be inspected and pickled, if necessary. Only approved screws fittings and seal systems may be used for sealing.

The hydraulic systems must be filled with the hydraulic fluids intended for their operation. The components in this catalogue are designed for use with mineral oils to DIN 51524 Part 2 HLP (viscosity 32 – 68 mm<sup>2</sup>/s at 40°C). Use of other hydraulic fluids (e.g. rapidly biodegradable oils, water/glycol mixtures, etc.) is possible only after consultation with us.

### 3. FUNDAMENTAL CALCULATION FORMULAE

#### Formula lexicon → Hydraulic pump

Displacement	$Q_{\text{eff}} = \frac{V \cdot n \cdot \eta_{\text{vol}}}{1000} \left[ \frac{\text{l}}{\text{min}} \right]$	<p><math>Q_{\text{eff}}</math> = Effective displacement of hydraulic pump [l/min]  <math>V</math> = Geometric displacement [cm<sup>3</sup>]  <math>\eta_{\text{vol}}</math> = Volumetric efficiency  <math>n</math> = Drive speed of the pump [rpm]                      (Standard speeds of electric motors: 2800/1450/1000 rpm)</p>
Delivery rate	$V = \frac{Q_{\text{eff}} \cdot 1000}{n \cdot \eta_{\text{vol}}} \left[ \text{cm}^3 / \text{U} \right]$	<p><math>V</math> = Geometric displacement [cm<sup>3</sup>]  <math>Q_{\text{eff}}</math> = Effective displacement of hydraulic pump [l/min]  <math>\eta_{\text{vol}}</math> = Volumetric efficiency  <math>n</math> = Drive speed of the pump [rpm]                      (Standard speeds of electric motors: 2800/1450/1000 rpm)</p>
Drive power	$P_{\text{An}} = \frac{p \cdot Q_{\text{eff}}}{600 \cdot \eta_{\text{ges}}} \left[ \text{kW} \right]$	<p><math>P_{\text{An}}</math> = Required drive power of the pump [kW]  <math>P</math> = Working pressure [bar]; [daN/cm<sup>2</sup>]  <math>Q_{\text{eff}}</math> = Effective displacement of a hydraulic pump [l/min]  <math>\eta_{\text{tot}}</math> = Overall efficiency (0.8 – 0.85)</p>
Overall efficiency	$\eta_{\text{ges}} = \eta_{\text{mech}} \cdot \eta_{\text{vol}}$	<p><math>\eta_{\text{tot}}</math> = Overall efficiency (0.8 – 0.85)  <math>\eta_{\text{mech}}</math> = Mechanical efficiency (0.9 – 0.95)  <math>\eta_{\text{vol}}</math> = Volumetric efficiency (0.9 – 0.95)</p>
Drive torque	$M_{\text{in}} = \frac{\Delta p \cdot V \cdot 1,59}{100 \cdot \eta_{\text{mech}}} \left[ \text{daNm} \right]$	<p><math>M_{\text{in}}</math> = Drive torque  <math>\Delta p</math> = Pressure difference between inlet and outlet port of pump [bar] or [daN/cm<sup>2</sup>]  <math>V</math> = Geometric displacement [cm<sup>3</sup>]  <math>\eta_{\text{mech}}</math> = Mechanical efficiency (0.9 – 0.95)  <math>1,59 = \frac{10}{\pi}</math></p>

#### Formula lexicon → Hydraulic motor

Displacement	$Q = \frac{V \cdot n}{1000 \cdot \eta_{\text{vol}}} \left[ \frac{\text{l}}{\text{min}} \right]$	<p><math>Q</math> = Displacement flow of hydraulic motor [l/min]  <math>V</math> = Geometric displacement [cm<sup>3</sup>]  <math>\eta_{\text{vol}}</math> = Volumetric efficiency  <math>n</math> = Output speed of the hydraulic motor [rpm]</p>
Drive speed	$n = \frac{Q \cdot \eta_{\text{vol}} \cdot 1000}{V} \left[ \text{min}^{-1} \right]$	<p><math>n</math> = Output speed of the hydraulic motor [rpm]  <math>Q</math> = Displacement flow of hydraulic motor [l/min]  <math>V</math> = Geometric displacement [cm<sup>3</sup>]  <math>\eta_{\text{vol}}</math> = Volumetric efficiency</p>
Drive torque	$M_{\text{ab}} = \frac{\Delta p \cdot V \cdot \eta_{\text{mech}}}{2\pi \cdot 100} \left[ \text{daNm} \right]$	<p><math>M_{\text{ab}}</math> = Output torque  <math>\Delta p</math> = Pressure difference between inlet and outlet port of motor [bar] or [daN/cm<sup>2</sup>]  <math>V</math> = Geometric displacement [cm<sup>3</sup>]  <math>\eta_{\text{mech}}</math> = Mechanical efficiency (0.9 – 0.95)</p>
	$M_{\text{ab}} = \frac{1,59 \cdot V \cdot \Delta p \cdot \eta_{\text{mech}}}{1000} \left[ \text{daNm} \right]$	<p><math>M_{\text{ab}}</math> = Output torque  <math>\Delta p</math> = Pressure difference between inlet and outlet port of motor [bar] or [daN/cm<sup>2</sup>]  <math>V</math> = Geometric displacement [cm<sup>3</sup>]  <math>\eta_{\text{mech}}</math> = Mechanical efficiency (0.9 – 0.95)</p>
Drive power	$P_{\text{ab}} = \frac{\Delta p \cdot Q \cdot \eta_{\text{ges}}}{600} \left[ \text{kW} \right]$	<p><math>P_{\text{ab}}</math> = Drive power of hydraulic motor [kW]  <math>\Delta p</math> = Pressure difference between inlet and outlet port of motor [bar] or [daN/cm<sup>2</sup>]  <math>Q</math> = Displacement flow of hydraulic motor [l/min]  <math>\eta_{\text{tot}}</math> = Overall efficiency (0.8 – 0.85)</p>

Formula lexicon → Hydraulic cylinders – geometric dimensions

Piston area	$A_K = \frac{\pi \cdot d_K^2}{4 \cdot 100} \text{ [cm}^2\text{]}$	$A_K$ = Piston area of the hydraulic cylinder [cm <sup>2</sup> ] $d_K$ = Piston diameter of the hydraulic cylinder [mm] $\pi$ = pi ~ 3,14
Piston rod area	$A_S = \frac{d_S^2 \cdot 0,785}{100} \text{ [cm}^2\text{]}$	$A_S$ = Piston rod area of the hydraulic cylinder [cm <sup>2</sup> ] $d_S$ = Piston rod diameter of the hydraulic cylinder [mm] $0.785 = \frac{\pi}{4}$
Piston ring area	$A_R = \frac{(d_K^2 - d_S^2) \cdot 0,785}{100} \text{ [cm}^2\text{]}$	$A_R$ = Piston ring area of the hydraulic cylinder [cm <sup>2</sup> ] $d_K$ = Piston diameter of the hydraulic cylinder [mm] $d_S$ = Piston rod diameter of the hydraulic cylinder [mm]

Formula lexicon → Hydraulic cylinders – forces

Force (general)	$F = p \cdot A \text{ [daN]}$	$F$ = Force [daN] $p$ = Working pressure [bar] or [daN/cm <sup>2</sup> ] $A$ = Effective area [cm <sup>2</sup> ]
Pressure (general)	$p_{th} = \frac{F}{A} \text{ [daN/cm}^2\text{]}$	$p_{th}$ = Theoretical pressure without allowance for any frictional losses [daN/cm <sup>2</sup> ] $F$ = Force [daN] $A$ = Effective area [cm <sup>2</sup> ]
Effective compressive force FD	$F_{D\text{eff}} = \frac{p \cdot d_K^2 \cdot 0,785 \cdot \eta}{10.000} \text{ [kN]}$	$F_{D\text{eff}}$ = Effective compressive force of hydraulic cylinder [kN] $p$ = Working pressure [bar] or [daN/cm <sup>2</sup> ] $d_K$ = Piston diameter of the hydraulic cylinder [mm] $\eta$ = Extending efficiency
Effective tensile force FZ	$F_{Z\text{eff}} = \frac{p \cdot (d_K^2 - d_S^2) \cdot 0,785 \cdot \eta}{10.000} \text{ [kN]}$	$F_{Z\text{eff}}$ = Effective tensile force of hydraulic cylinder [kN] $p$ = Working pressure [bar] or [daN/cm <sup>2</sup> ] $d_K$ = Piston diameter of the hydraulic cylinder [mm] $d_S$ = Piston rod diameter of the hydraulic cylinder [mm] $\eta$ = Retraction efficiency
Effective differential force FS	$F_{S\text{eff}} = \frac{p \cdot d_S^2 \cdot 0,785 \cdot \eta}{10.000} \text{ [kN]}$	$F_{S\text{eff}}$ = Effective differential force of hydraulic cylinder [kN] $p$ = Working pressure [bar] or [daN/cm <sup>2</sup> ] $d_S$ = Piston rod diameter of the hydraulic cylinder [mm] $\eta$ = Extending efficiency

Efficiency  $\eta$  of hydraulic cylinders: Extend 95% (0.95), retract 92% (0.92)

Formula lexicon → Hydraulic cylinders – speeds and stroke times

Piston speed	$v = \frac{s}{t \cdot 1.000} \text{ [m/s]}$	$v$ = Stroke speed [m/s] $s$ = Cylinder stroke [mm] $t$ = Extension or retraction time over complete stroke [s]
Piston speed	$v = \frac{Q}{A \cdot 6} \text{ [m/s]}$	$v$ = Stroke speed [m/s] $Q$ = Inlet volumetric flow at hydraulic cylinder [l/min] $A$ = Effective area [cm <sup>2</sup> ]

Formula lexicon → Hydraulic cylinders – speeds and stroke times

<p>Required (theoretical) displacement</p>	$Q_{th} = A \cdot v \cdot 60 \left[ \frac{l}{min} \right]$ $Q_{th} = \frac{V}{t} \cdot 60 \left[ \frac{l}{min} \right]$	<p><math>Q_{th}</math> = Required (theoretical) displacement of the hydraulic pump without leakage losses [l/min]  <math>A</math> = Effective area [cm<sup>2</sup>]  <math>v</math> = Stroke speed [m/s]</p> <p><math>Q_{th}</math> = Required (theoretical) displacement of the hydraulic pump without leakage losses [l/min]  <math>V</math> = Effective volume [l] or [dm<sup>3</sup>]  <math>t</math> = Extension or retraction time over complete stroke [s]</p>
<p>Required volumetric flow for "Extend"</p>	$Q_{ex} = \frac{0,785 \cdot d_K^2 \cdot s \cdot 6}{t \cdot 100.000} \left[ \frac{l}{min} \right]$	<p><math>Q_{th}</math> = Required (theoretical) displacement of the hydraulic pump without leakage losses [l/min]  <math>d_K</math> = Piston diameter of the hydraulic cylinder [mm]  <math>s</math> = Cylinder stroke [mm]  <math>t</math> = Extension or retraction time over complete stroke [s]</p>
<p>Required volumetric flow for "Retract"</p>	$Q_{re} = \frac{0,785 \cdot (d_K^2 - d_r^2) \cdot s \cdot 6}{t \cdot 100.000} \left[ \frac{l}{min} \right]$	<p><math>Q_{th}</math> = Required (theoretical) displacement of the hydraulic pump without leakage losses [l/min]  <math>d_K</math> = Piston diameter of the hydraulic cylinder [mm]  <math>s</math> = Cylinder stroke [mm]  <math>t</math> = Extension or retraction time over complete stroke [s]</p>
<p>Required (effective) displacement</p>	$Q_{eff} = \frac{Q_{th}}{\eta_{vol}} \left[ \frac{l}{min} \right]$	<p><math>Q_{eff}</math> = Required (effective) displacement of the hydraulic pump [l/min]  <math>Q_{th}</math> = Theoretical displacement of the hydraulic pump [l/min]  <math>\eta_{vol}</math> = Volumetric efficiency</p>
<p>Extension or retraction volume</p>	$V = \frac{A \cdot s}{10.000} \left[ l \right]$	<p><math>V</math> = Effective volume [l] or [dm<sup>3</sup>]  <math>A</math> = Effective area [cm<sup>2</sup>]  <math>s</math> = Cylinder stroke [mm]</p>
<p>Stroke time</p>	$t = \frac{A \cdot s \cdot 6}{Q \cdot 1.000} \left[ s \right]$	<p><math>t</math> = Extension or retraction time over complete stroke [s]  <math>A</math> = Effective area [cm<sup>2</sup>]  <math>s</math> = Cylinder stroke [mm]  <math>Q</math> = Inlet volumetric flow at hydraulic cylinder [l/min]</p>

Formula lexicon → Pressure losses in straight pipelines

<p>Pressure loss</p>	$\Delta p = \lambda \cdot \frac{l \cdot \rho \cdot \omega^2 \cdot 5}{d} \left[ bar \right]$	<p><math>\Delta p</math> = Pressure loss in straight pipelines (laminar or turbulent flow) [bar]  <math>\lambda</math> = Pipe friction coefficient  <math>l</math> = Line length in [m]  <math>\rho</math> = Density (~0.89) [kg/dm<sup>3</sup>]  <math>\omega</math> = Flow velocity [m/s]  <math>d</math> = Inside diameter of the line [mm]</p>
<p>Pipe coefficient of friction for laminar flow</p>	$\lambda_{lam} = \frac{64}{Re}$	<p><math>\lambda_{lam}</math> = Pipe coefficient of friction for laminar flow  <math>Re</math> = Reynolds number</p>
<p>Pipe coefficient of friction for turbulent flow</p>	$\lambda_{turb} = \frac{0,316}{\sqrt{Re}}$	<p><math>\lambda_{turb}</math> = Pipe coefficient of friction for turbulent flow  <math>Re</math> = Reynolds number</p>

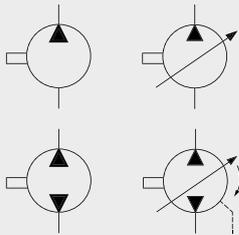

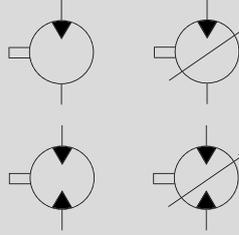

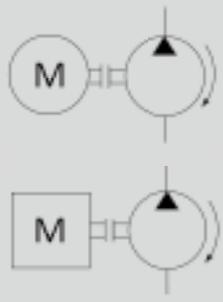

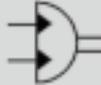

Formula lexicon → Flow velocities in pipelines

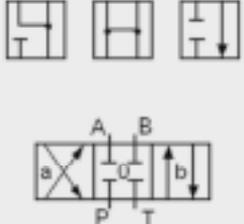

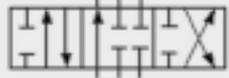

<p>Reynolds number</p>	$Re = \frac{\omega \cdot d}{\nu} \cdot 1000$ $Re = 21232 \frac{Q_{eff}}{d \cdot \nu}$	<p>Re = Reynolds number                  ω = Flow velocity [m/s]                  d = Inside diameter of the line [mm]                  ν = Kinematic viscosity of the liquid [cSt] or [mm<sup>2</sup>/s]</p> <p>Re = Reynolds number                  Q<sub>eff</sub> = Fluid flow rate in the line [l/min]                  d = Inside diameter of the line [mm]                  ν = Kinematic viscosity of the liquid [cSt] or [mm<sup>2</sup>/s]</p>
<p>Flow velocity</p>	$\omega = \frac{Q_{eff}}{d^2} \cdot 21,232 \left[ \frac{m}{s} \right]$	<p>ω = Flow velocity [m/s]                  Q<sub>eff</sub> = Fluid flow rate in the line [l/min]                  d = Inside diameter of the line [mm]</p>
<p>Determination of the pipe inside diameter in pressure lines</p>	$d = \sqrt{\frac{Q_{eff}}{\omega} \cdot 21,232} \text{ [mm]}$	<p>d = Inside diameter of the line [mm]                  Q<sub>eff</sub> = Fluid flow rate in the line [l/min]                  ω = Flow velocity [m/s]</p>

## 4. CIRCUIT SYMBOLS

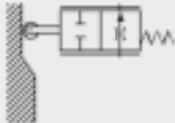

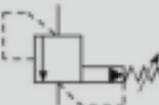

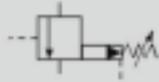

Standardised circuit symbols are required for the representation of hydraulic circuit diagrams. In Germany, these follow the recommendations of ISO 1219 (June 2012). A selection of the most important symbols is shown below:

Designation	Explanation	Symbol
<b>Pumps</b> <ul style="list-style-type: none"> <li>with one flow direction</li> <li>with two flow directions (reversible)</li> </ul>	Conversion of mechanical into hydraulic energy	Displacement volume constant      variable 
<b>Hydraulic motors</b> <ul style="list-style-type: none"> <li>with one flow direction</li> <li>with two flow directions (reversible)</li> </ul>	Conversion of hydraulic energy into mechanical energy with rotational movement	constant      variable 
<b>Pump/motor</b>	Units that function both as pumps and as hydraulic motors	constant      variable 
<b>Pump drive</b>	with electric motor  with internal combustion engine	

Designation	Explanation	Symbol
<b>Hydrostatic gearboxes</b>	Torque converter, consisting of variable displacement pump and hydraulic motor	
<b>Swivel motor</b>	Rotation angle < 360°	
<b>Cylinders</b>	Conversion of hydraulic energy into mechanical energy with linear movement	
• Single-acting		
• Single-acting with spring return		
• Double-acting differential cylinder		
• Double-acting cylinder with piston rod on both sides		
• Cylinder with end position cushioning		
• Cylinder with adjustable cushioning, on both sides		
• Telescopic cylinder		
• Cylinder with limit switches		

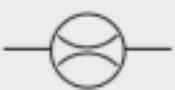

Designation	Explanation	Symbol
<p><b>Directional control valves</b></p> <p>Valves that serve to open and shut off different flow paths. Directional control valves are essentially characterised by</p> <ul style="list-style-type: none"> <li>The number of switching positions; represented by a corresponding number of squares, identified by 0, a, b (*)</li> </ul>		
<ul style="list-style-type: none"> <li>The number of ports and connections within the switching positions; represented by lines and arrows</li> </ul>		
<p>Identification of the ports with letters (in the home position 0)*</p> <p>P... Pump, pressure  T... Tank, return line  A, B... Consumer  X, Y, Z... Control ports  L... Leak oil</p> <p>Designation, e.g.: 4/3-way valve  3 → Number of switching positions  4 → Number of ports</p>		
<ul style="list-style-type: none"> <li>2/2-way valve</li> </ul>		
<ul style="list-style-type: none"> <li>3/2-way valve</li> </ul>		
<ul style="list-style-type: none"> <li>4/3-way valve (pressureless circulation)</li> </ul>		
<ul style="list-style-type: none"> <li>6/3-way valve</li> </ul>		

Designation	Explanation	Symbol
<b>Methods of actuation for directional control valves</b> <b>a) Direct acting</b>	Installation in the respective switching position	Version ISO 1219-1
<ul style="list-style-type: none"> <li>• Hand lever, with latching</li> </ul>

## 6. TECHNICAL INFORMATION FOR HYDRAULIC CYLINDERS

### 6.1 GENERAL

Please observe the provisions of EN ISO 4413 (2011) "Hydraulic fluid power - General rules and safety requirements for systems and their components" as well as specifications and safety requirements based on statutory regulations when selecting, installing and operating cylinders. The maximum loads (pressures, forces, temperatures) given in the product documentation must not be exceeded.

The pressure is boosted by throttling the oil draining from the piston rod side. Further pressure can be built up by a load pulling on the piston rod, and this combination can easily lead to failure of the cylinder.

Loosening of a consumer port on the cylinder can result in a free fall or uncontrolled lowering of loads. Unauthorised removal of the cylinders or their components can lead to a voiding of warranty claims.

The chrome coating of the piston rod and external components on the cylinder must be protected during transport.

Hydraulic cylinders must be stored dry and at the most constant possible ambient temperature in order to avoid the formation of condensation. The storage locations must be free of vapours and corrosive substances. The oil ports must be sealed with protective caps.

If hydraulic cylinders are not required for longer than 2 months, they must be stored upright with fully retracted piston rod. There is otherwise a risk of permanent deformation of the seals. The cylinders must be filled with a suitable hydraulic fluid in order to avoid corrosion.

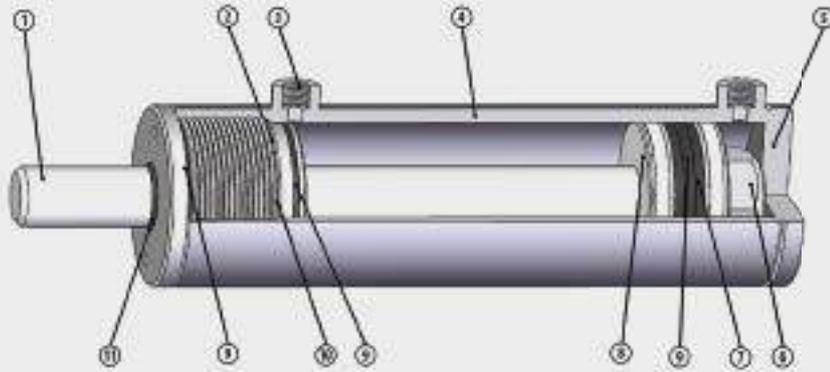

T

6.2 TECHNICAL CHARACTERISTICS

T

Standard cylinders up to 200 bar

1 Piston rod	steel 20MnV6 Chrome 25 µm ± 5 (120 hour salt spray test to ISO 3768 - evaluation in accordance with ISO 4540 Class 9)
2 Piston rod guide	hydraulic casting UNI 5007 G25
3 Oil ports	steel 9SMn28
4 Polished cylinder barrel	St 52.3 DIN 2393-ISO H9
5 Cylinder base	FE 510-A105
6 Nut	steel 8UNI EN20898/2
7 Seal TPM	NBR
8 Piston	steel 9SMn28
9 Seal OR	NBR Fluorosil Viton
10 Seal TSE-TTS-TTI/L	NBR + fabric / polyurethane
11 Seal GHM-GHK	NBR / polyurethane
Piston speed referred to standard seals	max. 25 m/min - 0.42 m/sec
Piston speed in the end positions	max. 6 m/min - 0.10 m/sec
Temperature range	-25°C to +80°C
Max. working pressure (to DIN EN 982)	200 bar
Test pressure (to DIN EN 982)	240 bar
Medium	HLP fluids

### 6.3 INSTALLATION

Hydraulic cylinders must be installed such that lateral loads are avoided during operation. The installation position can be freely selected as long as the buckling safety is observed. The stroke end of the hydraulic cylinders must not be used as an end stop.

With bored piston rods (double-acting cylinders), attention must be paid to the pivot pin (shear forces).

Where driving loads are involved, external end stops and load-holding or counterbalancing valves must be installed.

When connecting to the pressure supply, pay attention to the correct identification of the connecting lines (see marks, if necessary). Furthermore, the admissible pressure values for screw fittings, pipes and hose lines must be observed.

When using double-acting cylinders as single-acting cylinders, the second oil port must be connected to the hydraulic oil tank so that oil can be drawn in.

The piston rod should be protected against foreseeable damage and corrosion. Pipes, screw fittings, etc. must be cleaned of dirt, chips, scale, etc. before installation and then securely fitted.

Before connecting the hydraulic cylinder to the drive unit, flush the aggregate and the supply lines. The consumer lines must be connected together in order to do this. The flushing process is intended to remove dirt and air from the consumer lines.

Hydraulic cylinders must be vented before commissioning. To do this, slightly loosen the oil ports or the vent plugs on the cylinders and place a suitable vessel underneath to collect the oil. Then move the cylinder pressure-free between the two end positions until the oil runs out bubble-free and without foaming. Turn the oil ports to the highest possible position for quicker venting.

### 6.4 COMMISSIONING

- Check of the complete and proper installation (incl. electrical components such as stroke measuring system, end position switches, etc.)
- Switch on the system in jog mode and check that no hazardous movement occurs, then switch the system to continuous mode
- Allow the system to run for approx. 2–3 minutes pressure-free and check the lines and devices for leaks
- Set operating values (pressure, speed) according to the system documentation

Valves already set by HANSA-FLEX are sealed with lacquer or a lead seal and must not be adjusted without consultation. The correct setting of these valves is safety-relevant.

## 6.5 NOTES ON WELDING ON FASTENERS AND PAINTING

- The piston rod must be completely extended; on cylinders with stroke <400 mm they must be completely removed before welding (protect seals from heat).
- The piston rod must be protected from weld spatter.
- The ground cable must always be connected to the part to be welded on, never to the piston rod or cylinder barrel.
- Retract the piston rod only when the cylinder has cooled down.
- During painting, the chrome-plated surface of the piston rod and the oil ports must be protected from paint spray mist.
- When drying in a drying cabinet after painting, the temperature must not exceed 100°C.

## 6.6 SEALS, MAINTENANCE AND CARE

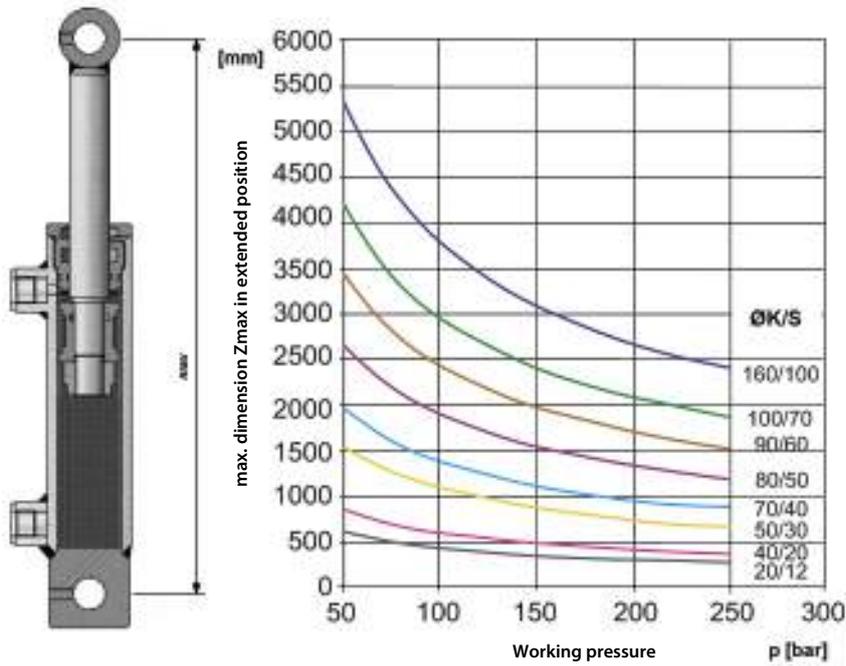

Seals in hydraulic cylinders are wear parts. If the admissible values for external or internal leakage are exceeded, the seals must be replaced. Complete seal kits should always be replaced together.

In general, hydraulic cylinders require no particular maintenance. Where heavy-duty operation is involved, ensure proper lubrication of the bearing points (pivot bearings, swivel bearings, etc.). After commissioning, pay particular attention to leak tightness and functional safety.

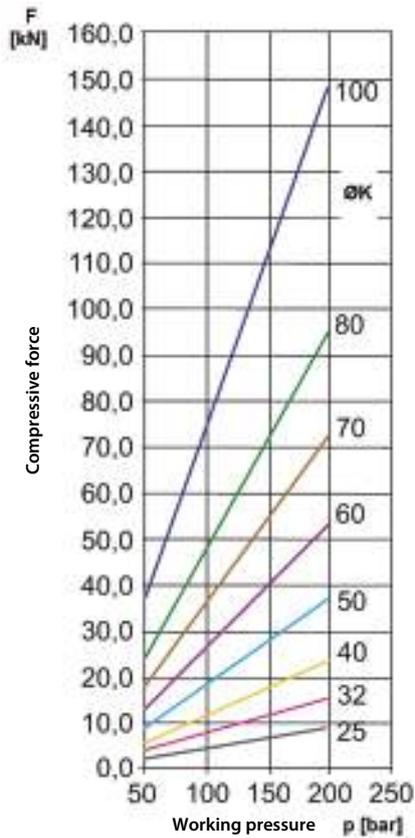

The maintenance intervals for the system (oil and filter changes) in the system manufacturer's specifications must be observed.

6.7 TABLES FOR CYLINDERS

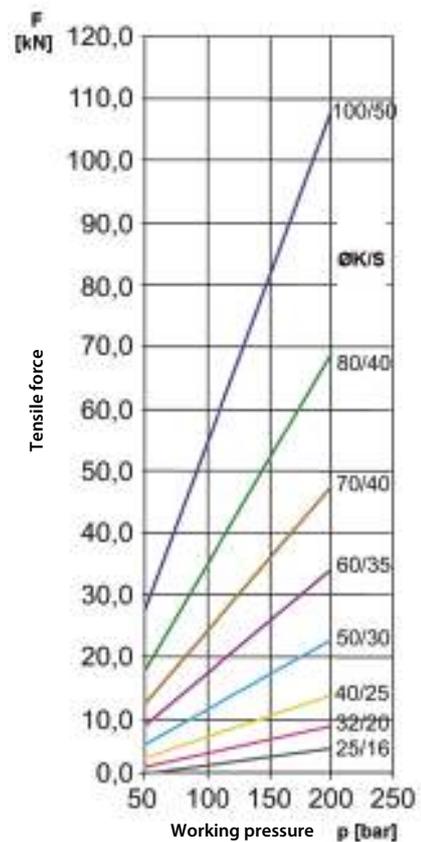

Buckling diagram for single and double-acting cylinders (buckling safety factor 3.5)

Pressure force diagram for single and double-acting cylinders (efficiency 95%)

Tensile force diagram for double-acting cylinders (efficiency 92%)

## 7. SAFETY PRECAUTIONS FOR WORKING WITH 700 BAR EQUIPMENT

- Observe the operating instructions
- Utilise only 80% of the equipment's loading capacity
- Wear protective work clothing
- Use equipment only on a level surface of sufficient load-bearing strength
- Secure raised loads mechanically
- Do not stand or walk under raised loads
- Position the equipment under the middle of the load
- Protect the equipment against heating > 65°C
- Avoid overloading the equipment
- Use a pressure gauge
- Do not actuate hand levers using tools or extensions
- Clean the equipment and pack away properly after use
- Clean quick-couplers before use
- Protect hoses from sharp edges, kinks and other forms of damage

## 8. FILTRATION

### 8.1 BASIC PRINCIPLES

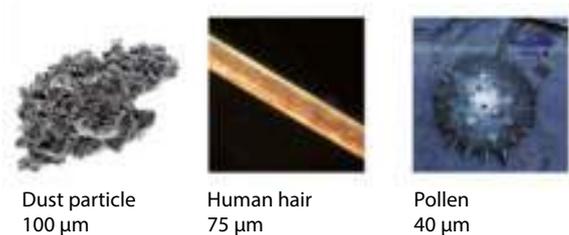

75% of all hydraulic systems are heavily contaminated. 80% of all machine failures or hydraulic damage are attributable to oil contamination. Wear and ageing are two reasons why the oil has to be changed at regular intervals.

The time for an oil change depends on the performance of the oil and on the operating and service conditions. This is no guarantee, however, of permanently clean oil, since even fresh oil is often already heavily contaminated on delivery. This results in increased component wear, machine failure and possibly production standstills. Machine standstill times can be minimised by selective and consistent use of filters.

### 8.2 CAUSES OF OIL CONTAMINATION

#### 8.2.1 SOLID PARTICLES (HARD OR SOFT)

- Due to installation work or when changing parts
- Due to topping up with new (contaminated) hydraulic fluid
- Via the wipers and seals of the cylinders
- Due to a faulty tank seal
- Due to internal abrasion in the components

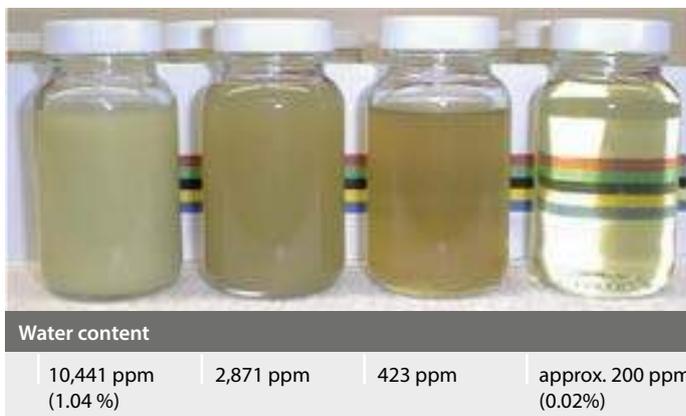

Solid particles can result in mechanical wear to all the components in the hydraulic system. Typical particle sizes in a hydraulic system range from 4 µm to 14 µm (for comparison: Pollen particle 40 µm, human hair 75 µm, dust particle 100 µm).

#### 8.2.2 FREE WATER IN THE SYSTEM

- Due to a faulty tank seal
- Due to cleaning work (e.g. with high-pressure cleaners)
- Via the ambient air (tank breather)
- Condensation
- Leaks in the cooling system

With water droplets with a size of over 2–10 µm, the oil becomes cloudy and the saturation limit of the oil is reached. The water content in the hydraulic oil should not exceed 0.03%. Consequences of water in the hydraulic oil can be: Metal corrosion, oxidation, saponification, gumming, swelling, cavitation, acid formation, increased coefficient of friction with increased wear.

### 8.2.3 UNDISSOLVED AIR IN THE HYDRAULIC FLUID

- Due to leaks in the system (vacuum)
- Due to installation work
- Oil return to the tank (swirling, air mixing)

If the air is dissolved in the oil, this has no influence on the properties. The air is dissolved in the water in proportion to the pressure (up to approx. 300 bar). Dissolved air is discharged to the saturation limit at low pressure. Due to the differences between discharge rate and solution rate, however, air bubbles remain in the oil even in the event of a renewed increase in pressure.

Undissolved air can lead to serious damage. This is caused e.g. by the micro-diesel effect (spontaneous ignition of an air/gas mixture in the high-pressure range, similar to cavitation). Gas bubbles in the hydraulic system can enter the seal gap and the gap edges of the valves and explode as a result of the compression. These seals are destroyed in a minimum of time and the gap edges of the valves are damaged.

### 8.2.4 OIL AGEING

- Mixing of different oils
- Excessive operating temperatures due to inadequate cooling
- Poor material compatibility of the oil
- Inadequate oxidation stability of the base oils

### 8.3 CLASSIFICATION OF OIL PURITY

ISO Standard ISO 4406: 1999 is a preferred method of classifying oil purity (contamination by solid particles). The code consists of a combination of three numerical values. The first figure describes the number of particles larger than 4 µm in one millilitre of test fluid. The second figure stands for the number of particles larger than 6 µm. The third figure stands for the number of particles larger than 14 µm.

ISO 4406:1999   Table of solid contaminants in hydraulic oils		
Number of particles per 1 ml of fluid		CODE
larger than:	up to:	
1,300,000	2,500,000	28
640,000	1,300,000	27
320,000	640,000	26
160,000	320,000	25
80,000	160,000	24
40,000	80,000	23
20,000	40,000	<b>22</b>
10,000	20,000	21
5,000	10,000	20
2,500	5,000	<b>19</b>
1,300	2,500	18
640	1,300	17
320	640	16
80	320	15
40	160	<b>14</b>
20	80	13

In the example the code 22/19/14 means  
 20,000 – 40,000 particles > 4 µm  
 2,500 – 5,000 particles > 6 µm  
 80 – 160 particles > 14 µm

The oil purity is generally determined in accordance with ISO 4406:1999 using a laser particulate counter.

Typically recommended oil purity specifications for hydraulic components

Component	Typical specification						
Servo valve	●	●	●				
Proportional valve		●	●	●			
Variable displacement pumps			●	●	●		
Cartridge valve				●	●	●	
Piston pump				●	●	●	
Vane pump					●	●	●
Pressure relief valve					●	●	●
Solenoid-operated directional control valve					●	●	●
ISO 4406:1999 CODE	14/12/9	15/13/10	16/14/11	17/15/12	18/16/13	19/17/14	20/18/15
Recommended filter mesh size (absolute)	3 μm		6 μm		10 μm		> 10 μm

### 8.4 FILTER MESH SIZE, β VALUE: AND SEPARATION RATE

Apart from their differentiation by function (e.g. pressure filter, return filter, suction filter), hydraulic filters are also classified according to the filter material and the filter mesh size (μm). Depending on the application, filters with mesh sizes between 3 μm and 250 μm are employed.

Further important parameters for the performance of a filter are the β value and the separation rate.

The β value (ISO 16889) is the measure of the filter separation rate and indicates the ratio of particles upline (Nv) and downline of the filter (Nh).

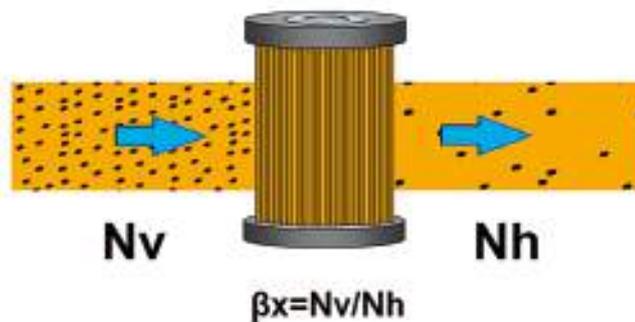

$$\beta_x = N_v / N_h$$

β10 > 200 therefore means that of 1000 particles with a size of 10 μm, only five particles pass through the filter. 995 particles are retained. Filters with fibreglass media must achieve a β value of min. 200 in order to meet present-day demands on hydraulic filtration.

The separation rate (retention rate) thus has the following direct relationship with the β value:

$$\epsilon = (\beta_x - 1) / \beta_x$$

A value of β10 >200 thus corresponds to a separation rate of 99.5%.

## 8.5 ADSORBER FILTERS

### 8.5.1 FUNCTIONAL PRINCIPLE

In numerous applications, e.g. in hydraulic systems or gearboxes, water is one of the main causes of damage and high costs. Water hereby enters the systems as humidity from the ambient air due to temperature fluctuations or active removal of the hydraulic oil. The use of adsorber filters can help to bind the humidity in the intaken air and so reduce the contamination of the hydraulic oil. That means longer service lives, less damage and ultimately lower costs.

On the basis of the thermal process engineering, the adsorption, the water in the air is retained in the pores of the adsorbent (desiccant). There is there no change in volume and only the weight increases. The maximum water adsorption capacity is approx. 35% w/w. During the adsorption process, the intaken air is dried, while the dry waste air allow a cyclic regeneration of the adsorbent. A precondition for a high efficiency is the use of activated charcoal to separate the oil mist and an optional valve system to prevent loading during standstill times.

### 8.5.2 COLOUR SATURATION

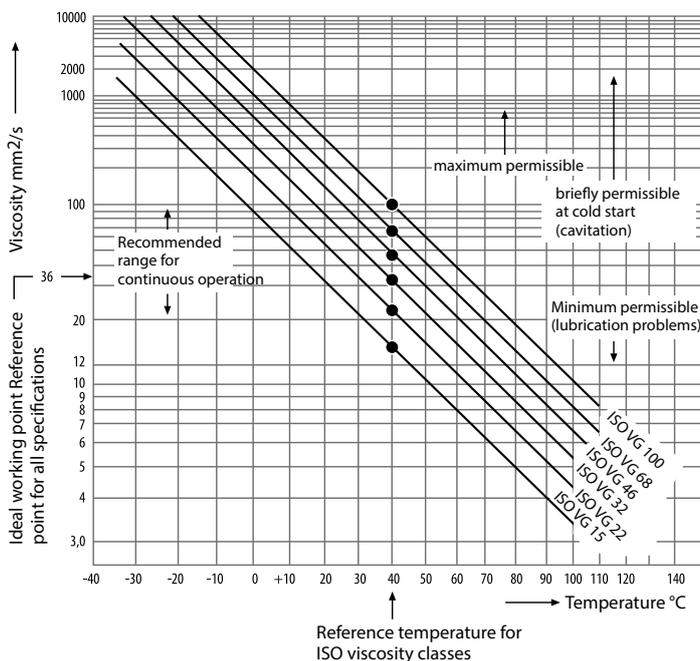

The saturation and the then necessary replacement of the adsorbent is indicated by a change in colour from orange to green. Silica gel (silicon oxide SiO<sub>2</sub>) with heavy metal-free pH indicators (organic pigments) is used in the adsorber filters. These are substances whose colour depends on the pH value of the solution.

Silica gel and the pH indicators used are classified as non-hazardous substances according to the legislation of the European Union (EC Directive No. 1272/2008). It is not subject to mandatory labelling according to EC Guidelines (67/548/EEC and 1999/45/EC) and the corresponding national laws. The adsorbents used are therefore not health or environment-endangering substances.

## 8.6 DEMANDS ON HYDRAULIC FLUIDS AND THEIR SELECTION

The following main characteristics must be observed when selecting the hydraulic fluid:

- Viscosity, viscosity index, viscosity class VG (viscosity at 40°C), pour point

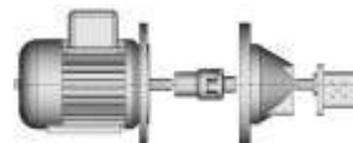

NOTE:  
The information given in the catalogue on the individual devices (specifications) is binding

For a given application, the characteristics of the hydraulic fluid have to be reconciled with the operating conditions of the system and its components. A hydraulic fluid has a low viscosity when it is thin-bodied and a high viscosity when it is thick-bodied.

The viscosity changes with the temperature. The viscosity drops with increasing temperature. The viscosity rises with decreasing temperature. Mixing of unsuitable or different hydraulic fluids is not permitted and can lead to the total failure of the hydraulic system.

## 9. SELECTION TABLE OF MOTOR/PUMP COMBINATIONS FOR GEAR PUMPS

The selection table shows possible combinations of electric motors of sizes 71 to 180 (mounting B3B5) and gear pumps of sizes BG0 to BG3 (European standard) with the corresponding pump mounts and couplings.

For particularly high torques, combinations with steel coupling should be used!

Gear pump size BG 0: Hole pattern 66 / Centering dia. 22.0 / Cylindrical shaft dia. 7.0

Gear pump size BG 1: Hole pattern 71.9 x 52.4 / Centering dia. 25.4 / Conical shaft 1:8

Gear pump size BG 2: Hole pattern 96.2 x 71.5 / Centering dia. 36.5 / Conical shaft 1:8

Gear pump size BG 3: Hole pattern 128 x 98 / Centering dia. 50.8 / Conical shaft 1:8

Electric motor (Article number)	Power (kW)	Gear pump (Master designation from this catalogue)	Size	Pump mounts (Article number)	Coupling (Article number)

## 10. INFORMATION ON MACHINERY DIRECTIVE 2006/42/EC REGARDING COMPONENTS AND ASSEMBLIES FROM HANSA-FLEX AG

**T** The Machinery Directive 2006/42/EC demands from the machine manufacturer the identification of the necessary safety functions with definition of a safety level for the safety-related control system. Relevant in this sense are only the components used in the safety circuit, such as for the dead-man circuit or safety temperature controller. These safety components are components which are not necessary for the actual function of the machine or which can be replaced by parts that are normally used for the function of the machine. Only then are hydraulic components to be regarded as safety components and have to bear the CE mark. If these special safety components are brought onto the market, the MTBF values (mean time between failures) for calculation of the performance level (PL) are shown in our documentation.

Components and assemblies from the HANSA-FLEX AG product range are generally not subject to this guideline. Where this is not the case, the corresponding documentation is supplied.

Since the Machinery Directive 2006/42/EC came into force, manufacturer's declarations are no longer issued for components and assemblies. For components requiring CE marking, an EC Declaration of Conformity is issued.

# Products

Hydraulic hoses

Hose lines in all nominal diameters and for every field of application

Hydraulic steel tubes

Precision tubes conforming to DIN 2391, deliverable as single items or in series

Hose fittings

Comprehensive range of fittings in stock, custom designs at very short notice

Fittings

Many different dimensions and shapes; available in both steel and stainless steel

Couplings

Available immediately from stock; couplings for every conceivable purpose

Metal & PTFE hoses

Special hose lines for solid, liquid and gaseous media

Bellows & expansion joints

Stainless steel and rubber, standard or custom design for your requirements

Industrial hoses

Hoses, fittings and couplings for industrial applications in many sectors

Preformed hoses

Many standard sizes ex warehouse, custom designs for all geometries

Hydraulic cylinders

Many variants available in standard inventory, custom designs at short notice

Hydraulic components

More than 4,500 components available from stock – supply of ready-to-install groups

Power unit manufacture

Innovative solutions in hydraulic drive and control technology

High pressure flanges

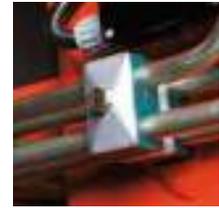

Many designs in all standard alloys permanently in stock – up to 6,000 psi and higher

Measuring systems

Extensive range of measuring systems for fluid Technology – analog or digital

Mounting technology

Deliverable materials: polypropylene, polyamide, solid rubber and aluminium

Adapters

Wide range of adapters for optimum flow conditions

Hydraulic seals

More than 8,000 different sealing systems in stock, custom designs available at short notice

Filtration

Filter technology ensures a smooth operation of plants and machinery

# Services

## Rapid hydraulics service

Full-service mobile rapid hydraulics service – contactable at no charge, any time

## Fluid service

Professional consulting and oil care; provision of filter systems and elements

## Industrial assembly

Scheduled activities to avoid unscheduled stoppages

## Technical consulting

Individual solutions tuned precisely to the needs of our customers

## Engineering/ Project planning

Planning for entire hydraulic systems – all from a single source

## Cylinder repair

Manufacturer-independent repair of cylinders, pumps, motors and valves

## Workshop containers

Mobile workshop containers for extreme application areas

## Plant-in-plant production

Production facility at the customer's site – perfect synchronisation, rapid response times

## Kitting

Ready-to-install, pre-assembled sets – individually adapted to the customer's needs

## Kanban

Everything permanently in stock – structured inventory maintained at customer's site

## Customer training

Wide-ranging seminar programme on all aspects of fluid technology, also conducted at customer's site

## Hose identification

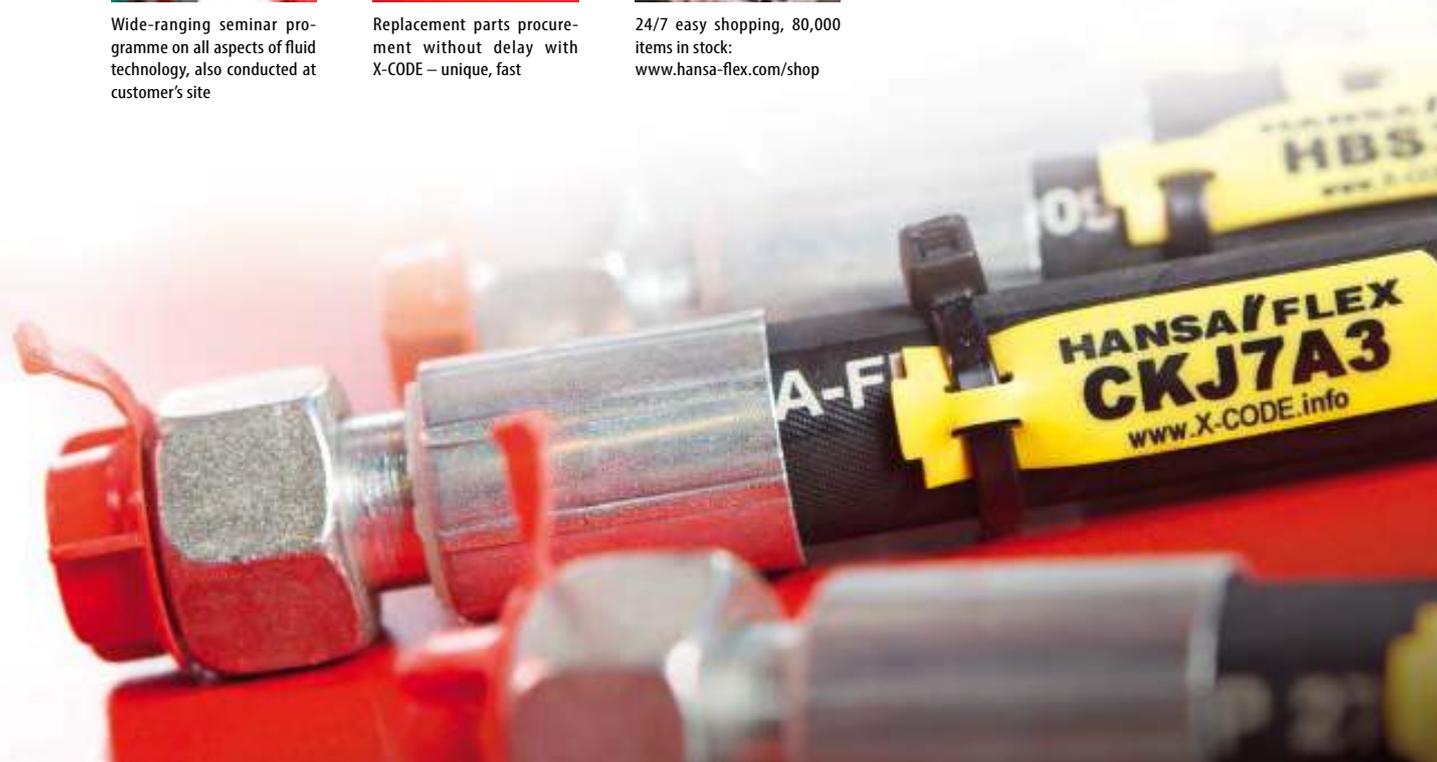

Replacement parts procurement without delay with X-CODE – unique, fast

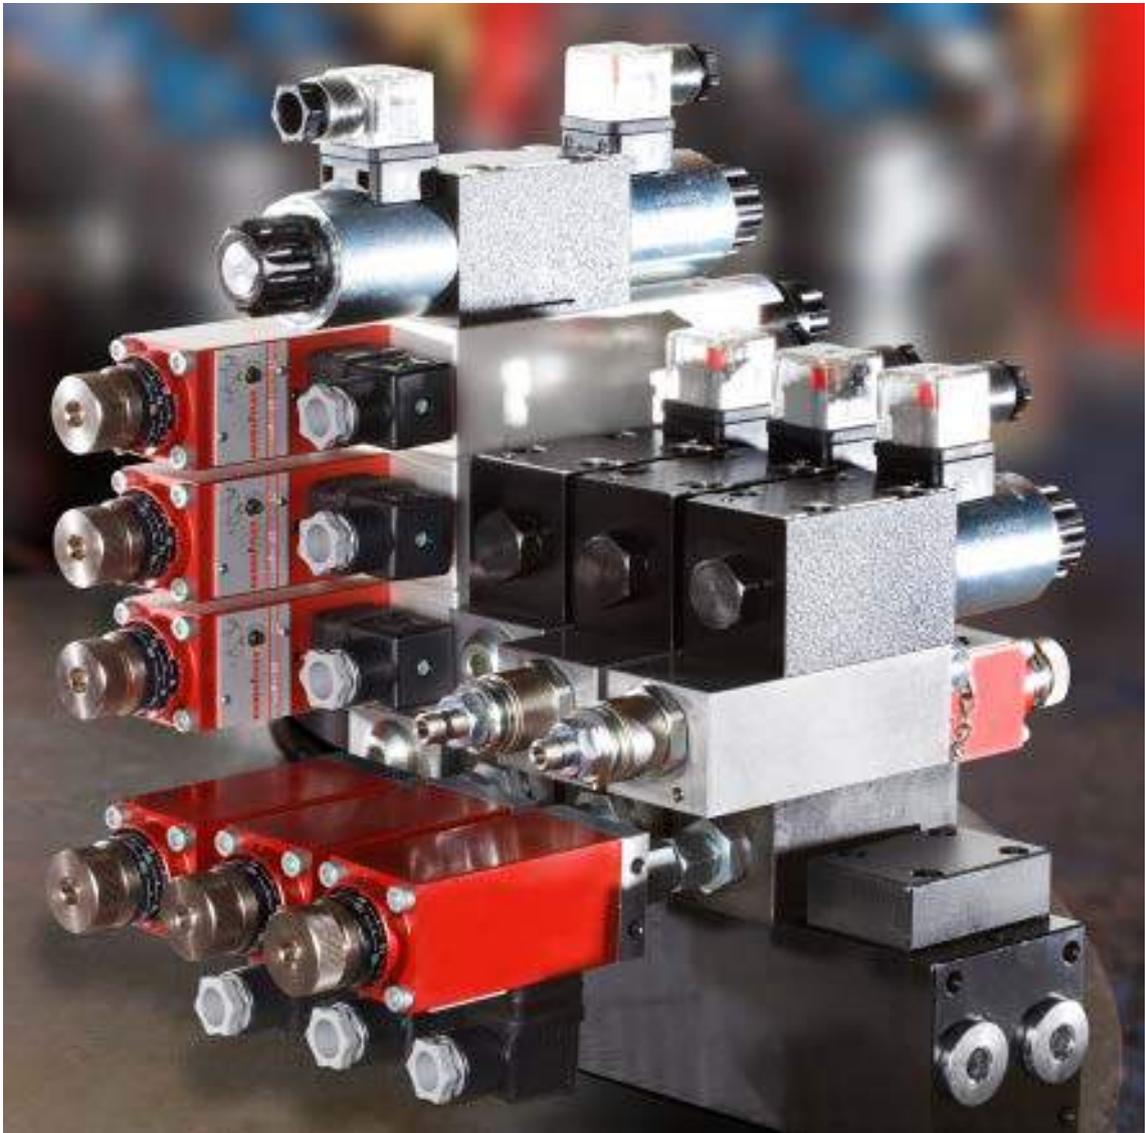

## Online-Shop

24/7 easy shopping, 80,000 items in stock:

## HK PAM 014 R

### Manual pump for pipeline installation

**Material:** Housing: cast iron, inner parts steel

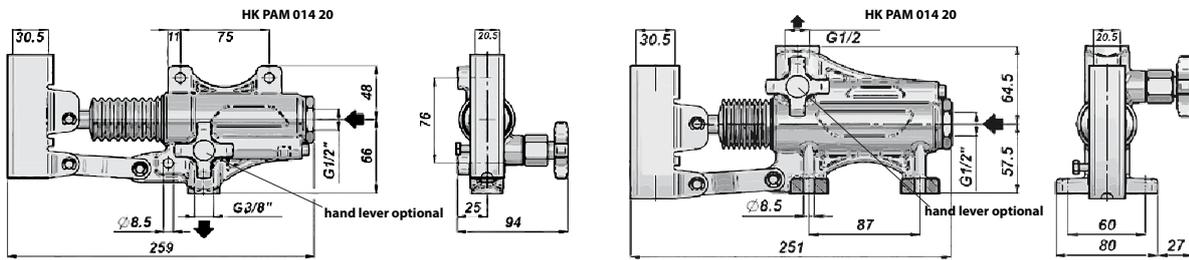

**Note:** The pressure relief valves must be set according to the application.

**Ordering information:** Caution! Remember to order the hand lever HKPAM0290000!

Identification	Thread	Vdh (ccm)	Design	p max. bar	Pressure (30)* bar	Weight kg
HK PAM 014 20 00	1/2-3/8" IG	20	with manual drain	350	130	2,75
HK PAM 014 20 02	1/2-3/8" IG	20	without manual drain and pressure relief valve	350	130	2,70
HK PAM 014 20 04	1/2-3/8" IG	20	with pressure relief valve	350	130	2,90
HK PAM 014 40 00	1/2-1/2" IG	40	with manual drain	280	90	3,65
HK PAM 014 40 04	1/2-1/2" IG	40	with pressure relief valve	280	90	3,80

Vdh = conveying volume per double stroke    Pressure (30)= pressure with hand force 30 daN with standard lever

**Web:** <http://cat.hansa-flex.com/en/HKPAM014R>

**Accessories:**

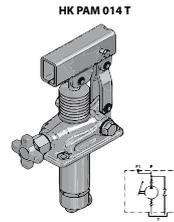

HK PAM Hebel - Lever for PAM manual pump

HK PAM Faltenbalg - Bellows for PAM manual pump

## HK PAM 014 T

## Manual pump for tank installation

**Scope of supply:** incl. seal and screw set  
**Material:** Housing: cast iron, inner parts steel

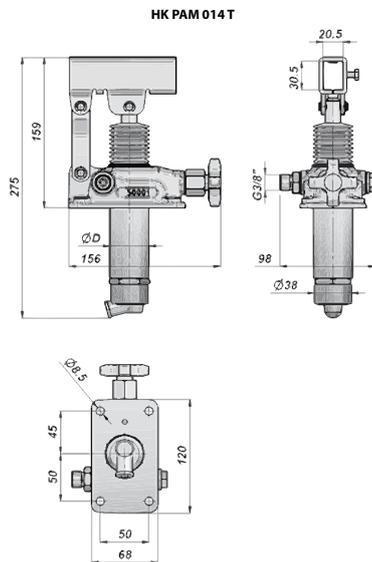

**Note:** The pressure relief valves must be set according to the application.

**Ordering information:** Caution! Remember to order the hand lever HKPAM0290000!

Identification	Thread	Vdh (ccm) cc	Design	p max. bar	Pressure (30)* bar	Weight kg
HK PAM 014 12 00	1x 3/8" AG	12	with manual drain	380	160	2,85
HK PAM 014 12 01	1x 3/8" AG	12	with manual drain and pressure relief valve	380	160	3,00
HK PAM 014 25 00	1x 3/8" AG	25	with manual drain	350	100	2,95
HK PAM 014 25 01	1x 3/8" AG	25	with manual drain and pressure relief valve	350	100	3,00
HK PAM 014 45 00	1x 3/8" AG	45	with manual drain	280	80	3,15
HK PAM 014 45 01	1x 3/8" AG	45	with manual drain and pressure relief valve	280	80	3,30

Vdh = conveying volume per double stroke    Pressure (30)= pressure with hand force 30 daN with standard lever

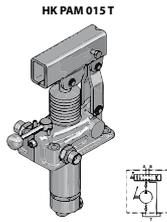

**Web:** <http://cat.hansa-flex.com/en/HKPAM014T>

**Accessories:**

HK PAM Hebel - Lever for PAM manual pump  
 HK PM0 022 - Tank for PAM manual pump  
 HK PAM Faltenbalg - Bellows for PAM manual pump

## HK PAM 015 T

### Manual pump for tank installation with directional control valve

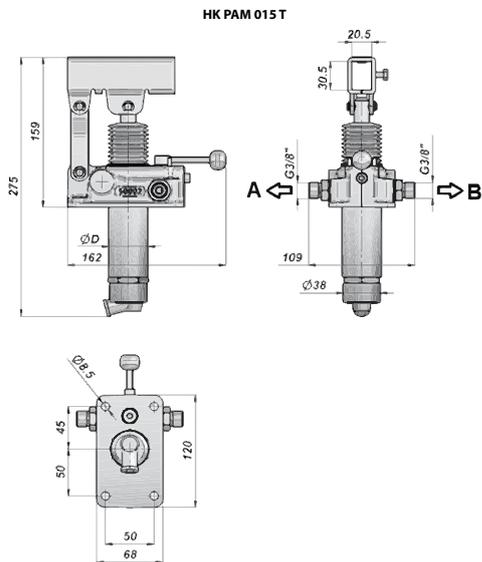

**Scope of supply:** incl. seal and screw set  
**Material:** Housing: cast iron, inner parts steel

**Note:** The pressure relief valves must be set according to the application.

**Ordering information:** Caution! Remember to order the hand lever HKPAM0290000!

Identification	Thread	Vdh (ccm) cc	Design	p max. bar	Pressure (30)* bar	Weight kg
HK PAM 015 1200	2 x 3/8" AG	12	with 4/3-way valve	380	160	2,85
HK PAM 015 1202	2 x 3/8" AG	12	with pressure relief valve and 4/3-way valve	380	160	3,00
HK PAM 015 2500	2 x 3/8" AG	25	with 4/3-way valve	350	100	2,95

HK PAM 015 4500	2 x 3/8" AG	45	with 4/3-way valve	280	80	3,15
HK PAM 015 4502	2 x 3/8" AG	45	with pressure relief valve and 4/3-way valve	280	80	3,30

Vdh = conveying volume per double stroke      Pressure (30)= pressure with hand force 30 daN with standard lever

**Web:** <http://cat.hansa-flex.com/en/HKPAM015T>

**Accessories:**

- HK PAM Hebel - Lever for PAM manual pump
- HK PM0 022 - Tank for PAM manual pump
- HK PAM Faltenbalg - Bellows for PAM manual pump

## HK PAM Faltenbalg

## Bellows for PAM manual pump

**Use:** Spare for mounting via the pump plunger

Identification	Weight kg
HK PAM 019 01 01	0,1

**Web:** <http://cat.hansa-flex.com/en/HKPAMFALTENBALG>

**Spare part for following products:**

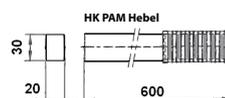

HK PAM 014 R - Manual pump for pipeline installation

HK PAM 014 T - Manual pump for tank installation

HK PAM 015 T - Manual pump for tank installation with directional control valve

## HK PAM Hebel

## Lever for PAM manual pump

Identification	Dimensions	Weight kg
HK PAM 029 0000	20 x 30 x 600	0,71

**Web:** <http://cat.hansa-flex.com/en/HKPAMHEBEL>

**Accessory for following products:**

HK PAM 014 R - Manual pump for pipeline installation

HK PAM 014 T - Manual pump for tank installation

HK PAM 015 T - Manual pump for tank installation with directional control valve

**HK PM0 022**

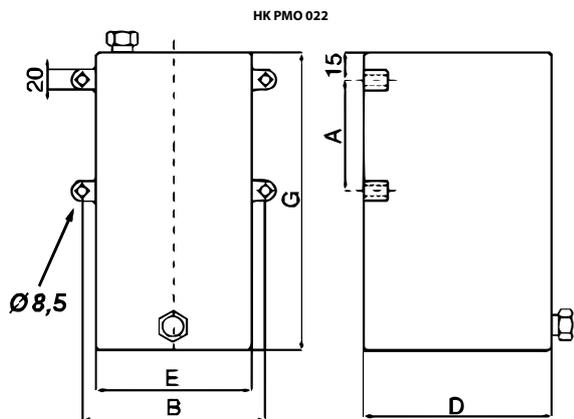

**Tank for PAM manual pump**

**Material:** Steel, painted black

## HK GR33

## Gear pump, size 2, low noise

European standard pump – hole pattern 96.2 x 71.5 – dia. 36.5 – taper 1:8 – flange fitting

Due to the special tooth design these pumps achieve a significantly lower noise level. (By comparison: standard gear pump 65-75 dB; gear pump HK GR33 47-57 dB; values for speed range 500-3000 rev/min)

**Design:** low noise

**Pitch circle pressure side:** 30 / M6

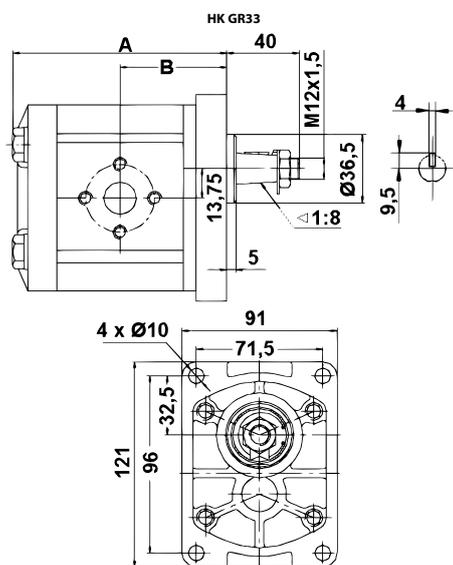

**Pitch circle suction side:** 40 / M8

**Ordering information:** Further pump versions available on request

## HK SU 2

### Pump supports

Pump supports are employed on gear pumps that are driven e.g. by V-belts or chains and are thus subject to higher radial loads.

A corresponding coupling hub is required for the connection between pump and pump support. (Please order separately!)

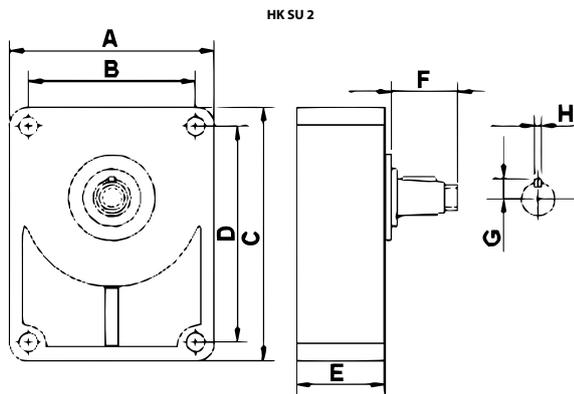

Grease according to DIN 51502 is recommended for lubrication.

Connection only for European standard pumps.

**Use:** For European standard gear pumps BG2

HK PVPC - PVPC axial piston pump

## Bent axis axial piston pump

Fixed displacement pump – hole pattern 80 x 80 – dia. 80 – shaft 8x32x16 ISO 14 – threaded fitting

Suction socket Ø 51.8 mm for HK PBA \*\*\* 51SF,

Suction socket Ø 64.5 mm for HK PBA \*\*\* 64SF

Changing rotational direction can be done by changing the setting screw and suction socket. Details can be found in the accompanying instructions.

**Design:** fixed displacement pump, Viton seals

**Thread pressure side:** G 3/4" to 63 VFU ccm, G 1" from 80 VFU ccm

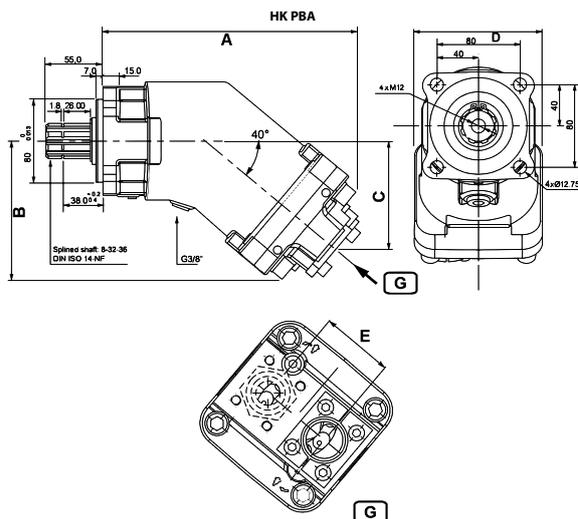

**Thread suction side:** G 3/4" to 63 VFU ccm, G 1" from 80 VFU ccm

**Scope of supply:** incl. intake manifold and inspection tube

**HK 9RD 02 BG1**

**Gear flow divider, size 1 9RD 2-way**

This flow divider is used to supply two independent hydraulic circuits with just one pump

Division error approx. 3%

Configuration of gear flow dividers:  $q_i = Q/z * 1000/n$

$q_i$  = displacement/section [cm<sup>3</sup>];  $Q$  = total intake volumetric flow [l/min];  $z$  = no. of sections;  $n$  = rotating speed [rpm]

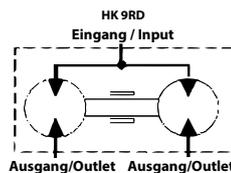

**Design:** without central phase compensation valves, internal leak oil discharge

**Rotational speed range:** 1200 - 2700 U/min

**Pressure difference:** max. 30 bar (between the sections)

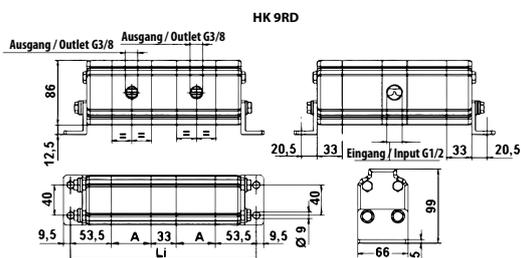

**Recommended speed:** 1800 - 2000 rpm

**Note:** Before commissioning the system, the first running-in of the gear flow divider should be under no load.

**Web:** <http://cat.hansa-flex.com/en/HK9RV02BG1>

**HK 9RD 04 BG1**

**Gear flow divider, size 1 9RD 4-way**

This flow divider is used to supply four independent hydraulic circuits with just one pump

Division error approx. 3%

Configuration of gear flow dividers:  $q_i = Q/z * 1000/n$

$q_i$  = displacement/section [cm<sup>3</sup>];  $Q$  = total intake volumetric flow [l/min];  $z$  = no. of sections;  $n$  = rotating speed [rpm]

**Design:** without central phase compensation valves, internal leak oil discharge

**Rotational speed range:** 1200 - 2700 U/min

**Pressure difference:** max. 30 bar (between the sections)

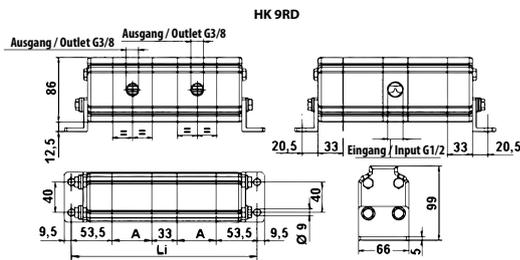

**Recommended speed:** 1800 - 2000 rpm

**Note:** Before commissioning the system, the first running-in of the gear flow divider should be under no load.

Diagrams and circuit diagrams essentially valid as schematic diagrams also for 4-way flow dividers.

Identification	Intake volume per section cc	p1 max. bar	p2 max. bar	Flow per element min. L/min	Flow per element max. L/min	Flow per element L/min	A mm	Li mm	Weight kg

**HK 9RS 04 BG1**

**Gear flow divider, size 1 9RS 4-way**

This flow divider is used to supply four independent hydraulic circuits with just one pump  
 Division error approx. 3%  
 Equal pressure setting for all sections  
 Valves settable from 70-210 bar, other setting ranges on request  
 Modification to internal leak oil discharge possible - For this, remove the cylinder head screw in port T and close off the port with G1/2" blind plug (modification recommended only after consultation!)  
 Configuration of gear flow dividers:  $q_i = Q/z * 1000/n$   
 $q_i$  = displacement/section [cm<sup>3</sup>]; Q = total intake volumetric flow [l/min]; z = no. of sections; n = rotating speed [rpm]

**Design:** with central phase compensation valve, external leak oil discharge, Adjustment range DBV: 70-210 bar

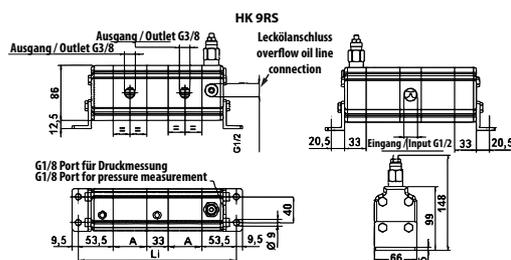

**Rotational speed range:** 1200 - 2700 U/min  
**Pressure difference:** max. 30 bar (between the sections)  
**Recommended speed:** 1800 - 2000 rpm

**Note:** Before commissioning the system, the first running-in of the gear flow divider should be under no load.

Diagrams and circuit diagrams essentially valid as schematic diagrams also for 4-way flow dividers.

## HK ARAM

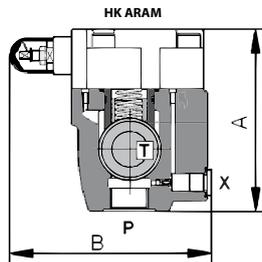

### Pressure relief valve ARAM

**Design:** pilot-controlled, with damping piston  
**Operating pressure:** max. 350 bar

**Note:** These valves must be set according to the application.  
 X port for optional remote control, sealed as standard

Identification	Pressure setting range bar	Q max. L/min	A mm	B mm	Connection P	Connection T	Connection X	Weight kg
HK ARAM 20 100	6 - 100	350	126	139	G 3/4"	G 1"	G 1/4"	3,9
HK ARAM 20 210	7 - 210	350	126	139	G 3/4"	G 1"	G 1/4"	3,9
HK ARAM 20 350	8 - 350	350	126	139	G 3/4"	G 1"	G 1/4"	3,9

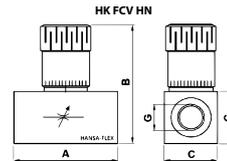

**Web:** <http://cat.hansa-flex.com/en/HKARAM>

**HK FCV HN**
**Throttle valve**

Precise volumetric flow control or barring in both directions  
 Precise throttling over a wide flow rate range  
 The hex. socket head screw in the setting knob serves for locking

**Design:** Economy variant, Steel version with precision valve spindle

**Operating pressure:** up to 400 bar

**Note:** These valves must be set according to the application.

Identification	Flow rate max. L/min	Pressure max. bar	A mm	B mm	C mm	G	Weight kg
HK FCV HN 400S 14	19	400	50	66	20	G 1/4"	0,20
HK FCV HN 600S 38	30	400	64	107	25	G 3/8"	0,40

HK FCV HN 1600S 1	150	320	108	147	45	G 1"	2,50

Values for max. flow rate at  $\Delta p = 20$  bar

**Web:** <http://cat.hansa-flex.com/en/HKFCVHN>

**HK V2 572**
**Throttle valve**

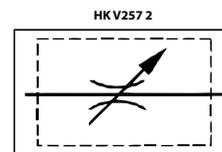

Precise volumetric flow control or barring in both directions  
 Metallic seal without leakage, linear opening cross-section  
 Precise throttling over a wide flow rate range  
 The setting is made via a decimal scale from 0-9 on the underside of the setting knob and a reference scale A to C from 0 to 4 on the valve shaft for exactly reproducible settings

The hex. socket head screw in the setting knob serves for locking  
 An additional lock nut is available for control panel installation

**Design:** Steel version with precision valve spindle, suitable for control panel installation

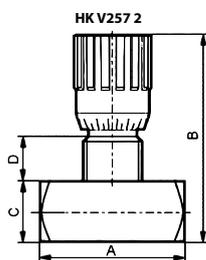

**Operating pressure:** up to 400 bar

**Note:** These valves must be set according to the application.

Identification	Flow rate max. L/min	Thread	Pressure bar	A mm	B mm	C mm	D mm	Weight kg

**Accessories:**

HK KM 202 - Counter nut

## DV IR

### Throttle valve DV IR

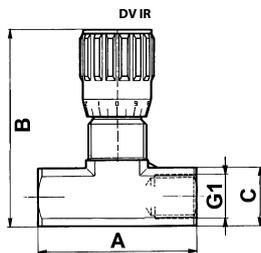

**Design:** Series EVN  
**Material:** Gasket: NBR  
**Temp. max.:** 100 °C  
**Media:** Mineral oil  
**Operating pressure:** max. 210 bar

**Note:** These valves must be set according to the application.

**Ordering information:** Seal: FPM (Viton) up to + 200°C on request.

Identification	Flow rate max. L/min	A mm	B mm	C mm	G1	Weight kg
DV 06 IR	15	36	60	17	G 1/4" -19	0,13
DV 10 IR	30	42	73	22	G 3/8" -19	0,25
DV 13 IR	50	57	85	27	G 1/2" -14	0,48

**Web:** <http://cat.hansa-flex.com/en/DVIR>

**HK FCCV HF**
**Flow control check valve**

Precise volumetric flow control or barring in one flow direction, free flow in the opposite direction

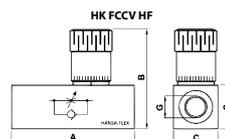

Precise throttling over a wide flow rate range

Opening pressure of the non-return valve 0.35 bar

The hex. socket head screw in the setting knob serves for locking

**Design:** Economy variant, Steel version with precision valve spindle

**Operating pressure:** up to 400 bar

**Note:** These valves must be set according to the application.

Identification	Flow rate max.	Pressure max.	A	B	C	G	Weight
	L/min						
HK FCCV HF 400S 14	19	400	67	45	20	G 1/4"	0,25

Qmax - max intake volumetric flow

**Web:** <http://cat.hansa-flex.com/en/DRVIR>

## HK V1 601

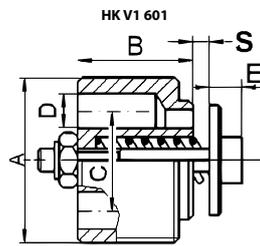

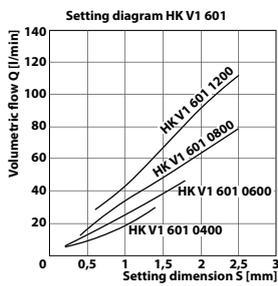

### Line break safety valve without housing

**Material:** Steel  
**Operating pressure:** max. 300 bar

**Note:** Note: Line break safety valves must be set according to the application!  
 The setting value "S" must correspond to 1.5 times the required volumetric flow for manually switched valves, and 2 times the required volumetric flow for electrically switched valves! Consider also the volumetric flow ratio with double-acting cylinders!

Identification	A	B	C	D	E	Q max.	Tightening torque	Weight

**HK RH**

**Non return valve RB**

Type HK RH \*\*\* V with pre-release, a polished seat valve spool is used with ball check valve. This will pre-opened when unlock, the throttle effect allows a bumpless relaxation of oil volume. Mainly used for high operating pressures and high flow rates.

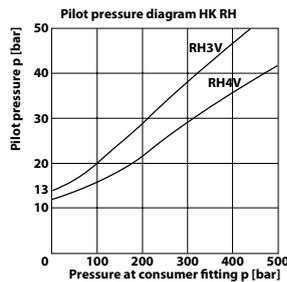

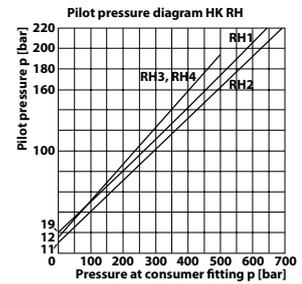

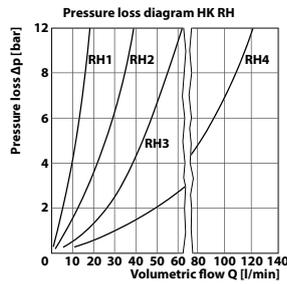

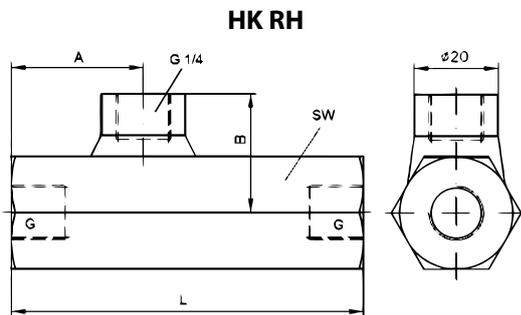

Pilot pressure ratio see diagram

**Design:** Ball locking, Type "V" with vale spool, pilot-controlled - single-acting

**Material:** Housing: Galvanised steel, Inside parts of steel

**Operating pressure:** max. 700 bar

Identification	p max. bar	Q max. L/min	A mm	B mm	G	L mm	AF mm	Weight kg

**Accessories:**

HK RB - Non return valve RB

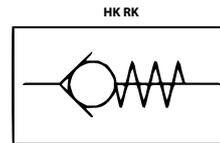

## Non return valve RK

Check valve for insertion into simple threaded boreholes (shoulder 118°).  
Housing sealing by O-ring NBR.

**Design:** Ball locking, for mounting in reverse direction

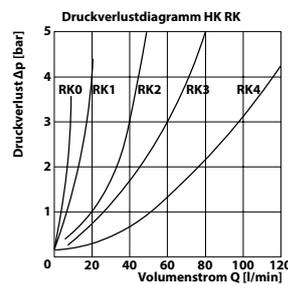

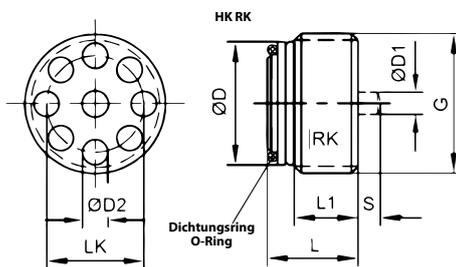

**Material:** Steel

**Operating pressure:** max. 700 bar

**Note:** For applications with greater shocks and vibration the valve must be secured with Loctite when screwing.

**HK V2 190**

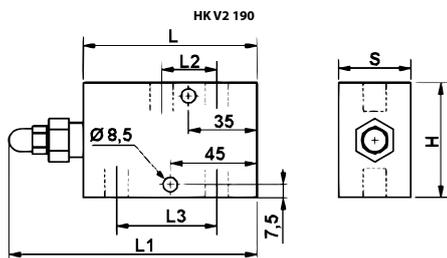

**V2190 lowering valve**

**Design:** single-acting  
**Material:** Housing: Galvanised steel, Inside parts of steel  
**Operating pressure:** max. 350 bar

**Note:** When using these valve with a plunger cylinder, an additional pressure relief valve must be installed in the V1 line that has to be matched to the load pressure of the cylinder. This pressure relief valve must discharge to the tank. These rate-of-drop valves must be set according to the application.

## HK V6 215

## flow control valve

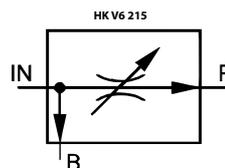

With these 3-way flow control valves, the preferred oil flow (P) is held constant irrespective of the incoming oil flow (IN). The residual oil flow (B) can be diverted to the tank or used for an ancillary consumer

Division: max. 75 % of quantity from IN to P, min. 5 l/min to P

**Design:** pressure-compensated

**Material:** Housing: Cast iron, Inside parts of steel

**Operating pressure:** max. 250 bar

**Note:** These valves must be set according to the application.

Identification	Thread IN/B	Thread P	Inlet max. L/min	Width mm	Height mm	Length mm	Weight kg
HK V6 215 0320	G 1/2"	G 3/8"	40	65	98	87	1,26

**Web:** <http://cat.hansa-flex.com/en/HKV6215>

## HK V6 215 DBV

## Flow control valve with secondary pressure relief

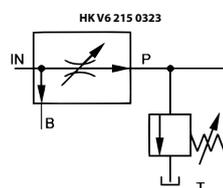

With these 3-way flow control valves, the preferred oil flow (P) is held constant irrespective of the incoming oil flow (IN). The residual oil flow (B) can be diverted to the tank or used for an ancillary consumer

Division: max. 75 % of quantity from IN to P, min. 5 l/min to P

**Design:** pressure-compensated, with additional secondary pressure relief valve

**Material:** Housing: Cast iron, Inside parts of steel

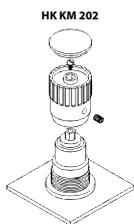

**Operating pressure:** max. 250 bar

**Note:** These valves must be set according to the application.

Identification	Thread IN/B	Thread P	Inlet max. L/min	Width mm	Height mm	Length mm	Weight kg
HK V6 215 0323	G 3/4"	G 1/2"	70	80	125	106	1,84

**Web:** <http://cat.hansa-flex.com/en/HKV6215DBV>

**HK KM 202****Counter nut**

Installation: Release the lock of the handwheel  
Loosen slotted screw under the PVC cap  
Remove handwheel  
Install valve using the lock nut

**Use:** For control panel installation of valves HKV257 2 and HK V257 5

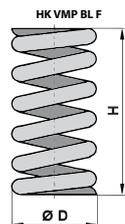

Identification	Thread	for valve size	Weight kg

HK RK - Non return valve RK

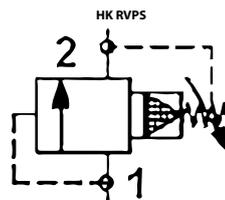

**HK RVPS**

**Pressure relief valve RVPS**

Setting via setscrew

**Design:** pilot-controlled

**Operating pressure:** max. 350 bar

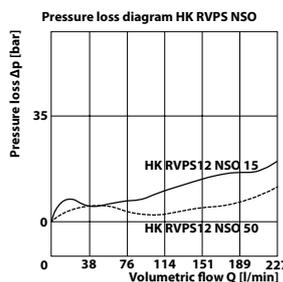

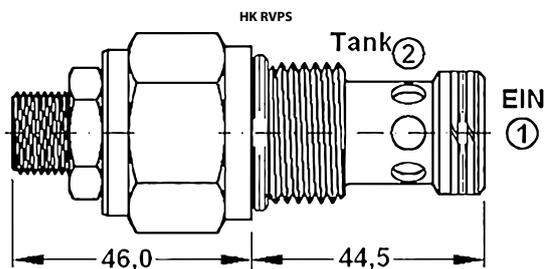

**Note:** These valves must be set according to the application.

Tightening torque for valve size 12 with Alu housing: 74-81 Nm

Tightening torque for valve size 12 with Steel housing: 95-102 Nm

Identification	Setting range min. bar	Setting range max. bar	Volumetric flow max. L/min	Screw-in housing	Screw-in thread	Weight kg
HK RVPS 12 NSO 15	7	105	230,0	HK GEH 12 C1220/HK GEH 34 C1220	SAE 12/2 1.1/16"-12UNF-2B	0,25

**Web:** <http://cat.hansa-flex.com/en/HKRVPS>

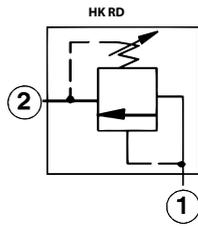

**Accessories:**

**HK GEH 20 AL** - Aluminium housing for SAE 2-way cartridge valve

**HK GEH 20 GGG** - GGG40 housing for SAE 2-way cartridge valve

**HK RD**

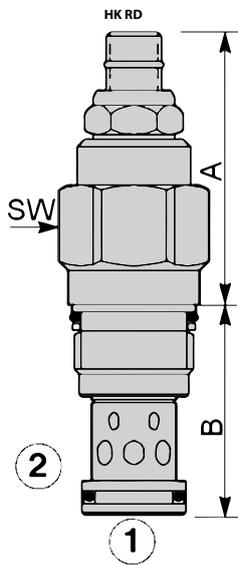

**Pressure relief valve RD**

Only adjustable when pressure at port 1 < 50 bar  
 connection 2 can be loaded with max. pressure  
 Response time approx. 2 ms  
**Design:** direct-controlled  
**Operating pressure:** max. 350 bar

**Note:** These valves must be set according to the application.

Identification	Setting range		Qmax	A	B	Screw-in housing	Screw-in thread	AF	Tightening torque	Weight

**Web:** <http://cat.hansa-flex.com/en/HKCKXCN>

**Accessories:**

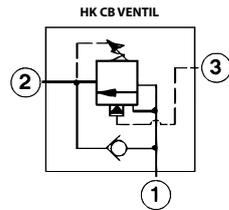

HK GEH BC - Valve housing for cartridge valve T-2A

HK GEH EC - Valve housing for cartridge valve T-11A

HK HR SUN - Hand wheel for cartridge valve SUN

**HK CB L**

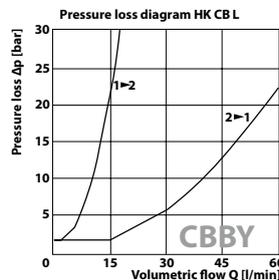

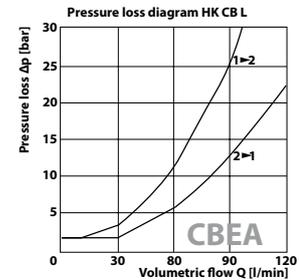

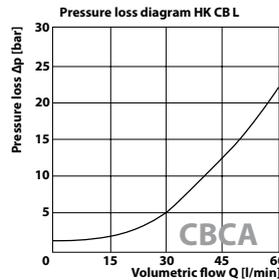

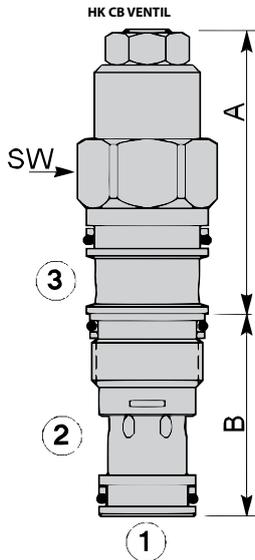

**Overcentre valve CB**

load-holding function to 210bar (with setting 280 bar, opening of load pressure 0 bar)  
 Load-dependent opening for controlling negative (dragging) loads  
 back pressure on connection 2 can impair the functioning of the valve  
 closing pressure  $\geq 85\%$  of the opening pressure  
 Note! Relief function by screwing in the spindle  
**Operating pressure: max. 350 bar**

**Note:** These valves must be set according to the application.

**Accessories:**

- HK GEH BC - Valve housing for cartridge valve T-2A
- HK GEH EBA - Housing sandwich plate with measurement connctn. for cart. valve T-11A
- HK GEH EBY - Housing sandwich plate with measurement connctn. for cart. valve T-11A
- HK GEH YA - Valve housing for cartridge valve T-2A
- HK GEH YE - Valve housing for cartridge valve T-11A
- HK HR SUN - Hand wheel for cartridge valve SUN

## Flow divider / combiner FDCV

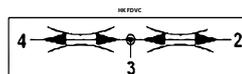

flow divider / combiner - pressure compensated

Division ratio 50 % : 50 %

Max. deviation at  $Q > 40\% Q_{max}$ :  $\pm 2.5\%$

**Design:** pressure-compensated

**Operating pressure:** max. 350 bar

**Note:** The greatest division accuracy is achieved in the range of the max. intake volumetric flow.

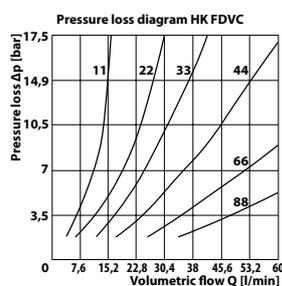

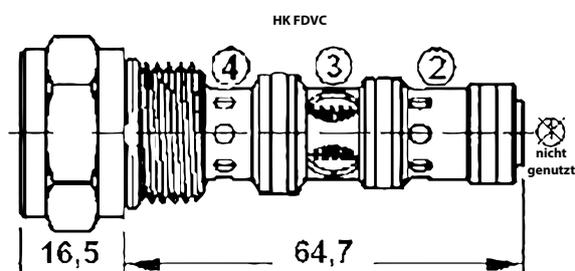

These valves can also be used for combining volumetric flows. (see circuit symbol)

Tightening torque for valve size 10 with Alu housing: 47-54 Nm

Tightening torque for valve size 10 with Steel housing: 74-81 Nm

Identification	Qon min. L/min	Qon max. L/min	Screw-in housing	Screw-in thread	Weight kg

(1) without manual emergency operation (2) with manual emergency operation

 Web: <http://cat.hansa-flex.com/en/HKEMDV>
**Accessories:**

HK GEH 20 AL - Aluminium housing for SAE 2-way cartridge valve

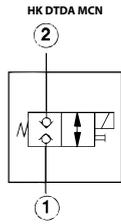

HK GEH 20 GGG - GGG40 housing for SAE 2-way cartridge valve

HK SP DIN 43650 - Electrical plug for solenoid coil DIN 43650 / ISO 4400

HK SP EMDV - Coil for cartridge valve EMDV

**HK DTDA**

**2/2-way solenoid-operated directional control valve DTDA**

Max. leakage 0.7cm<sup>3</sup>/min at 250 bar and 32cSt

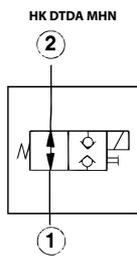

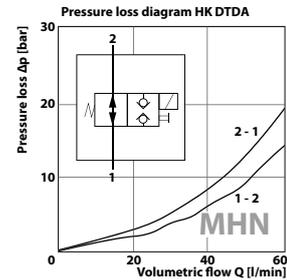

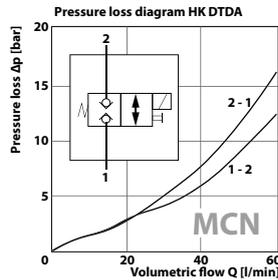

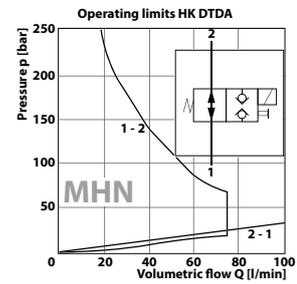

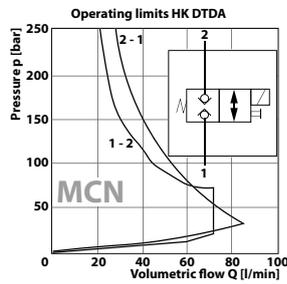

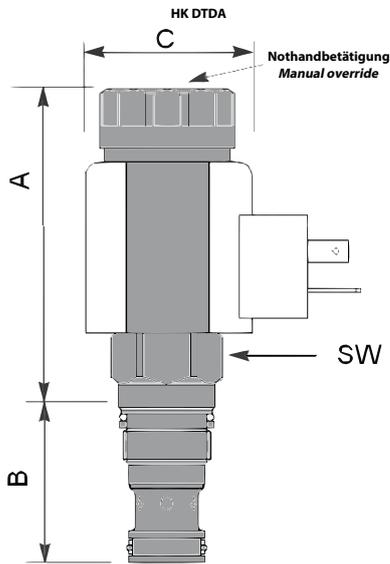

**Design:** direct-controlled, with manual emergency operation

**Scope of supply:** without coil or plug

**Operating pressure:** max. 350 bar

**Ordering information:** Please order solenoid coil separately (see accessories)

**Accessories:**

HK M HK DK - Set of bolts for NG 10 valves types HK DK11/DKE/DG4V5

Solenoid-operated directional control valve size 6 without coil

Can only be used for DC coils  
switching capacity limits see characteristic curves

- Design:** 4/2-way valve or 4/3-way valve, 5-chamber valve, with manual emergency operation, for DC coils
- Scope of supply:** without coil or plug
- Operating pressure:** P, A, B: max. 350bar / T: max. 210bar
- Volumetric flow:** max. 80 l/min (note characteristic curves)
- Connection:** ISO/Cetop 03 size 6
- Mounting:** 4 pcs. socket head screw M5x30 12.9

**Note:** Valves marked with (P) are leak oil reduced valves. With flow quantities of >70 % of the nominal values here, an increased drop in pressure is to be expected.

Leak oil reduced valves are also used as pilot valves for pilot-controlled solenoid-operated directional control valves.

When using a leak oil-reduced valve type HK DH\* 0711 P\*\*\* as a pilot valve, the centre position of the main valve is overridden.

**Ordering information:** Further circuits and versions, volumetric flows and switching power limits on request

- Accessories:**  
 HK SP 42C - Coil for solenoid-operated directional control valve HK42C  
 HK SP DIN 43650 - Electrical plug for solenoid coil DIN 43650 / ISO 4400  
 HK M HK 42 C - Set of bolts for NG10 valves type HK 42 C

**HK DPH 2**

**Directional control valve NG16**

These valves are actuated by a leak oil-reduced, solenoid-operated directional control valve size 6 set up as a pilot valve (type HK DHE \*P\*). Control is internal, but conversion to external is possible. The minimum control pressure for correct functioning is 8 bar.

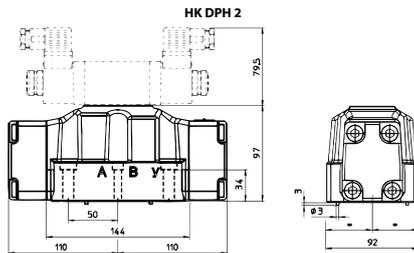

With the version with the control pressure generator, an additional pressure drop occurs, which ensures the minimum required control pressure for correct functioning. The version with the control pressure generator must be used if the pressure drop in the valve is below the minimum control pressure.

- Design:** 4/3-way valve (without pilot valve), pilot-controlled
- Operating pressure:** P, A, B: max. 350bar / T: max. 210bar
- Volumetric flow:** max. 300 l/min (note characteristic curves)
- Connection:** ISO/Cetop 07 NG16
- Mounting:** 2 No. hex. socket head screw M6x40 12.9 + 4 No. M10x50 12.9

**Ordering information:** Further circuits and versions, volumetric flows and switching power limits on request

- HK M HK DH** - Screw set for NG 6 valves type HK DH / DG4V3

## HK SP 6 DLOH

### Plug-in non-return valve

**Design:**

Plug-in non-return valve

**Use:**

For poppet valve HK DLOH, installation in connector P

**Identification**

HK SP 6 DLOH 100000 H

**Weight**

kg  
0,15

**Web:** <http://cat.hansa-flex.com/en/HKSP6DLOH>

**Accessory for following products:**

HK DLO - Poppet valve NG6

1

HK DH04/05

Directional control valve NG6, hydraulically controlled

Hydraulic actuation with emergency hand operation  
 Min. control pressure 3 bar / max. control pressure 70 bar / recommended control pressure 30 bar

Thread on control pressure port 1/8" female thread

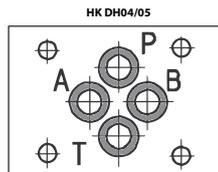

**Design:** 4/2-way valve or 4/3-way valve

**Operating pressure:** P, A, B: max. 350bar / T: max. 210bar

**Volumetric flow:** max. 50 l/min (note characteristic curves)

**Connection:** ISO/Cetop 03 size 6

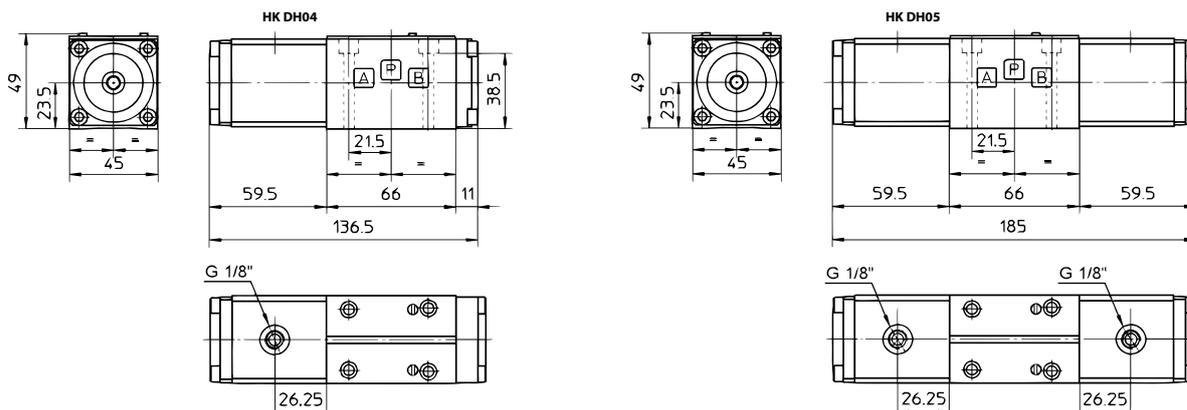

**Mounting:** 4 pcs. socket head screw M5x50 12.9

**Ordering information:** Further circuits and versions available on request

**HK HC 01**

**2-way pressure balance**

Sandwich body valve for constructing sandwich arrangements with ISO/Cetop 03 size 6 valves

The pressure balance maintains a constant pressure differential between connection P and connection A or B of the valve, to ensure that a constant flow rate is maintained in the event of pressure variations. The control pressure is diverted by the built-in shuttle valve.

**Design:** Sandwich body valve, pilot-controlled

**Operating pressure:** max. 350 bar

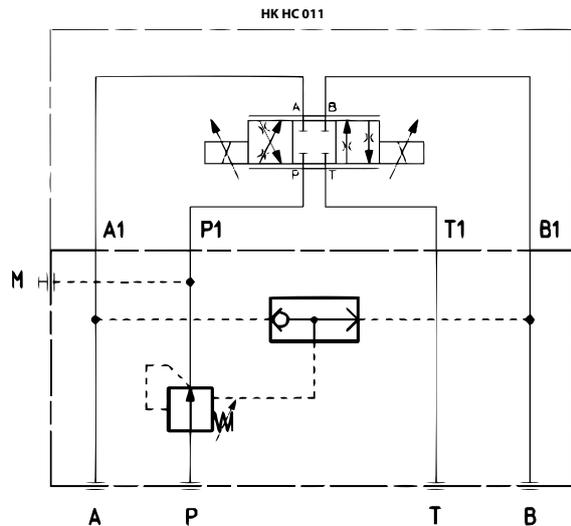

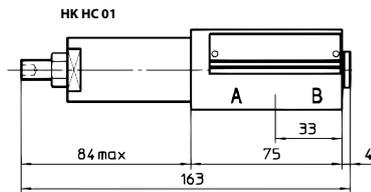

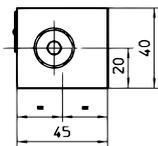

**Volumetric flow:** max. 50 l/min

**Connection:** ISO/Cetop 03 size 6

**Note:** These valves must be set according to the application.

**Ordering information:** Further sandwich body valves available on request

**HK KC 01**

**2-way pressure balance**

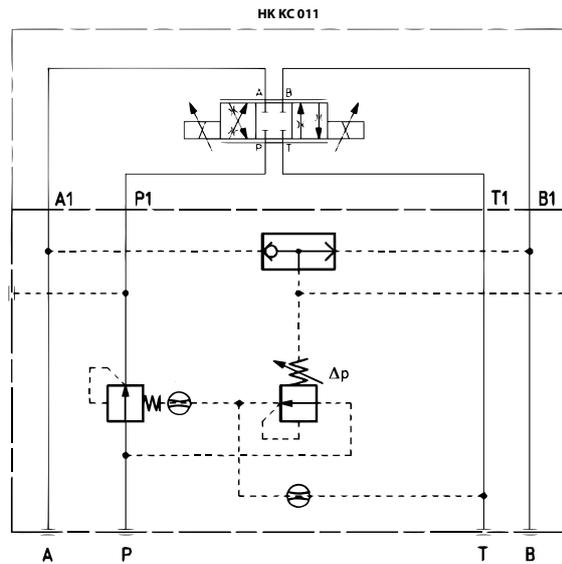

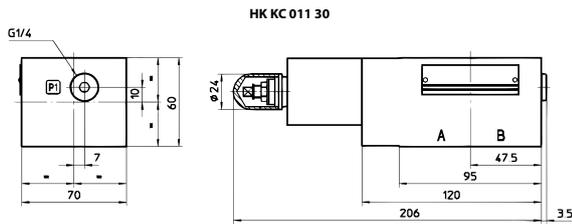

Sandwich body valve for constructing sandwich arrangements with ISO/Cetop 05 size 10 valves  
 The pressure balance maintains a constant pressure differential between connection P and connection A or B of the valve, to ensure that a constant flow rate is maintained in the event of pressure variations. The control pressure is diverted by the built-in shuttle valve.

- Design:** Sandwich body valve, pilot-controlled
- Operating pressure:** max. 350 bar
- Volumetric flow:** max. 100 l/min
- Connection:** ISO/Cetop 05 size 10

**Note:** These valves must be set according to the application.

**Ordering information:** Further sandwich body valves available on request

$\Delta p$  = min. pressure differential for control function

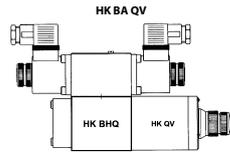

**Web:** <http://cat.hansa-flex.com/en/HKQV>

**Accessories:**

**HK BHQ** - Connection plate for flow control valve QV  
**HK BA QV** - Mounting plate for flow control valve QV  
**HK M HK QV** - Screw set for flow control valve Type HK QV  
**HK DHQ** - High speed/creep speed unit for flow control valve QV

## HK BHQ

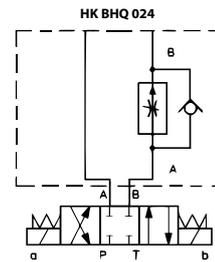

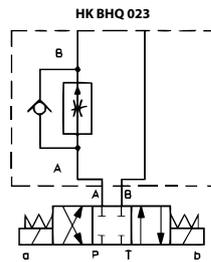

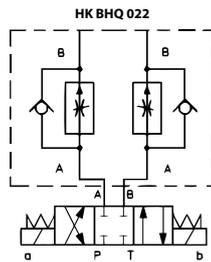

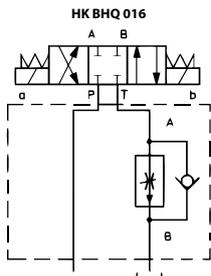

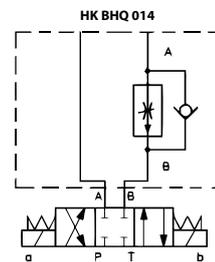

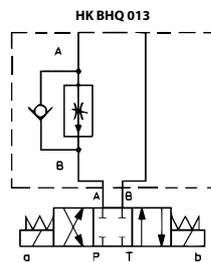

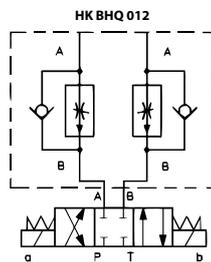

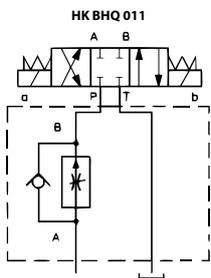

### Connection plate for flow control valve QV

The HK BHQ version permits the modular installation of HK QV 06 valves as sandwich plate with ISO/Cetop 03 hole pattern.

**Scope of supply:** incl. set of screws  
**Operating pressure:** max. 250 bar  
**Connection:** ISO/Cetop 03 size 6

Identification	acts in channel	Design	Scope of supply	Weight kg
HK BHQ 011	P	without cover plate, drilled on one side	incl. screw set (4x M5 x 70)	0,7
HK BHQ 012	A + B	without cover plate	incl. screw set (8x M5 x 70)	0,7
HK BHQ 013	A	incl. cover plate	incl. screw set (4x M5 x 70)	0,7
HK BHQ 014	B	incl. cover plate	incl. screw set (4x M5 x 70)	0,7
HK BHQ 016	T	without cover plate, drilled on one side	incl. screw set (4x M5 x 70)	0,7
HK BHQ 022	A + B	without cover plate	incl. screw set (8x M5 x 70)	0,7
HK BHQ 023	A	incl. cover plate	incl. screw set (4x M5 x 70)	0,7
HK BHQ 024	B	incl. cover plate	incl. screw set (4x M5 x 70)	0,7

**Web:** <http://cat.hansa-flex.com/en/HKBHQ>

**Accessory for following products:**

**HK QV** - Flow control valve for plate mounting Cetop

**High speed/creep speed unit for flow control valve QV**

The high speed/creep speed unit consists of sandwich body valve HK DHQ in the bypass (high speed) and flow control valve HK QV 06, which keeps the preset volumetric flow constant with pressure compensation (creep speed). Flow control (creep speed) is assured with switched solenoid  
 Max. volumetric flow via the non-return valve: 24 l/min  
 Max. free volumetric flow: 36 l/min  
 Plate height: 60 mm

**Design:** Sandwich body valve, as high speed/creep speed unit in combination with type HK QV 06 flow control valve

**Scope of supply:** with coil, 24 DC

**Operating pressure:** max. 250 bar

**Connection:** ISO/Cetop 03 size 6

**Note:** Max. controlled volumetric flow (depending on the flow control valve used):

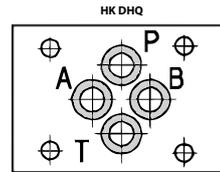

HK QV 06 1: 1.5 l/min

HK QV 06 6: 6 l/min

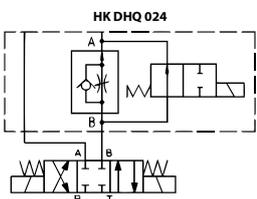

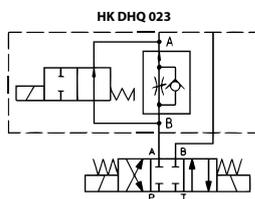

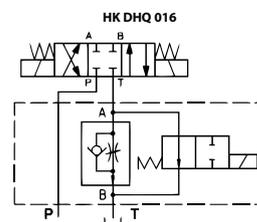

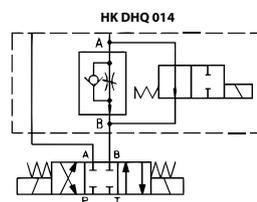

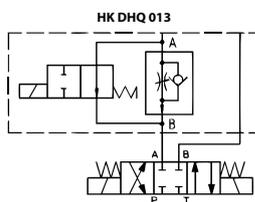

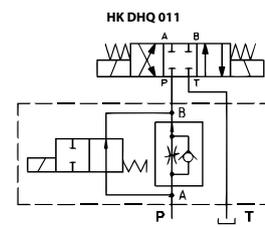

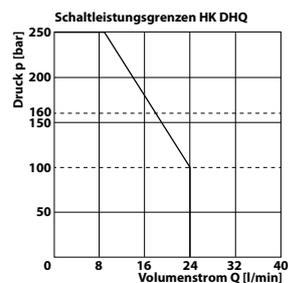

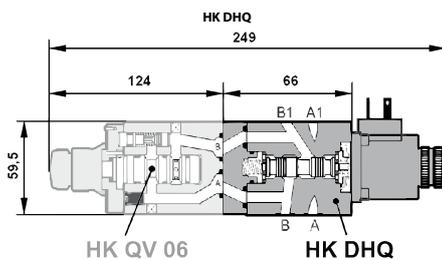

HK QV 06 11: 11 l/min

HK QV 06 16: 16 l/min

HK QV 06 24: 24 l/min

Identification	acts in channel	Design	Weight kg
HK DHQ 011 OI 24DC	P	Inlet control	2,5
HK DHQ 023 OI 24DC	A	Inlet control	2,5
HK DHQ 024 OI 24DC	B	Inlet control	2,5
HK DHQ 013 OI 24DC	A	Drain control	2,5
HK DHQ 014 OI 24DC	B	Drain control	2,5
HK DHQ 016 OI 24DC	T	Drain control	2,5

**Web:** <http://cat.hansa-flex.com/en/HKDHQ>

**Accessories:**

HK SP DIN 43650 - Electrical plug for solenoid coil DIN 43650 / ISO 4400

**Additional element for following products:**

HK QV - Flow control valve for plate mounting Cetop

## HK BA QV

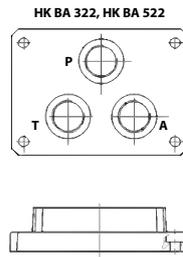

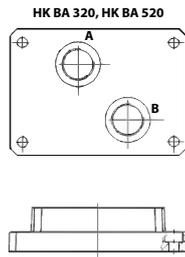

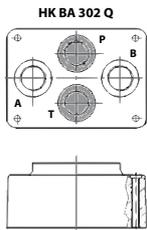

### Mounting plate for flow control valve QV

**Scope of supply:** incl. set of screws  
**Material:** Material: Steel (350 bar)  
**Connection:** ISO/Cetop 03, 06, 07

1

Identification	Connections	for valve type	Stations	Height mm	Width mm	Length mm	Scope of supply	Weight kg
HK BA 302 Q	A+B 1/2" bottom; P+T sealed	HK QV 06	Single connection	53	80	112	incl. screw set (4x M5 x 70)	1,8

**Accessory for following products:**

**HK AGRL** - Non-return valve for plate mounting Cetop P

## Pressure relief valve with SAE connector

Pilot-controlled pressure relief valve with damping plunger  
 Version with solenoid relief valve for pressure-free circulation of the pump  
 see HK REM 24

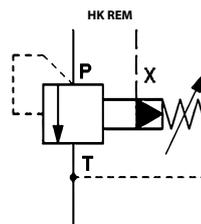

Max. volumetric flow 600 l/min

For mineral-based hydraulic oil or synthetic fluids with comparable properties

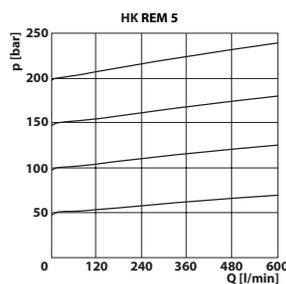

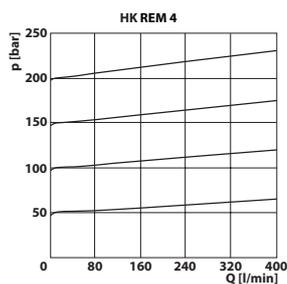

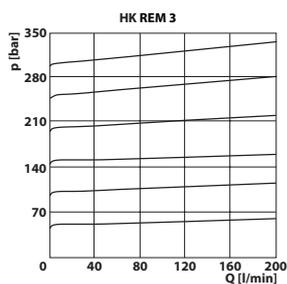

**Design:** SAE flange connector (e.g. for direct fitting to pumps)

**Scope of supply:** incl. SAE flanges and M10 screws

**Operating pressure:** max. 350 bar

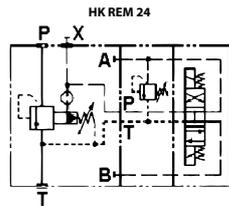

Identification	Connection	Pressure setting range min.	Pressure setting range max.	Volumetric flow max.	Weight
		bar	bar	L/min	kg
HK REM 3 350	SAE flange 3/4"	8	350	200,0	6,6
HK REM 4 210	SAE flange 1"	7	210	400,0	6,8
HK REM 5 210	SAE flange 1.1/4"	7	210	600,0	8,2

**Web:** <http://cat.hansa-flex.com/en/HKREM>

## HK REM 24

### Pressure relief valve with SAE connection and relief valve

Pilot-controlled pressure relief valve with damping plunger  
 2 pressure adjustment ranges (same min / max values)  
 Max. volumetric flow 600 l/min  
 For mineral-based hydraulic oil or synthetic fluids with comparable properties

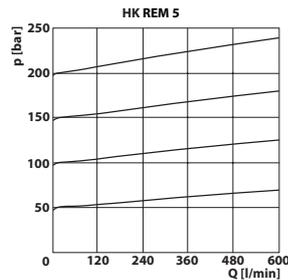

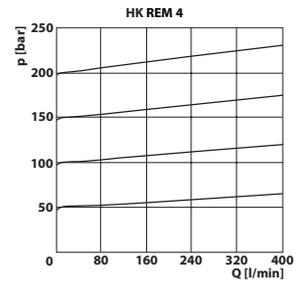

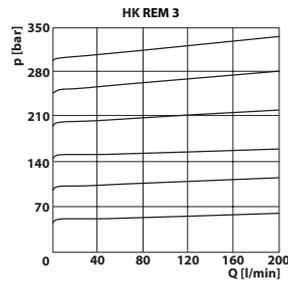

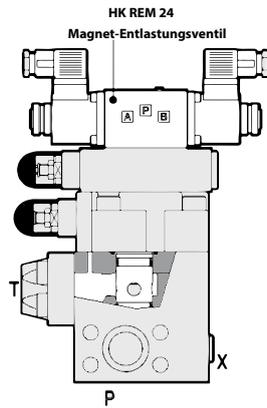

**Design:** SAE flange connector (e.g. for direct fitting to pumps), with magnetic relief valve 24 V; relief with magnet at zero current

**Scope of supply:** incl. SAE flanges and M10 screws

**Operating pressure:** max. 350 bar

**Note:** These valves must be set according to the application.

Identification	Connection	Pressure setting range		Volumetric flow max. L/min	Weight kg
		min. bar	max. bar		
HK REM 3 20 350 350 24	SAE flange 3/4"	8	350	200,0	9,2
HK REM 4 20 210 210 24	SAE flange 1"	7	210	400,0	9,2
HK REM 5 20 210 210 24	SAE flange 1.1/4"	7	210	600,0	9,2

**Web:** <http://cat.hansa-flex.com/en/HKREM24>

**Accessories:**

HK SP DIN 43650 - Electrical plug for solenoid coil DIN 43650 / ISO 4400

**HK DHZO A**

**Proportional solenoid-operated directional control valve size 6**

Without integrated position transducer (a pcb Type HK EBM AS is required for control)

Completely encapsulated solenoid coils

Response time < 30 ms

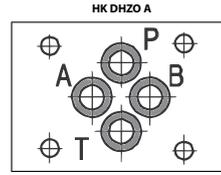

Hysteresis < 5%

**Design:** 4/2-way valve or 4/3-way valve, direct-controlled, for applications in open control loop

**Scope of supply:** with coil, without plug

**Operating pressure:** P, A, B: max. 350bar / T: max. 210bar

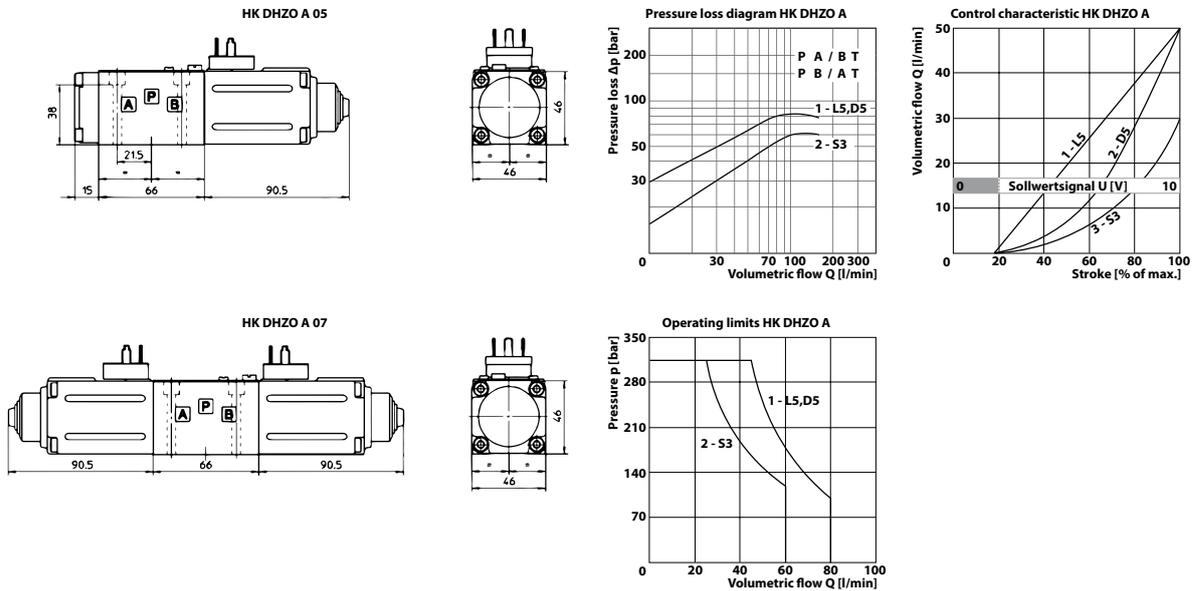

**Connection:** ISO/Cetop 03 size 6

**Ordering information:** Other designs available on request

Identification	Circuit diagram	Type	Q max. L/min	Overlap	Control	Design	Piston type	Weight kg
HK DHZO A 051 L5		4/2	50	P, A, B, T positive (closed)	linear	Spring return	L5 [A/B/P/T]-[PA/BT]	1,9
HK DHZO A 071 D5		4/3	50	P, A, B, T positive (closed)	progressive, passage A, B in ratio 2:1	Spring return	D5 [PB/AT]-[A/B/P/T]-[PA/BT]	2,6
HK DHZO A 071 S3		4/3	30	P, A, B, T positive (closed)	progressive	spring return to 0	S3 [PB/AT]-[A/B/P/T]-[PA/BT]	2,6
HK DHZO A 071 L5		4/3	50	P, A, B, T positive (closed)	linear	spring return to 0	L5 [PB/AT]-[A/B/P/T]-[PA/BT]	2,6
HK DHZO A 073 D5		4/3	50	P positive (closed); A, B, T negative (open)	progressive, passage A, B in ratio 2:1	spring return to 0	D5 [PB/AT]-[ABT/P]-[PA/BT]	2,6
HK DHZO A 073 S3		4/3	30	P positive (closed); A, B, T negative (open)	progressive	spring return to 0	S3 [PB/AT]-[ABT/P]-[PA/BT]	2,6
HK DHZO A 073 L5		4/3	50	P positive (closed); A, B, T negative (open)	linear	spring return to 0	L5 [PB/AT]-[ABT/P]-[PA/BT]	2,6

Piston type example: [A/B/PT] = [A blocked / B blocked / P+T connected] Qmax - max intake volumetric flow

**Web:** <http://cat.hansa-flex.com/en/HKDHZO A>

**Accessories:**

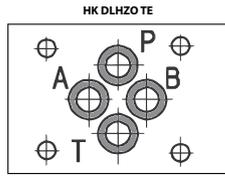

HK EBM AS - Proportional amplifier digital

HK SP DIN 43650 - Electrical plug for solenoid coil DIN 43650 / ISO 4400

HK M HK DH - Screw set for NG 6 valves type HK DH / DG4V3

**HK DLHZO TE**

**Proportional solenoid-operated directional control valve size 6**

with hardened sleeve for max. overlapping accuracy  
 Completely encapsulated solenoid coils  
 Response time < 10 ms  
 Hysteresis < 0,1%  
 Pilot signal 0-10 VDC

**Design:** 4/3-way valve, direct-controlled, for applications in closed control loop

**Scope of supply:** without plug, with integrated electronics

**Operating pressure:** P, A, B: max. 350bar / T: max. 160bar

**Volumetric flow:** max. 70 l/min (note characteristic curves)

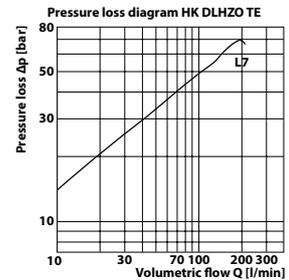

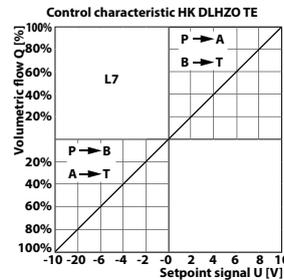

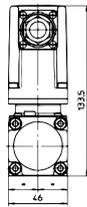

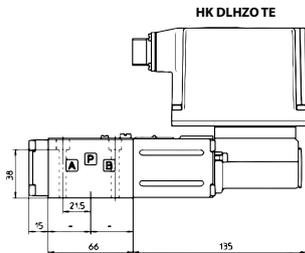

**Connection:** ISO/Cetop 03 size 6

**Note:** (\*) These 4/3-way valves are switched by only one coil. The off-center Fail-Safe position of the piston is reached by spring return after switching off the voltage.

**Ordering information:** Other designs available on request

Identification	Circuit diagram	Type	Overlap	Control	Design	Piston type	Weight kg

HK RZGO AE 033 210	A	6	210	2,5 L/min	40,0 L/min	2,7 kg

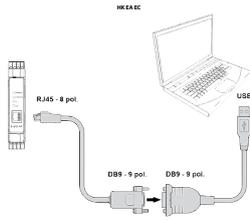

**Web:** <http://cat.hansa-flex.com/en/HKRZGOAE033>

**Accessories:**

HK SPZ - Electrical connector for proportional valves

HK M HK DH - Screw set for NG 6 valves type HK DH / DG4V3

**HK EA EC****Adapter cables**

For connecting the digital proportional amplifier HK EBM AS to the computer. Transfer rate up to 225 kbit/s. An external power supply is not necessary (done over a USB connection).

**Use:** For proportional amplifier HK EBM AS

Identification	Length m	Design	Weight kg
HK E A PS USB DB9	0,45	1x USB, 1x DB9	0,2
HK E C PS DB9 RJ45	2,50	1x DB9, 1x RJ45	0,2

**Web:** <http://cat.hansa-flex.com/en/HKEAEC>

**Accessory for following products:**

HK EBM AS - Proportional amplifier digital

Proportional amplifier digital

for single solenoid and double solenoid proportional valves without transducer  
 Power supply standard: +24 VDC rectified and filtered  
 Max. power consumption: 50 W / 100 W  
 Max. current supplied to solenoids: 2,7 A at 24 VDC / 3,3 A at 12 VDC  
 Reference input signal:  $\pm 10$  VDC /  $\pm 20$  mA  
 Mounting for DIN-rail 35x7,5

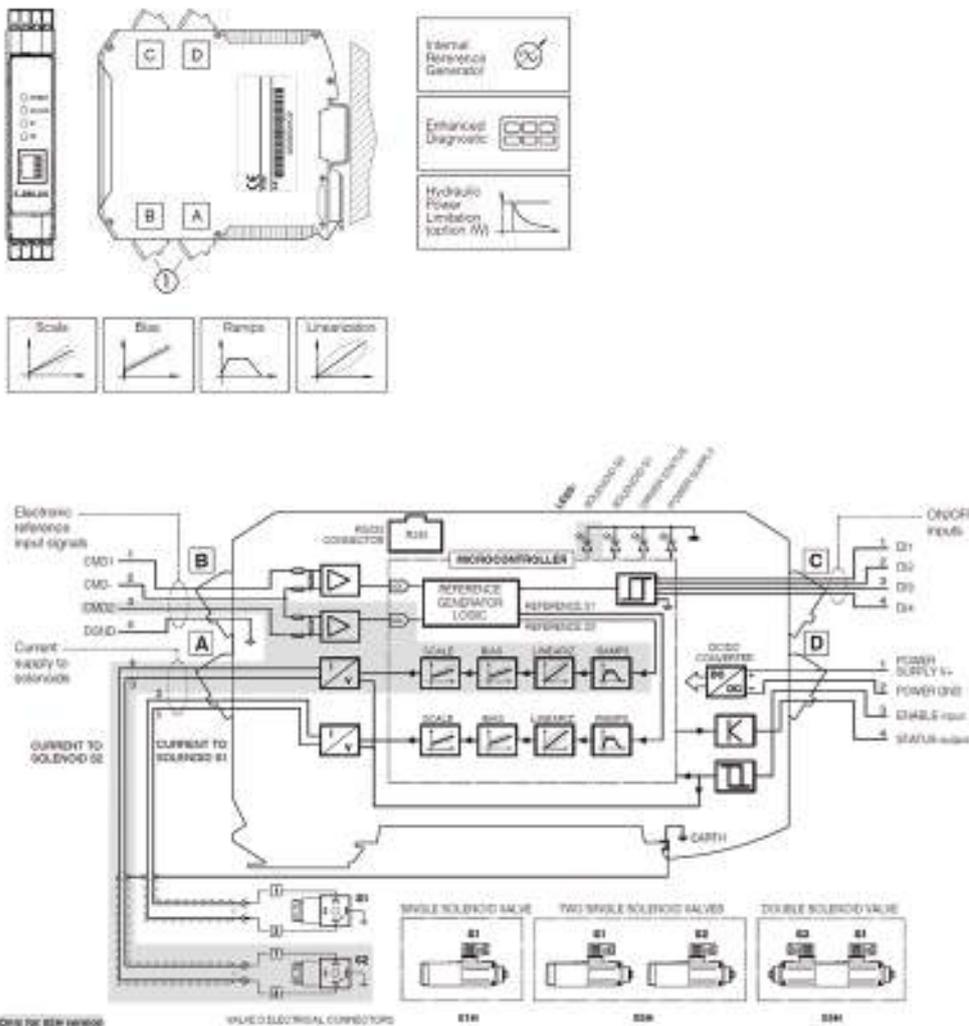

**Design:** for DIN-rail 35x7,5, 4 fast plug-in connectors, RJ45 connector for RS232 serial communication with PC software, 4 LEDs for diagnostics, Electrical protection against reverse polarity

**Operating temperature max.:** 60 °C

**Use:** for single solenoid and double solenoid proportional valves without transducer

Identification	for valve type	Weight kg
HK E BM AS PS 01H	Single solenoid for proportional valves	0,2
HK E BM AS PS 05H	Double solenoid for proportional valves	0,2

**Web:** <http://cat.hansa-flex.com/en/HKEBMAS>

**Accessory for following products:**

- HK DHZO A - Proportional solenoid-operated directional control valve size 6
- HK DKZOR A - Proportional solenoid-operated directional control valve size 10
- HK HZGO A 031 - Proportional pressure reducing valve size 6
- HK HZMO A 030 - Proportional pressure relief valve size 6
- HK KZGO A 031 - Proportional pressure reducing valve size 10
- HK RZGO A 033 - Proportional pressure reducing valve size 6
- HK RZMO A 010 - Proportional pressure relief valve size 6
- HK RZMO A 030 - Proportional pressure relief valve size 6

**Additional elements:**  
 HK EA EC - Adapter cables

**HK EMI**

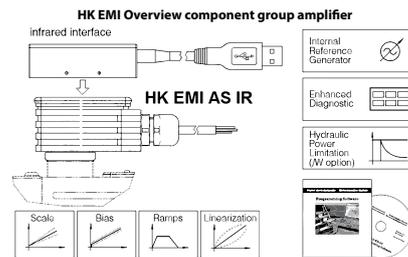

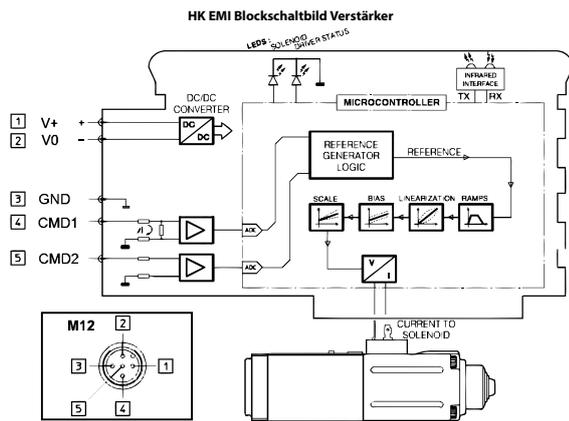

**Digital electronic driver HK EMI AS IR**

for use in open and closed control loops  
 Elektronik protected by sealed, vibration-damped housing  
 Electronic filter on inlet and outlet  
 Nominal setpoint signal preset to 0 - 10 VDC  
 Settings by USB infrared adapter (please order separately)  
**Design:** Electronic controller for proportional valves without transducer  
**Operating temperature max.:** 60 °C  
**Connection:** M12 - plug  
**Use:** for single solenoid and double solenoid proportional valves without transducer

**Note:** corresponding M12-plug HK SP ZH 5P

Identification	Weight
HK EMI AS IR 01H M12	kg 0,5

**Web:** <http://cat.hansa-flex.com/en/HKEMI>

**Additional info:** for rising and falling ramps, variable valve characteristics and dither frequency, stabilised: 24 VDC rectified and filtered (11 - 27 V), power consumption 40 W

**Accessories:**

- HK SPZ - Electrical connector for proportional valves
- HK EC PC IR USB - USB infrared adapter
- HK E SW - Software for ATOS proportional electronics

**HK EC PC IR USB**

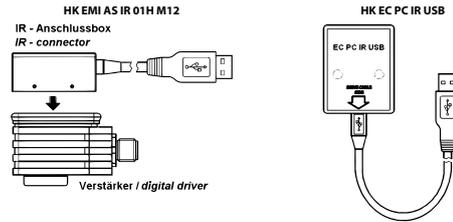

**USB infrared adapter**

For computer-aided setting of the digital electronic driver HK EMI AS IR PC connection by USB port

The adapter is plugged onto the amplifier, it is performed a direct infrared communication with the amplifier at a transmission rate of 9.6 kbit/s. An external power supply is not necessary (provided by USB connection).

**Design:** Adapter with USB port for chopper amplifier HK EMI

**Scope of supply:** Infrared adapter, USB cable 3m

Identification	Design	Weight kg
HK EC PC IR USB	Infrared adapter with USB cable 3m	0,7

**Web:** <http://cat.hansa-flex.com/en/HKECPCIRUSB>

**Accessories:**

**HK E SW** - Software for ATOS proportional electronics

**Additional element for following products:**

**HK EMI** - Digital electronic driver HK EMI AS IR

**HK E SW**

**Software for ATOS proportional electronics**

Software for all parameters of ATOS proportional controls for monitoring and handling of current settings. The graphical interface is constructed in layers, which represent different specific groups of functions and parameters.

The software automatically detects the connected valve type and adjusts the parameters displayed according to the selected access level.

System requirements: Windows XP or higher, 128MB RAM, 250MB free memory capacity, DVD-player, RS232 or USB port

Identification	Design	Weight kg
HK E SW PSN	DVD with driver, software and manual	0,2

**Web:** <http://cat.hansa-flex.com/en/HKESW>

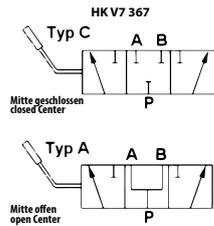

**Accessory for following products:**

**HK EMI** - Digital electronic driver HK EMI AS IR

**HK EC PC IR USB** - USB infrared adapter

**HK V7 367**

**3/3-way changeover valve**

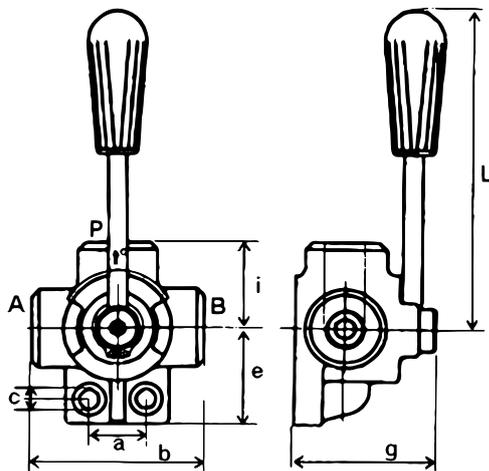

**Design:**  
**Material:**

Type A - mid-position open, Type C - mid-position closed  
Housing: cast iron, inner parts steel

**Note:** Rotary slide valves can be pressurised from all sides and are designed to have less internal leakage

## HK DFE 3

### 3/2-way directional solenoid valve for pipeline installation

These directional control valves are for switching over the oil flow  
Solenoid coil IP66

**Design:** with manual emergency operation, NBR seals

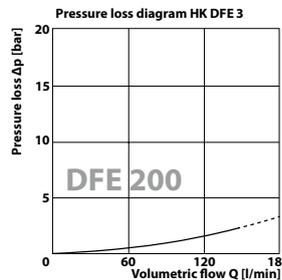

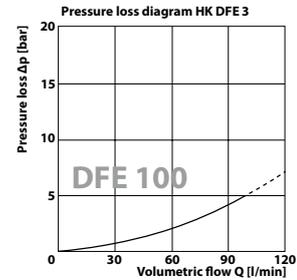

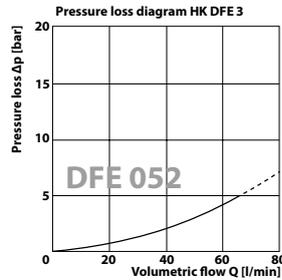

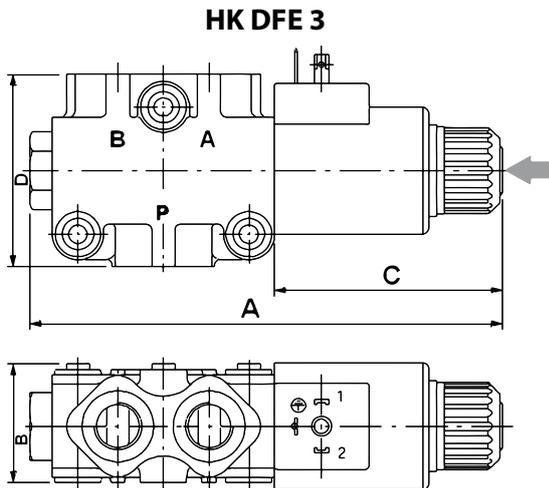

**Scope of supply:** with coil, without plug

**Operating pressure:** max. 315 bar with leak oil port / max. 200 bar without leak oil port

**Ordering information:** Other control voltages available on request

Identification	Q max. L/min	Control voltage VDC	A mm	Connection A-B-P Leak oil connection	B mm	C mm	D mm	Design	Weight kg	
HK DFE 052 3AW 12DC	60	12	166,0	G 3/8"	-	42,0	80,0	68,0	without oil return port	1,6

Qmax - max intake volumetric flow

**Web:** <http://cat.hansa-flex.com/en/HKDFE6>

**Spare parts:**

HK SP DFE - Coil for solenoid-operated directional control valve HK DFE

**Accessories:**

HK SP DIN 43650 - Electrical plug for solenoid coil DIN 43650 / ISO 4400

**HK BM40**

**Hand-operated directional control valve BM 40**

compact design  
 Integrated non-return valve and pressure relief valve 90-220bar (valve must be set)  
 spool with control notches for sensitive operation  
 Up to 7 sections possible.

**Design:** Monobloc valve for pipeline installation without hand lever (please order separately)  
**Scope of supply:** P, A, B: max. 220bar / T: max. 80bar  
**Operating pressure:** P, A, B: max. 220bar / T: max. 80bar  
**Volumetric flow:** max. 40 l/min (note characteristic curves)  
**Connection:** P + T = G 3/8"; P2 + T2 = G 1/2"; A + B = G 3/8"

**Ordering information:** Please order hand lever separately - 1 lever per section!  
 The valves are available in the stated basic version. For other possible configurations for actuators and piston types see graphic.

- Example configuration HKBM40A1L12:  
 - Valve type HKBM40  
 - Section 1 with piston type A and actuator 1  
 - Section 2 with piston type L and actuator 12

## HK BM70 AUTO

### Hand-operated directional control valve BM 70 with high-speed function

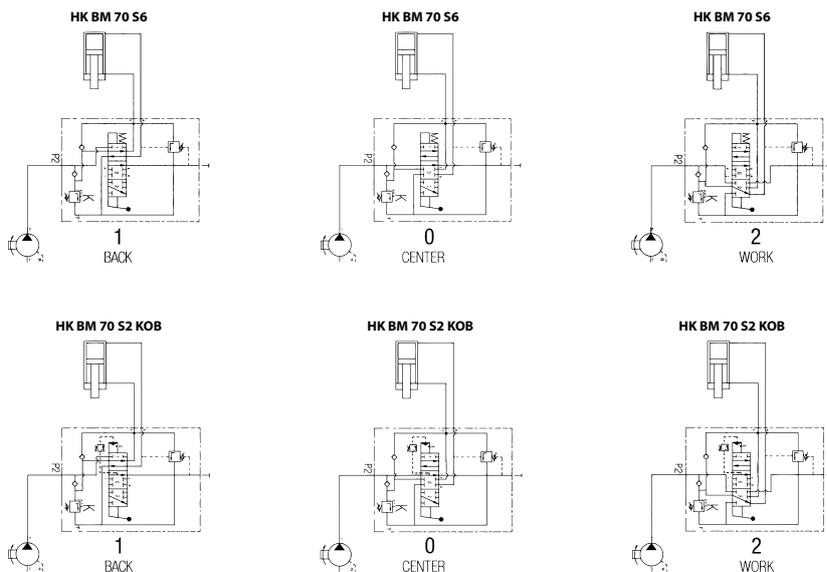

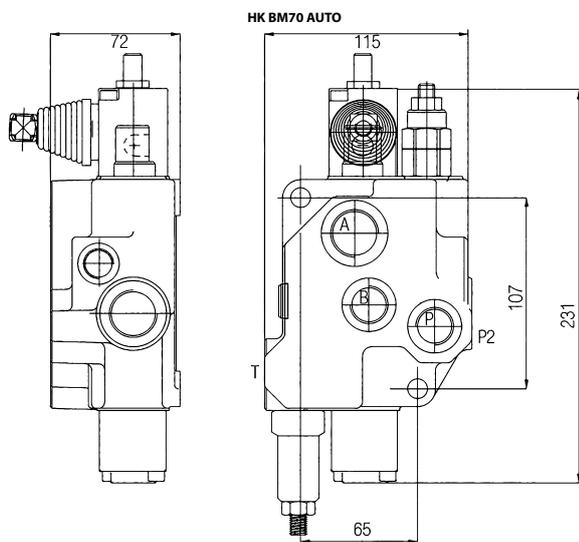

double-action with high-speed function  
compact design

**Design:** Monobloc valve for pipeline installation  
**Scope of supply:** without hand lever (please order separately)  
**Operating pressure:** P, A, B: max. 220bar / T: max. 80bar  
**Volumetric flow:** max. 70 l/min  
**Connection:** P + T = G 1/2"; P2 = G 3/4"; A + B = G 1/2"  
**Use:** especially for use in wood splitters

**Note:** Log-splitter valve with pressure-dependent switching of splitting speed for maximum splitting force. Function retract / lift with latching (mechanical end switch). With the version with the kick-out function, the valve automatically switches into the mid-setting (stop position) when it reaches the end stop while the cylinder is retracting.

**Ordering information:** Please order hand lever separately - 1 lever per section!

Identification	Design	Weight kg
HK BM70 S6 AUTO	1 Section (S6)	4,8
HK BM70 S2 KOB AUTO	1 Section (S2KOB) / Kick-Out	4,9

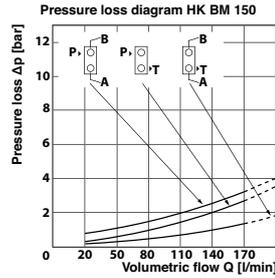

**Web:** <http://cat.hansa-flex.com/en/HKBM70AUTO>

**Accessories:**  
 HK BM HEB - Hand lever & accessories for hand-operated directl. control valve BM

**HK BM150**

**Hand-operated directional control valve BM 150**

- compact design
- Integrated non-return valve and pressure relief valve 90-220bar (valve must be set)
- spool with control notches for sensitive operation
- only possible with 1 section
- Design:** Monobloc valve for pipeline installation
- Scope of supply:** without hand lever (please order separately)
- Operating pressure:** P, A, B: max. 220bar / T: max. 80bar
- Volumetric flow:** max. 150 l/min (note characteristic curves)
- Connection:** P + T = G 3/4"; P2 + T2 = G 1"; A + B = G 3/4"

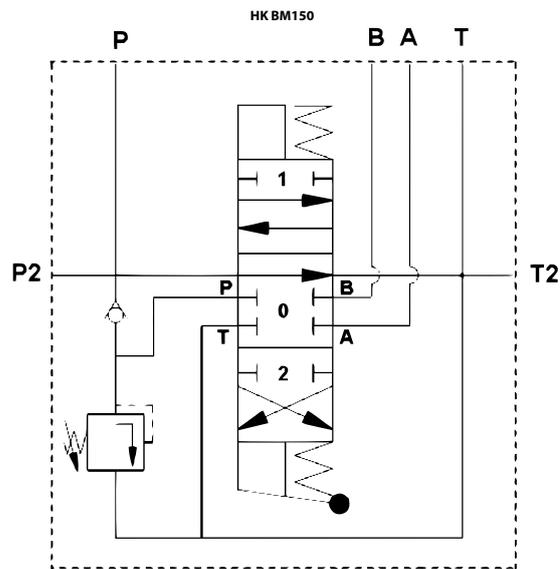

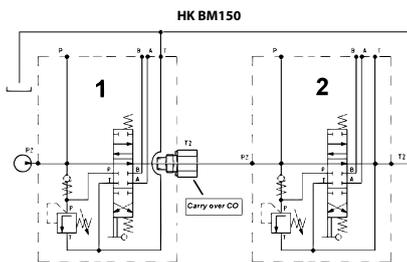

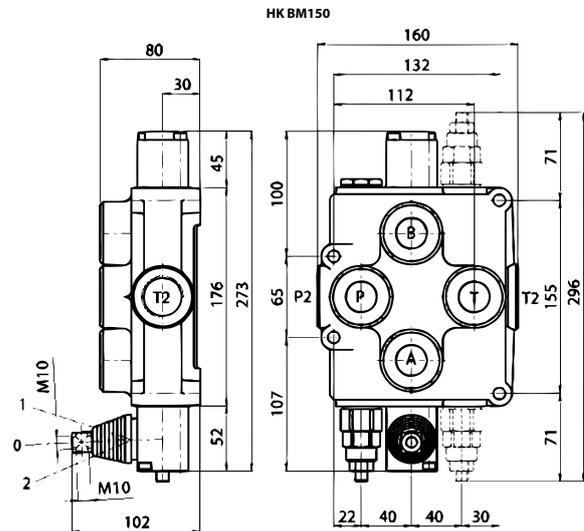

**Ordering information:** Please order hand lever separately - 1 lever per section!  
 The valves are available in the stated basic version. For other possible configurations for actuators and piston types see graphic.  
 Example configuration HKBM150A1:  
 - Valve type HKBM150  
 - Section 1 with piston type A and actuator 1

Identification	Circuit diagram	Design	Weight kg
HK BM150 A1		1 Section (A1)	8,2

- HK BM150 - Hand-operated directional control valve BM 150

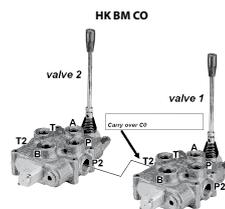

**HK BM C0**
**Pressure transmission for hand-operated directional control valve BM**

The pressure transmission is suitable for linking monobloc valves type HK BM together. In this situation, the pressure transmission on valve 1 is screwed into the oil port T2. The return flow to the tank on valve 1 must be connected to the top port T1.

If valve 1 is not actuated, another function can be controlled at full pressure and volume flow using valve 2. If valve 1 is actuated, then no pressure is available at valve 2.

**Scope of supply:** with O-ring

**Material:** Steel

**Material:** Steel with plastic wheel  
**Operating pressure:** max. 400 bar

Identification	A mm	B mm	C mm	G	Weight kg
HK FT 291-14	39	69	48	1/4" AG/IG	0,11

**Web:** <http://cat.hansa-flex.com/en/HKFT291>

## Coil for HKDH solenoid-operated valve

**Scope of supply:** with O-ring

**Corresponding connectors:** HKSP664, HKSP666, HKSP667, HKSP668, HKSP669 (rectifier plug)

**Note:** As far as AC coils are concerned, power input is considerably higher in the take-up phase than in the stopping phase.

These must therefore never be operated without a magnet core since there is a danger of overheating and the coil can burn through.

A similar effect occurs if valves with AC magnets are operated with extremely high pulse frequencies (On / Off). In such cases the coils, which are often in the vicinity of the high power input, can also overheat. For such applications the use of RC coils with rectifier plugs is recommended.

With DC coils extremely high power spikes can occur during powering down. We therefore recommend the use of plugs with protective circuits when using such coils.

Tightening torque for attaching nuts of the solenoid coils: 3Nm

Please use rectifier plug HKSP669 for solenoid coils type RC.

**Ordering information:** Other types of coil on request

**HK DFE 6** - 6/2-way directional solenoid valve for pipeline installation

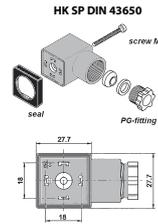

**Accessories:**

**HK SP DIN 43650** - Electrical plug for solenoid coil DIN 43650 / ISO 4400

## HK SP DIN 43650

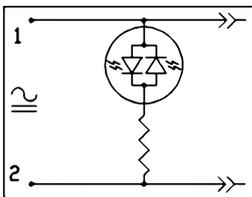

## Electrical plug for solenoid coil DIN 43650 / ISO 4400

**Design:** Plug with central screw, type A  
**Standard:** EN 175301-803 (DIN 43650) / ISO 4400  
**Operating temperature:** -40 °C to +125 °C  
**Scope of supply:** incl. seal and M3 screw  
**Material:** Housing: Polyamide, Contacts: CuZn  
**protection class:** IP 65

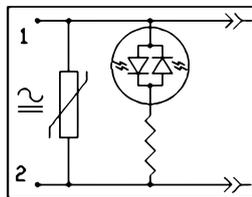

Identification	Colour	Design	Weight kg
HK SP 664	black	standard 4-pin	0,07
HK SP 664 A	grey	standard 4-pin	0,07
HK SP 666	black	standard 3-pin	0,07
HK SP 666 A	grey	standard 3-pin	0,07
HK SP 667 24	transparent	with LED for 12/24 V DC	0,07
HK SP 667 110	transparent	with LED for 110 V AC	0,07
HK SP 667 220	transparent	with LED for 230 V AC	0,07
HK SP 668 24	transparent / black	with LED 12/24 V and protective circuit	0,07
HK SP 668 24 A	transparent / grey	with LED 12/24 V and protective circuit	0,07
HK SP 669	black	with rectifier	0,07
HK SP 669 A	grey	with rectifier	0,07

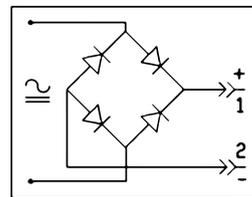

HK SP 667 24, 667 110, 667 220

HK SP 668 24, 668 24 A

HK SP 669, 669 A

**Web:** <http://cat.hansa-flex.com/en/HKSPDIN43650>

**Accessory for following products:**

**HK SP EMDV** - Coil for cartridge valve EMDV  
**HK SP 770** - Coil for cartridge valve SUN  
**HK SP DFE** - Coil for solenoid-operated directional control valve HK DFE  
**HK SP 41C** - Coil for HK41C solenoid-operated valve  
**HK SP 42C** - Coil for solenoid-operated directional control valve HK42C  
**HK SP CAE** - Coil for solenoid-operated directional control valve HK DKE  
**HK SP CO** - Coil for HKDH solenoid-operated valve

## HK SPZ

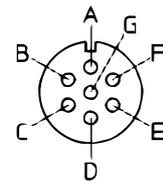

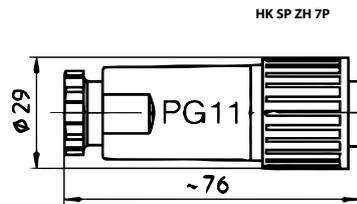

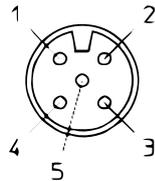

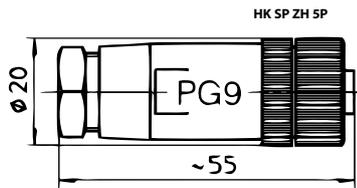

### Electrical connector for proportional valves

**Design:** Straight connector with screw connection  
**Operating temperature:** -40 °C to +85 °C  
**Material:** Housing: Polyamide, Contacts: CuZn  
**protection class:** IP 67

1

Identification	Colour	Design	Weight kg
HK SPZ H5 P	black	M12, IEC60947, 5-pole, for proportional valves with digital electronic driver HK EMI AS IR	0,15
HK SPZ H7 P	black	DIN43563, 7-polig, for proportional valves integrated electronics	0,10

**Web:** <http://cat.hansa-flex.com/en/HKSPZ>

**Accessory for following products:**

- HK DLHZO TE - Proportional solenoid-operated directional control valve size 6
- HK DLKZOR TE - Proportional solenoid-operated directional control valve size 10
- HK RZMO AE 030 - Proportional pressure relief valve size 6
- HK RZGO AE 033 - Proportional pressure reducing valve size 6

## HK M HK DH

## Screw set for NG 6 valves type HK DH / DG4V3

**Design:** Hexagon socket screw  
**Standard:** DIN 912-12.9

Identification	for valve type	Tightening torque		Scope of supply	Weight kg
		N-m			
HK M5 30	1 directional control valve	8,3			0,03
HK M5 70	1 directional control valve + 1 sandwich body valve	8,3			0,06
HK M5 110	1 directional control valve + 2 sandwich body valves	8,3			0,09
HK M5 150	1 directional control valve + 3 sandwich body valves	8,3			0,11

**Web:** <http://cat.hansa-flex.com/en/HKMHKDH>

**Accessory for following products:**

HK DH01 - Hand-operated directional control valve NG6  
 HK DH04/05 - Directional control valve NG6, hydraulically controlled  
 HK DH08/09 - Directional control valve NG6, pneumatically controlled  
 HK DHA - Solenoid-operated directional control valve size 6, Ex-protected  
 HK DHE X 00 DC - Solenoid-operated directional control valve size 6 without coil  
 HK DHE X 00 AC - Solenoid-operated directional control valve size 6 without coil  
 HK DHQ - High speed/creep speed unit for flow control valve QV  
 HK DHZO A - Proportional solenoid-operated directional control valve size 6  
 HK DLO - Poppet valve NG6  
 HK DLHZO TE - Proportional solenoid-operated directional control valve size 6  
 HK DG4V3 - Solenoid-operated directional control valve NG6

## HK M HK DK

## Set of bolts for NG 10 valves types HK DK11/DKE/DG4V5

**Design:** Hexagon socket screw  
**Standard:** DIN 912-12.9

Identification	for valve type	Tightening torque		Scope of supply	Weight kg
		N-m			
HK M6 40	1 directional control valve	14,0			0,06
HK M6 90	1 directional control valve + 1 sandwich body valve	14,0			0,10
HK M6 140	1 directional control valve + 2 sandwich body valves	14,0			0,12
HK M6 190	1 directional control valve + 3 sandwich body valves	14,0			0,20

**Web:** <http://cat.hansa-flex.com/en/HKMHKDK>

**Accessory for following products:**

HK DK11 - Hand-operated directional control valve NG10  
 HK DKE X 00 DC - Solenoid-operated directional control valve size 10 without coil  
 HK DKE X 00 AC - Solenoid-operated directional control valve size 10 without coil  
 HK DKZOR A - Proportional solenoid-operated directional control valve size 10  
 HK DLKZOR TE - Proportional solenoid-operated directional control valve size 10  
 HK DG4V5 - Solenoid-operated directional control valve NG10

**HK M HK DPH 2**

## Set of bolts for NG16 valves type HK DPH 2

**Design:** Hexagon socket screw  
**Standard:** DIN 912-12.9

Identification	for valve type	Tightening torque	Scope of supply	Weight
		N-m		kg
HK M5 30	1 directional control valve/1 pilot valve NG6 on directional control valve	8,3		0,03
HK M6 40	1 directional control valve NG16	14,0		0,06
HK M10 50	1 directional control valve NG16	63,0		0,15
HK M6 100	1-way directional control valve + 1 sandwich body valve NG 16 (plate height 60 mm)	14,0		0,10
HK M10 110	1-way directional control valve + 1 sandwich body valve NG 16 (plate height 60 mm)	63,0		0,30
HK M6 80 2	1-way directional control valve + 1 sandwich body valve NG 16 (plate height 40 mm)	14,0		0,10
HK M 10 90	1-way directional control valve + 1 sandwich body valve NG 16 (plate height 40 mm)	63,0		0,20

**Web:** <http://cat.hansa-flex.com/en/HKMHKDPH2>

**Accessory for following products:**

HK DPH 2 - Directional control valve NG16

**HK M HK DPH 4**

## Set of bolts for NG25 valves type HK DPH 4

**Design:** Hexagon socket screw  
**Standard:** DIN 912-12.9

Identification	for valve type	Tightening torque	Scope of supply	Weight
		N-m		kg
HK M5 30	1 directional control valve/1 pilot valve NG6 on directional control valve	8,3		0,03
HK M12 50	1 directional control valve NG25	120,0		0,03
HK M12 130	1-way directional control valve + 1 sandwich body valve NG 25 (plate height 80 mm)	120,0		0,50
HK M12 100 6	1-way directional control valve + 1 sandwich body valve NG 25 (plate height 50 mm)	120,0		0,30

**Web:** <http://cat.hansa-flex.com/en/HKMHKDPH4>

**Accessory for following products:**

HK DPH 4 - Directional control valve NG25

## HK M HK 41 C

## Set of bolts for NG6 valves type HK 41 C

**Design:** Hexagon socket screw  
**Standard:** DIN 912-12.9

Identification	for valve type	Tightening torque		Scope of supply	Weight kg
			N-m		
HK M5 30	1 directional control valve		8,3		0,03
HK M5 60	1 directional control valve + 1 sandwich body valve (ZRV)		8,3		0,05
HK M5 70	1 directional control valve + 1 sandwich body valve		8,3		0,06
HK M5 80	1 directional control valve + 1 sandwich body valve (ZRV-AB)		8,3		0,07
HK M5 100	1 directional control valve + 2 sandwich body valves (with 1 x ZRV)		8,3		0,08
HK M5 110	1 directional control valve + 2 sandwich body valves		8,3		0,09
HK M5 120	1 directional control valve + 2 sandwich body valves (with 1 x ZRE-AB)		8,3		0,09
HK M5 140	1 directional control valve + 3 sandwich body valves (with 1 x ZRV)		8,3		0,10
HK M5 150	1 directional control valve + 3 sandwich body valves		8,3		0,11
HK M5 160	1 directional control valve + 3 sandwich body valves (with 1 x ZRE-AB)		8,3		0,12

**Web:** <http://cat.hansa-flex.com/en/HKMHK41C>

**Accessory for following products:**

**HK 41 C1** - Hand-operated directional control valve NG6

**HK 41 C1 (7/G/Q/R)** - Solenoid-operated directional control valve NG6

## HK M HK 42 C

## Set of bolts for NG10 valves type HK 42 C

**Design:** Hexagon socket screw  
**Standard:** DIN 912-12.9

Identification	for valve type	Tightening torque		Scope of supply	Weight kg
			N-m		
HK M6 40	1 directional control valve		14,0		0,06
HK M6 75	1 directional control valve + 1 sandwich body valve (ZRV)		14,0		0,08
HK M6 90	1 directional control valve + 1 sandwich body valve		14,0		0,10
HK M6 125	1 directional control valve + 2 sandwich body valves (with 1 x ZRV)		14,0		0,11
HK M6 140	1 directional control valve + 2 sandwich body valves		14,0		0,12
HK M6 175	1 directional control valve + 3 sandwich body valves (with 1 x ZRV)		14,0		0,16
HK M6 190	1 directional control valve + 3 sandwich body valves		14,0		0,20

**Web:** <http://cat.hansa-flex.com/en/HKMHK42C>

**Accessory for following products:**

**HK 42 C1 (7/G/Q/R)** - Solenoid-operated directional control valve NG10

**HK M HK AGRL****Screw kit for non-return valve Type HK AGRL**

**Design:** Hexagon socket screw  
**Standard:** DIN 912-12.9

Identification	for valve type	Tightening torque	Scope of supply	Weight kg
		N-m		
HK M10 45	1 HK AGRL 10 / 20 on sub-base	63,0		0,12
HK M10 1006	1 HK AGRL 32 on sub-base	63,0		0,17

**Web:** <http://cat.hansa-flex.com/en/HKMHKAGRL>

**Accessory for following products:**

**HK AGRL** - Non-return valve for plate mounting Cetop P

**HK M HK QV****Screw set for flow control valve Type HK QV**

**Design:** Hexagon socket screw  
**Standard:** DIN 912-12.9

Identification	for valve type	Tightening torque	Scope of supply	Weight kg
		N-m		
HK M5 70	1 HK QV 06 on sub-base or sandwich body HK BHQ	8,3		0,06
HK M8 80	1 HK QV 10 on sub-base	35,0		0,12
HK M10 80	1 HK QV 20 on sub-base	63,0		0,19

**Web:** <http://cat.hansa-flex.com/en/HKMHKQV>

**Accessory for following products:**

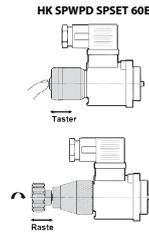

**HK QV** - Flow control valve for plate mounting Cetop

**HK BHQ** - Connection plate for flow control valve QV

## HK SP WPD / SP SET / 6 OE

## Emergency hand operation for directional solenoid valve

**Design:** as snapper or push button  
**Material:** Plastic / steel  
**Use:** for manual emergency operation of solenoid valves

Identification	for valve type	Design	Weight kg
HK SP WPD H Q30	HK DHI	locking	0,1
HK SP SET 6DH 103500	HK DHI	Pushbutton	0,1
HK SP WPD HS	HK DHE DC	locking	0,1
HK 6 OE 101500	HK DHE DC	Pushbutton	0,1
HK SP SET 15AE 101500	HK DKE DC	Pushbutton	0,1
HK SP WPD KE DC	HK DKE DC	locking	0,3
HK SP SET 15AE 102500		Pushbutton	0,1
HK 6 OE 102500	HK DHE AC	Pushbutton	0,1

**Web:** <http://cat.hansa-flex.com/en/HKSPWPDSPSET6OE>

**Accessory for following products:**

**HK DHE X 00 DC** - Solenoid-operated directional control valve size 6 without coil  
**HK DHE X 00 AC** - Solenoid-operated directional control valve size 6 without coil  
**HK DKE X 00 AC** - Solenoid-operated directional control valve size 10 without coil  
**HK DKE X 00 DC** - Solenoid-operated directional control valve size 10 without coil

## HK UEB MUT

## Cap nut for solenoid-operated directional control valve

**Note:** Tightening torque for attaching nuts of the solenoid coils: 3Nm

Identification	for valve type	Weight kg
HK SPSET 6OE 101116	HK DHE DC	0,03
HK SPSET 15AE 101116	HK DKE DC	0,05
HK 4D01 AC MUTTER	HK 41 with AC coil	0,05
HK 4D01 DC MUTTER	HK 41 with DC coil	0,05

**Web:** <http://cat.hansa-flex.com/en/HKUEBMUT>

**HK HR SUN****Hand wheel for cartridge valve SUN**

For applications on SUN cartridge valves with frequent adjustments

**Scope of supply:** Handwheel and locking nut

**Material:** Plastic / steel

Identification	Thread	Weight kg
HK HR SUN	3/8" UNF IG	0,1

**Web:** <http://cat.hansa-flex.com/en/HKHRSUN>

**Accessory for following products:**

HK CB L - Overcentre valve CB

HK CK XCN - Non-return valve CK

HK FD - 2-way directional control valve FD

HK RD - Pressure relief valve RD

HK RP - Pressure relief valve RP

## Bladder accumulator

**Design:** Vertical installation position, gas side top  
**Operating pressure:** max. 350 bar  
**Temp. range:** Standard version -15 °C to +80 °C  
**Material:** Bladder: NBR standard version

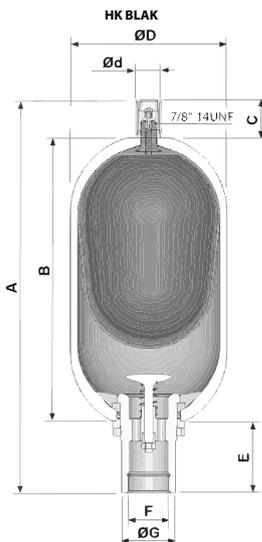

**Note:** Gas charge pressure  $p_0$  – between  $0.9 p_1$  and  $0.25 p_2$  ( $p_1$  = min. system pressure,  $p_2$  = max. system pressure)  
 CE label for all bladder accumulators  
 Repair kits, see HK BLAK REPKIT

**Ordering information:** The accumulators will be delivered uncharged from stock. N2-chargings according to customer requirements arise separate costs.

Identification	Gas volume l	p max. bar	A	B	C	Ø D	Ø d	E	F	Ø G	Weight kg

pmax = max. working pressure

**Web:** <http://cat.hansa-flex.com/en/HKBLAK>

**Spare parts:**

HK BLAK REPKIT - Repair kit for bladder accumulator

**Accessories:**

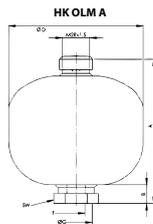

HK SAB M - Safety and isolation block with manual relief

HK CD - Accumulator clamp

HK CE - Accumulator clamp

HK KONS - Console for bladder accumulators

HK AS - Accumulator adapters for safety and isolation block

**HK OLM A****Diaphragm accumulator, connection A**

**Connections:** Oil side type A - female thread  
**Design:** Vertical installation position, gas side top  
**Operating pressure:** max. 350 bar  
**Temp. range:** Typ 1: -10 °C to +80 °C, Typ 2: -30 °C to +110 °C  
**Material:** Diaphragm: NBR standard version

**Note:** Betriebsdruck 100 bis 350 bar, min. Betriebsdruck muss 10 % über Gasfülldruck liegen, max. Gasfülldruck 130 bar  
 CE mark for diaphragm accumulators >1.0 l gas volume

**Ordering information:** The accumulators will be delivered uncharged from stock. N2-chargings according to customer requirements arise separate costs.

## HK SAB M

### Safety and isolation block with manual relief

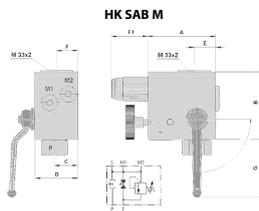

The safety and isolation block is used to protect, shut off and discharge hydraulic accumulators. It is designed and manufactured in accordance with Directive 97/23/EC (PED), Article 3 Para. 3 and takes into account the European safety regulations for the operation of hydraulic accumulators. Discharging the accumulator is done manually at a ball valve or a relief valve.

Viscosity of the fluids must lie within the following limits:  
min. 10 mm<sup>2</sup>/s, max. 380 mm<sup>2</sup>/s

**Design:** Safety valve  
**Operating pressure:** max. 350 bar  
**Additional feature:** with TÜV certification  
**Material:** Gasket: NBR  
**Connection:** for accumulator M33x2

**Note:** Safety valve is preset; observe the maximum pressure when allocating to the corresponding accumulator!

## HK VGU

## VGU tester and charging unit

The precharge pressure of hydraulic accumulators can be checked, reduced and increased. Fits on all bladder accumulators and diaphragm accumulators with M28 x 1.5 charging port.

**Scope of supply:** Tester and charging unit with 2 pressure gauges (0-25 bar / 0-250 bar) and connection M28x1.5, Protective case, Connection adapter 7/8" long, Connection adapter 5/8", High-pressure hose 2.5 m long, Allen key size 6, Replacement seals, Operating manual

**Note:** Caution! Use only technical nitrogen for charging, never oxygen or air!  
Risk of explosions!

Identification	Weight
HK VGU BSD 25 250	kg 2,50

**Accessory for following products:**

HK BSK - BSK hydraulic tank (with cleaning hatch)

**HK BSK RD**
**Cleaning hatch cover for steel tank, Type BSK**

Servicing cover for steel tank type BSK (from size 63) with HANSA-FLEX logo

**Design:** Pitch circle diameter 324 mm, incl. seal

**Material:** Cast iron, Aluminium

**Identification**

HK BSK RD 324 HF

**Weight**

kg  
1,30

**Web:** <http://cat.hansa-flex.com/en/HKBSKRD>

**Spare part for following products:**

**HK BSK** - BSK hydraulic tank (with cleaning hatch)

**FI BL GP**
**Tank venting filters**

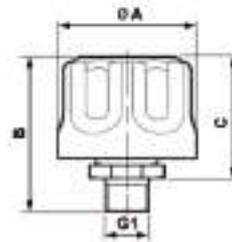

**Design:** Screw-in version, Typ FI BL 080 SS with antisurge baffle

**Temp. min.:** -30 °C

**Temp. max.:** 100 °C

**Material:** Housing: Polyamide

**Filter material:** organisch

## HK EH 1460

### Screw-in tubular heaters

For horizontal installation under the oil surface  
 Surface load 1.5 W/cm<sup>2</sup> for hydraulic oils  
 Glossy galvanised steel cover

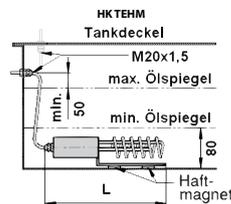

**Design:** with or without temperature controller  
**Connection:** G 1 1/2"  
**Use:** for preheating of hydraulic oil

Identification	Heating capacity		Immersion depth	Protection class	Voltage	Temp. control	Weight
	W	mm					
HK EH 1460 650 TA 3X4	1460	650		IP 54	3 x 400 V	external	1,9
HK EH 1460 650 3X4	1460	650		IP 65	3 x 400 V	without	1,7

**Web:** <http://cat.hansa-flex.com/en/HKEH1460>

## HK TEHM

### Built-in heating with fixing magnets

For horizontal or vertical installation below the oil surface  
 Simple retrofitting in existing tanks, no draining of the oil necessary  
 Switching precision  $\pm 3\%$   
 Surface load 1.2 W/cm<sup>2</sup> for hydraulic oils

**Design:** internal temperature controller (preset at 20°C)  
**Scope of supply:** incl. connection cable 3-pole and cable entry M20x1.5  
**Use:** for preheating of hydraulic oil

Identification	Heating capacity		Immersion depth	L	Voltage	Weight
	W	mm				
HK TEHM 1000	1000	1000		380	230 V	1,65

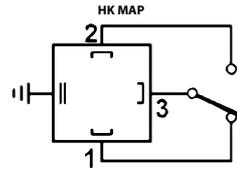

**Web:** <http://cat.hansa-flex.com/en/HKTEHM>

## MAP pressure switch

## Piston pressure switch

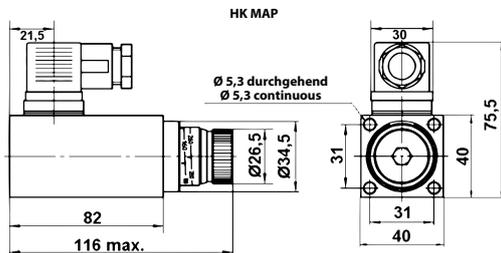

Repetition accuracy less than or equal to 1% of set value  
 Electric switching rate min. 1 million operating cycles  
 Switching hysteresis approx. 2.5 to 10%, depending on pressure range  
 Setting via scale  
 Universal connection possibilities by separate adapters/connection plates

**Design:** changeover contact  
**Operating pressure:** max. 630 bar  
**Connection:** 4-hole Flange 31x31 mm  
**Current consumption:** max. 2 A at 250 VAC; max. 3 A at 30 VDC  
**Material:** Steel  
**Scope of supply:** complete with plug, incl. set of screws  
**protection class:** IP 65

**Ordering information:** Please order adapters and mounting plates separately!

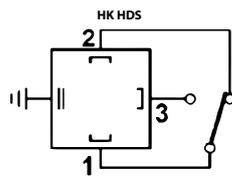

Identification	Pressure setting range min.		Pressure setting range max.		Weight kg
	bar		bar		
HK MAP 040	5		40		0,5
HK MAP 080	4		80		0,5
HK MAP 160	8		160		0,5
HK MAP 320	40		320		0,5
HK MAP 630	50		630		0,5

**Web:** <http://cat.hansa-flex.com/en/HKMAP>

**Accessories:**

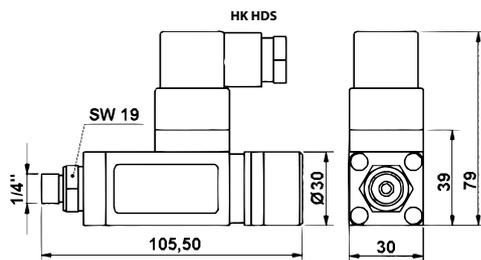

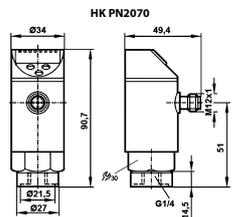

HK BFM - BFM adapter for MAP pressure switch  
 HK BHF AG - BHF AG adapter for MAP pressure switch  
 HK BHF IG - BHF IG adapter for MAP pressure switch  
 HK BHM - BHM mounting plate for MAP pressure switch  
 HK BKM - BKM mounting plate for MAP pressure switch  
 HK BMM - BMM adapter for MAP pressure switch

**HK HDS**
**HDS pressure switches**

**Piston pressure switch**

Switch-back difference 8-30 bar

**Design:** changeover contact  
**Operating pressure:** max. 350 bar  
**Connection:** G 1/4" male, rotatable  
**Current consumption:** max. 4 A at 250 VAC / 28VDC  
**Material:** Steel  
**Scope of supply:** complete with plug  
**protection class:** IP 65

Identification	Pressure setting range min.		Pressure setting range max.		Weight kg
	bar		bar		
HK HDS 1 120 K71	10		120		0,3

**Web:** <http://cat.hansa-flex.com/en/HKHDS>
**HK PN2070**
**Pressure sensor controller PN2070**

Compact unit comprising pressure switch, pressure sensor and LED indicator  
 2-color display red / green for visualizing the process status  
 3-key operation according to VDMA Standard  
 Output: 2x PNP (freely programmable, NC/NO, window/hysteresis)  
 1 output can be set as an analogue output (0-10 V / 4-20 mA, scalable 1:4)  
 IO-link interface  
 Accuracy  $\pm 0.5\%$  of range limit value  
 Min./max. value memory

**Operating temperature max.:** 80 °C  
**Connection:** G 1/4" female, rotatable  
**Operating voltage:** 24 V DC  
**Electrical connection:** Round plug connector M 12 x 1, 4-pol.  
**Material:** Housing: Stainless steel V2A, Parts in contact with media: Stainless steel V2A  
**Scope of supply:** without plug  
**protection class:** IP 65

Identification	Measuring range	Weight
		kg
HK PN2070 PN400 SER	0 to 400 bar	0,3

**Web:** <http://cat.hansa-flex.com/en/HKPN2070>
**Accessories:**

HK DSR 4POL - M12 4-pin angle plug with cable

## HK PT77

## Pressure sensor regulator PT77

Compact unit comprising pressure switch, pressure sensor and LED indicator

Housing can be rotated to 270°

Output: 2x PNP (freely programmable, NC/NO, window/hysteresis)

Without analog output

Accuracy  $\pm 0.5\%$  of range limit value

Min./max. value memory

**Design:** suitable for DIN rail mounting 35x7.5

**Operating temperature max.:** 70 °C

**Connection:** G 1/4" male, rotatable

**Operating voltage:** 24 V DC

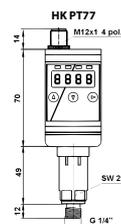

**Electrical connection:** Round plug connector M 12 x 1, 4-pol.

**Material:** Housing: Plastic, Parts in contact with media:

Stainless steel V2A, Gasket: NBR

**Scope of supply:** without plug

**protection class:** IP 65

**Ordering information:** Order M12 plug with cable separately

Identification	Measuring range	Weight kg
HK PT77 1 250 2S	0 to 250 bar	0,5
HK PT77 1 600 2S	0 to 600 bar	0,5

**Web:** <http://cat.hansa-flex.com/en/HKPT77>

**Accessories:**

HK DSR 4POL - M12 4-pin angle plug with cable

## HK DSR

## Pressure sensor controller DSR

Compact unit comprising pressure switch, pressure sensor and LED indicator

Housing can be rotated to 290°

Output: 2x PNP (freely programmable, NC/NO, window/hysteresis)

Without analog output

Accuracy  $\pm 0.5\%$  of range limit value

Min./max. value memory

**Operating temperature max.:** 85 °C

**Connection:** G 1/4" male, rotatable

**Operating voltage:** 24 V DC

**Electrical connection:** Round plug connector M 12 x 1, 4-pol.

**Material:** Housing: Zinc die cast, Parts in contact with media: Stainless steel V2A, Gas-

ket: NBR

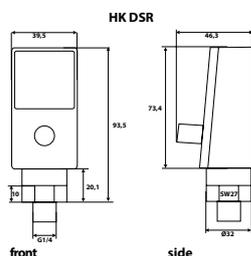

**Scope of supply:** without plug

**protection class:** IP 67

**Ordering information:** Order M12 plug with cable separately

Identification	Measuring range	Weight kg
HK DSR 400 04 17	0 to 400 bar	0,3

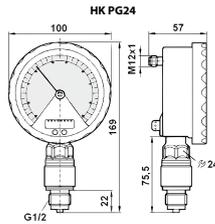

**Web:** <http://cat.hansa-flex.com/en/HKDSR>

**Accessories:**

HK DSR 4POL - M12 4-pin angle plug with cable

## HK PG24

### Pressure sensor with analogue and digital display

Electronic pressure sensor with analogue and 4-digit digital display  
 Housing can be rotated to 350°  
 1x switch output (can be programmed as NO or NC contact)  
 1x analogue output 4 to 20/20 to 4 mA  
 Switching point adjustment range 2 - 400 bar (in increments of 1 bar)  
 Accuracy ±0.6 % of range limit value  
**Operating temperature max.:** 80 °C  
**Connection:** G 1/4" male, rotatable  
**Operating voltage:** 24 V DC  
**Electrical connection:** Round plug connector M 12 x 1, 4-pol.  
**Current consumption:** < 70 mA at 24 V  
**Material:** Stainless steel housing, Parts in contact with media: Stainless steel V2A, Gasket: NBR without plug  
**Scope of supply:** protection class: IP 67

**Note:** Indicator is not visible when the power is disconnected

**Ordering information:** Order M12 plug with cable separately

Identification	Measuring range	Weight kg
HK PG24 50 G12 400	0 to 400 bar	0,6

**Web:** <http://cat.hansa-flex.com/en/HKPG24>

**Accessories:**

HK DSR 4POL - M12 4-pin angle plug with cable

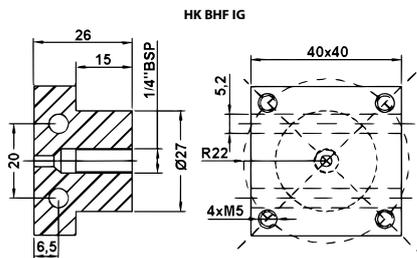

## HK BHF IG

### BHF IG adapter for MAP pressure switch

**Connection:** G 1/4" female thread  
**Material:** Steel  
**Use:** for mounting of pressure switches with mit 4-hole Flange 31x31 mm

Identification	Weight kg
HK BHF IG 14	0,35

**Web:** <http://cat.hansa-flex.com/en/HKBHF IG>

**Accessory for following products:**

HK MAP - MAP pressure switch

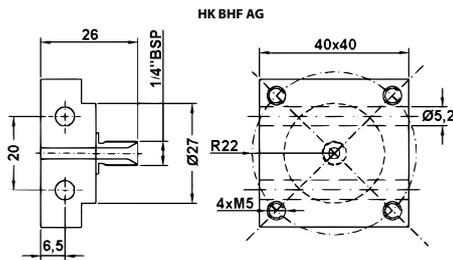

**HK BHF AG**

**BHF AG adapter for MAP pressure switch**

**Connection:** G 1/4" male thread  
**Material:** Steel  
**Use:** for mounting of pressure switches with mit 4-hole Flange 31x31 mm

Identification	Weight kg
HK BHF AG 14	0,35

**Web:** <http://cat.hansa-flex.com/en/HKBHFAG>

**Accessory for following products:**  
 HK MAP - MAP pressure switch

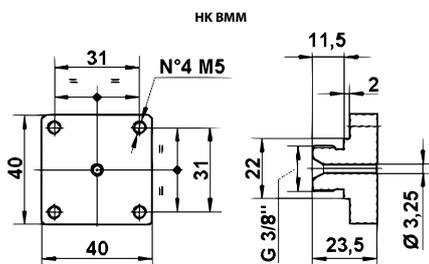

**HK BMM**

**BMM adapter for MAP pressure switch**

**Connection:** G 3/8" male thread  
**Material:** Steel  
**Use:** for mounting of pressure switches with mit 4-hole Flange 31x31 mm

Identification	Weight kg
HK BMM 10	0,3

**Web:** <http://cat.hansa-flex.com/en/HKBMM>

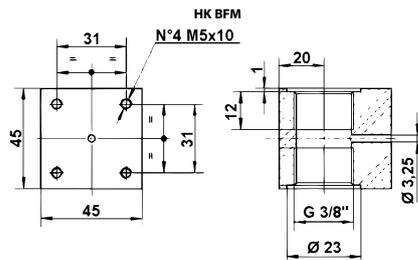

**Accessory for following products:**

 HK MAP - MAP pressure switch

## HK DSR 4POL

### M12 4-pin angle plug with cable

**Scope of supply:** with cable 5.0m

Identification	Weight kg
HK DSR M12 4POL 5.0 W	0,2

**Web:** <http://cat.hansa-flex.com/en/HKDSR4POL>

## Level/temperature switch HK 64EJ

Freely combinable kit for level and temperature switches  
 Cable-free, adjustable level contact  
 Can be installed as NO or NC contact  
 Simple retrofitting for temperature monitoring  
 Bistable = only one float switch with high float dynamics  
 Maintenance-free  
 Density of fluid min. 0.8 kg/dm<sup>3</sup>

**Operating pressure:** max. 1 bar

**Operating temperature max.:** 80 °C

**Connection:** bolt hole Ø 73 mm

**Electrical connection:** Device connector S6 DIN EN 175201-804

**Material:** Float SK 601 - hard PU, Switching tube - brass, Flange - PA

**Scope of supply:** incl. seal and screw set, incl. connector

**Note:** Basic unit comprises:

Level switch for tank installation with float and S6 plug

1x adjustable level contact K101-green, installed as NC contact

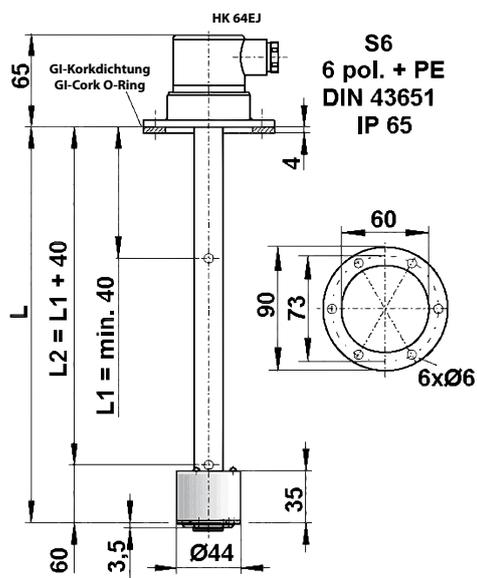

Installation and assembly must be carried out by qualified staff.

Level contacts or temperature sensors must be connected to the contact plate clean and free of oil.

For the proper function of the temperature sensors it is important that they have contact to the bottom of the dip tube without air gap. Make sure that the contact plate is inserted completely and fixed in the dip tube.

Identification	L mm	Weight kg
HK 64EJ K101 S6 250	250	0,3
HK 64EJ K101 S6 370	370	0,3
HK 64EJ K101 S6 520	520	0,4

**Web:** <http://cat.hansa-flex.com/en/HK64EJ>

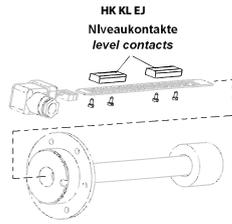

**Accessories:**

HK LK EJ - Level contact for level/temperature switch

HK TKO / TKS - Temperature contact for level/temperature switch

HK KL EJ - Resistance thermometer for level/temperature switch

HK THERMO EJ - Temperature transmitter for level/temperature switch

**HK LK E J****Level contact for level/temperature switch**

For mounting on contact strip of level-temperature switch HK64EJ  
Level contacts can be installed as NC or NO contacts (turn by 180° during installation)

Use different colours when using 2 or 3 contacts

**Contact distance min.:** 40 mm

**Contact load max.:** 10 VA

**Switching current max.:** 0,5 A

**Use:** for Level-Temperature Switches HK 64EJ

**Note:** Installation and assembly must be carried out by qualified staff.

Level contacts or temperature sensors must be connected to the contact plate clean and free of oil.

Identification	Colour	Voltage	Weight kg
HK L1 K101 EJ	green	max. 24 V	0,01

**Accessory for following products:**

**HK 64EJ** - Level/temperature switch HK 64EJ

## HK NTM

## Level/temperature switch HK NTM

One permanently set switching point (NC contact) for level and temperature

**Operating pressure:** max. 1 bar

**Operating temperature max.:** 80 °C

**Connection:** G 3/4" male

**Operating voltage:** max. 230V AC

**Electrical connection:** Device connector M3 (3-polig)

**Protection IP:** IP 65

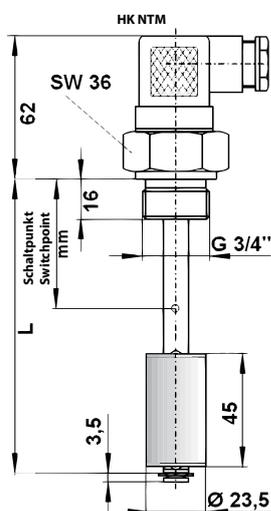

**Material:** Float SK 601 - hard PU, Switching tube - brass, Gasket: NBR

**Hysteresis:** ± 5 K

Identification	L mm	Switching point		Weight kg

**Spare part for following products:**
**HK SPIDEX Z** - Spidex coupling for gear pumps

**HK ROTEX AF** - Rotex coupling for axial piston and vane pumps

**HK ROTEX Z** - Rotex coupling for gear pumps

**HK DLMDL**
**DLMDL damping rail**

 For noise level reduction and vibration damping  
 Damping natural rubber vulcanised with steel rails  
 No metal connection between construction and sub-construction

**Material:**  
**Use:**

 NBR  
 for electric motors type IM B35

## HK B5 400/690V IE3

## Electric motor B5 400/690V IE3

Self-cooling squirrel-cage energy-saving motors  
 High efficiency IE3 - IEC60034-30:2009  
 Rated voltage 400/690V 50Hz, 460V 60Hz; 4-pin  
 Voltage tolerance +- 5%  
 Above 11 kW incl. temperature protection (PTC thermistor)

**Design:** type B5, without feet

**Protection IP:** IP 55

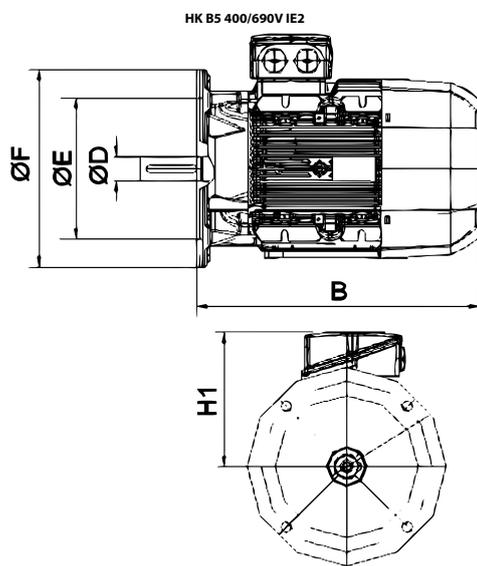

**Ambient temperature:** -20 °C to +40 °C

**Material:** Housing: Aluminium, Housing: Grey cast iron (from HK180L4\*\*\*)

## Standard double-acting cylinders with fastening

Our hydraulic cylinders and their components are designed for standard applications in industry and agriculture. They can be used only in some circumstances for applications in construction machinery. If this is your intention, please contact our technical personnel. The cylinders conform to the technical specifications in the catalogue or are designed to customers' specifications (approval drawing).

Please observe the stipulations of EN ISO 4413 "Safety requirements for fluid power systems and their components" as well as specifications and safety requirements based on statutory regulations when selecting, installing and operating the cylinders.

**Design:** with attachment elements

**Operating pressure:** max. 200 bar (acc. DIN EN 982)

**Test pressure:** max. 240 bar (acc. DIN EN 982)

**Temp. range:** Standard version -15 °C to +80 °C

**Media:** HLP fluids

**Material:** Piston rod: Steel 20MnV6, Chrome 25 µm ±/ - 5, Piston rod: Resistance for 120 h in the NSS test according to ISO 3768, Piston rod guide: Steel 9SMn28, Oil filler neck: Steel 9SMn28, Polished cylinder barrel: ST 52.3 DIN 2393-ISO H9, Cylinder base: FE 510-A105, Nut: Steel 8UNI EN20898/2, Gasket TPM: NBR, Piston: Steel 9SMn28, Gasket OR: NBR Fluorosil Viton, Gasket TSE-TTS-TTI/L: NBR + fabric / polyurethane, Gasket GHM-GHK: NBR / polyurethane

**Note:** HK HFR0 16 guide housing of aluminium

Piston speed based on standard seals: Max. 25m/min - 0.42m/sec.

Piston speed to the end positions: max. 6m/min - 0.10m/sec.

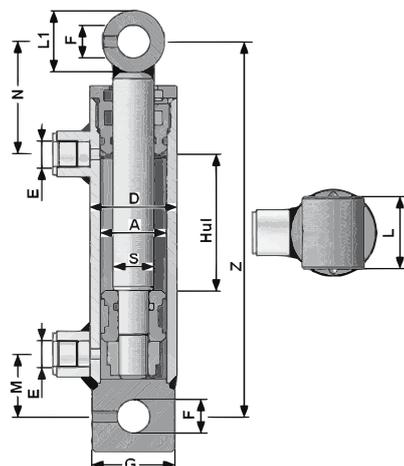

For these standard cylinders, it is recommended not to weld any fastenings to the cylinder liner (e.g. cardan mountings) as this could distort it.

## Standard double-acting cylinders with fastening

Our hydraulic cylinders and their components are designed for standard applications in industry and agriculture. They can be used only in some circumstances for applications in construction machinery. If this is your intention, please contact our technical personnel. The cylinders conform to the technical specifications in the catalogue or are designed to customers' specifications (approval drawing).

Please observe the stipulations of EN ISO 4413 "Safety requirements for fluid power systems and their components" as well as specifications and safety requirements based on statutory regulations when selecting, installing and operating the cylinders.

**Design:** with attachment elements  
**Operating pressure:** max. 200 bar (acc. DIN EN 982)  
**Test pressure:** max. 240 bar (acc. DIN EN 982)  
**Temp. range:** Standard version -15 °C to +80 °C  
**Media:** HLP fluids  
**Material:** Piston rod: Steel 20MnV6, Chrome 25 µm ±/ - 5, Piston rod: Resistance for 120 h in the NSS test according to ISO 3768, Piston rod guide: Steel 9SMn28, Oil filler neck: Steel 9SMn28, Polished cylinder barrel: ST 52.3 DIN 2393-ISO H9, Cylinder base: FE 510-A105, Nut: Steel 8UNI EN20898/2, Gasket TPM: NBR, Piston: Steel 9SMn28, Gasket OR: NBR Fluorosil Viton, Gasket TSE-TTS-TTI/L: NBR + fabric / polyurethane, Gasket GHM-GHK: NBR / polyurethane

**Note:** From type HK HFR2S 060 piston safeguard by means of safety bolt

Piston speed based on standard seals: Max. 25m/min - 0.42m/sec.

Piston speed to the end positions: max. 6m/min - 0.10m/sec.

For these standard cylinders, it is recommended not to weld any fastenings to the cylinder liner (e.g. cardan mountings) as this could distort it.

## Standard single-acting cylinders with fastening

Our hydraulic cylinders and their components are designed for standard applications in industry and agriculture. They can be used only in some circumstances for applications in construction machinery. If this is your intention, please contact our technical personnel. The cylinders conform to the technical specifications in the catalogue or are designed to customers' specifications (approval drawing).

Please observe the stipulations of EN ISO 4413 "Safety requirements for fluid power systems and their components" as well as specifications and safety requirements based on statutory regulations when selecting, installing and operating the cylinders.

**Design:** Plunger cylinders, with attachment elements

**Operating pressure:** max. 200 bar (acc. DIN EN 982)

**Test pressure:** max. 240 bar (acc. DIN EN 982)

**Temp. range:** Standard version -15 °C to +80 °C

**Media:** HLP fluids

**Material:** Piston rod: Steel 20MnV6, Chrome 25 µm ±/ - 5, Piston rod: Resistance for 120 h in the NSS test according to ISO 3768, Piston rod guide: Steel 9SMn28, Oil filler neck: Steel 9SMn28, Polished cylinder barrel: ST 52.3 DIN 2393-ISO H9, Cylinder base: FE 510-A105, Nut: Steel 8UNI EN20898/2, Gasket TPM: NBR, Piston: Steel 9SMn28, Gasket OR: NBR Fluorosil Viton, Gasket TSE-TTS-TTI/L: NBR + fabric / polyurethane, Gasket GHM-GHK: NBR / polyurethane

**Note:** Piston speed based on standard seals: Max. 25m/min - 0.42m/sec.

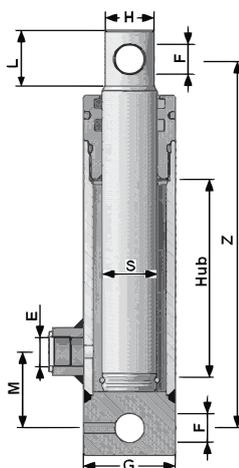

Piston speed to the end positions: max. 6m/min - 0.10m/sec.

For these standard cylinders, it is recommended not to weld any fastenings to the cylinder liner (e.g. cardan mountings) as this could distort it.

## HK HT

## Standard single-acting cylinders without fastening

Our hydraulic cylinders and their components are designed for standard applications in industry and agriculture. They can be used only in some circumstances for applications in construction machinery. If this is your intention, please contact our technical personnel. The cylinders conform to the technical specifications in the catalogue or are designed to customers' specifications (approval drawing).

Please observe the stipulations of EN ISO 4413 "Safety requirements for fluid power systems and their components" as well as specifications and safety requirements based on statutory regulations when selecting, installing and operating the cylinders.

**Design:** Plunger cylinders, without mounting elements

**Operating pressure:** max. 200 bar (acc. DIN EN 982)

**Test pressure:** max. 240 bar (acc. DIN EN 982)

**Temp. range:** Standard version -15 °C to +80 °C

**Media:** HLP fluids

**Material:** Piston rod: Steel 20MnV6, Chrome 25 µm ±/ - 5, Piston rod: Resistance for 120 h in the NSS test according to ISO 3768, Piston rod guide: Steel 9SMn28, Oil filler neck: Steel 9SMn28, Polished cylinder barrel: ST 52.3 DIN 2393-ISO H9, Cylinder base: FE 510-A105, Nut: Steel 8UNI EN20898/2, Gasket TPM: NBR, Piston: Steel 9SMn28, Gasket OR: NBR Fluorosil Viton, Gasket TSE-TTS-TTI/L: NBR + fabric / polyurethane, Gasket GHM-GHK: NBR / polyurethane

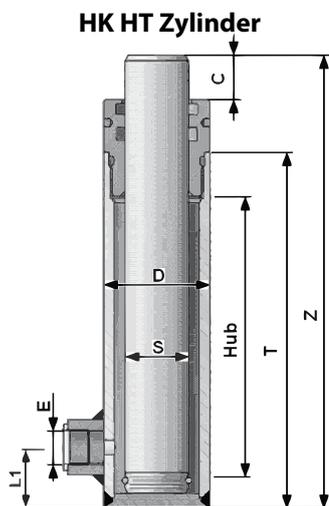

**Note:** Piston speed based on standard seals: Max. 25m/min - 0.42m/sec.

Piston speed to the end positions: max. 6m/min - 0.10m/sec.

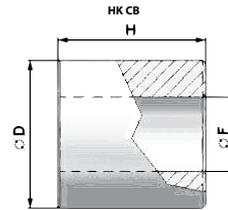

For these standard cylinders, it is recommended not to weld any fastenings to the cylinder liner (e.g. cardan mountings) as this could distort it.

Accessory for following products:

HK PF - Inserted piston with plunger cylinder guide

**HK FAC****Chrome-plated piston rod**

**Design:** Piston rods - metre goods, Tolerance f7  
**Material:** Steel 20MnV6, chrome 25 µm ± 5  
**Surface:** Chrome layer 25µm +5µm, Surface hardness HRC 66-69 (HV 850-1000), Roughness Ra ≤ 0.2µm, Corrosion resistance up to 120 hours in NSS test according to ISO 3768 / Rating 9

**Note:** Limited suitability for operating conditions with high levels of soiling (e.g. tail lifts etc.)  
 Further dimensions, see HK FAC HC2

**Ordering information:** Max. production length 6.00 m  
 Other designs available on request

Identification	Ø S mm	Weight / meter kg
HK FAC 012 L000	12	0,91
HK FAC 250 L000	250	385,30
HK FAC 300 L000	300	493,00

Ø S = piston rod diameter

**Web:** <http://cat.hansa-flex.com/en/HKFAC>

**HK FAC HC2****Chrome-plated piston rod HC 200**

**Design:** Piston rods - metre goods, Tolerance f7  
**Material:** Steel 20MnV6  
**Surface:** Chrome layer 25µm +5µm, Surface hardness HRC 66-69 (HV 850-1000), Roughness Ra ≤ 0.2µm, Corrosion resistance up to 200 hours in NSS test according to ISO 3768 / Rating 9

**Note:** Limited suitability for operating conditions with high levels of soiling (e.g. tail lifts etc.)

**Ordering information:** Max. production length 6.00 m  
 Other designs available on request

**HK W / HK X**

**Hand pump 700 bar**

For cylinders with large oil volumes, the use of 2-stage pumps is recommended

Hand lever can be used as carrying handle after locking.

**Design:** internal pressure control valve

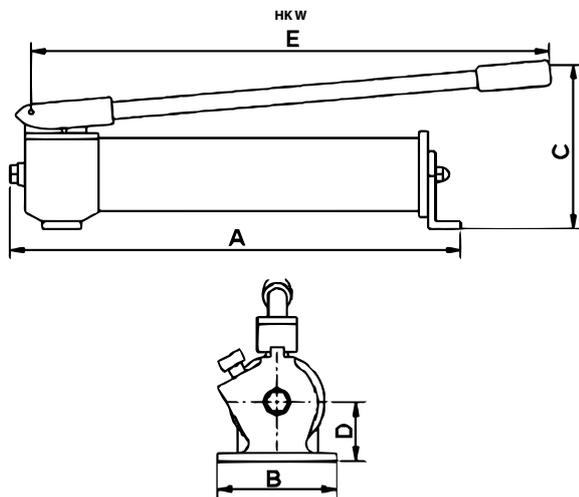

**Operating pressure:** max. 700 bar

**Connections:** 3/8" Female NPT

**Note:** "W" hand pumps for actuation of single-acting cylinders, one port  
 "X" hand pumps with control valve for actuation of double-acting cylinders, two ports

Attention: Please observe separate safety precautions for working with 700 bar equipment (see technical information)!

## HK Z PNEU

## Pneumo-hydraulic pump 700 bar

Pneumo-hydraulic pumps develop an oil pressure of 700 bar with an air pressure of only 7 bar

Pump maintains the pressure in rest position

Actuation of the pedal by hand or foot

**Design:** double-acting with control valve, internal pressure control valve

**Operating pressure:** max. 700 bar

**Connections:** air connection 1/4" NPT Female

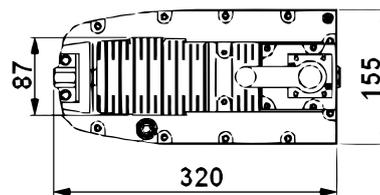

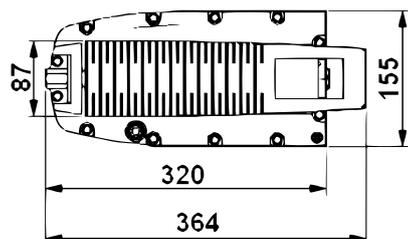

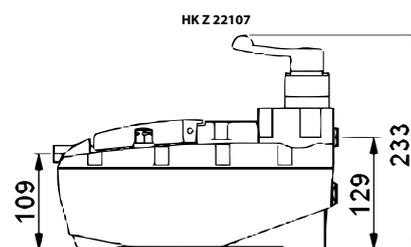

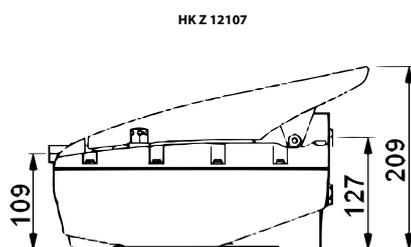

**Material:** Housing: Plastic

**Use:** for operating double-acting 700 bar cylinder

**Note:** Attention: Please observe separate safety precautions for working with 700 bar equipment (see technical information)!

Identification	useful oil volume cc	Type	Pressure max. bar	Weight kg
HK Z 12107	2100,0	single-acting	700	7,5
HK Z 22107	2100,0	double-acting	700	7,0

**Web:** <http://cat.hansa-flex.com/en/HKZPNEU>

## HK HAM / HAE

## Electro-hydraulic pumps 700 bar

electro-hydraulic pumps (compact power packs) to supply medium and heavy-duty cylinders

Tank size: 2.5 - 100 litre (tanks steel or aluminium)

Electric motors for 115 V, 230 V, 400 V

Optional accessories: Protective brackets, transport rollers, oil coolers

**Design:** Configuration and delivery on request., with manual or electric magnet-valves

**Operating pressure:** max. 700 bar

**Volumetric flow:** 0,36 - 4,00 l/min

**Note:** Attention: Please observe separate safety precautions for working with 700 bar equipment (see technical information)!

**Ordering information:** No stock goods, configuration (in fixed graduations) and delivery period upon request!

Identification	Design
Elektrohydraulische Pumpe HAM	Manually switched directional control valve
Elektrohydraulische Pumpe HAE	Electrically switched directional control valve

**Web:** <http://cat.hansa-flex.com/en/HKHAMHAE>

**HK SMX**

**Flat cylinders 700 bar single-acting with spring retraction**

Flat cylinders combine compact design with maximum stroke. Ideal where space is at a premium. Care must be taken that no lateral forces are transmitted to the guide rings.

Flat, compact design

Mounting bores for stationary applications

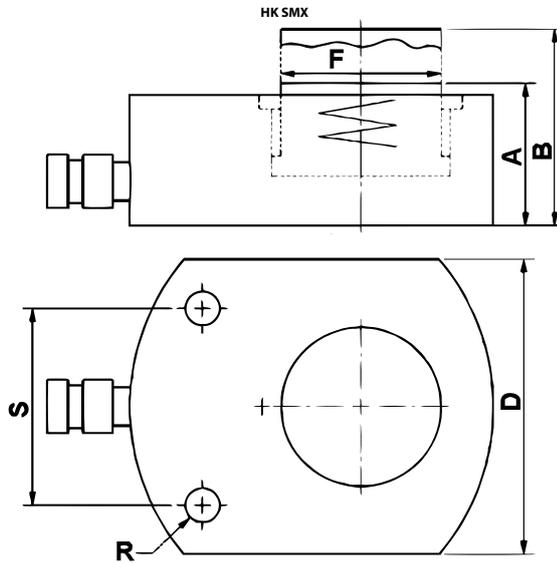

**Design:** Hardened valvehead, hard chrome-plated pistons, max. stroke 16 mm, spring return

**Operating pressure:** max. 700 bar

**Scope of supply:** with female quick coupling 3/8"-18 NPT

**Note:** Attention: Please observe separate safety precautions for working with 700 bar equipment (see technical information)!

**HK STX**

**Flat cylinders 700 bar single-acting with lock nut**

Flat cylinders combine compact design with maximum stroke. Ideal where space is at a premium. Care must be taken that no lateral forces are transmitted to the guide rings.

Flat, compact design

Plunger wiper seals to prevent soiling

All cylinders have a moving thrust piece and special coating for enhanced corrosion protection.

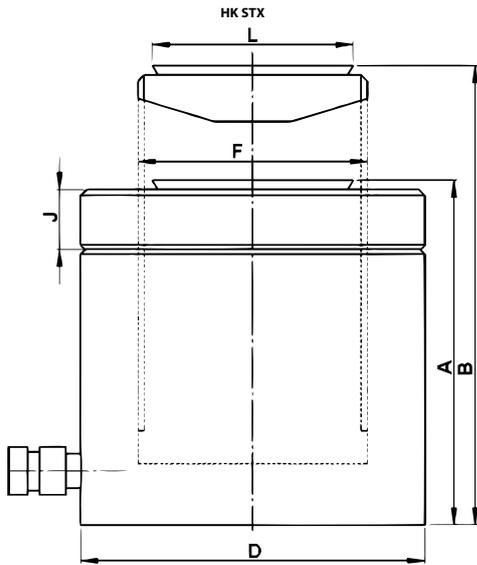

**Design:** Hardened valvehead, hard chrome-plated pistons, max. stroke 50 mm, retraction on load, with lock nut for positive and safe load holding

**Operating pressure:** max. 700 bar

**Scope of supply:** with female quick coupling 3/8"-18 NPT

**Note:** Attention: Please observe separate safety precautions for working with 700 bar equipment (see technical information)!

Hollow piston cylinder 700 bar

Hollow piston cylinders are employed for pushing and pulling actuation.  
 Thread on cylinder housing ensures simple mounting  
 Plunger wiper seals to prevent soiling  
 Replaceable supporting head

**Design:** Hardened valvehead, hard chrome-plated pistons, max. stroke 76 mm, retraction on load

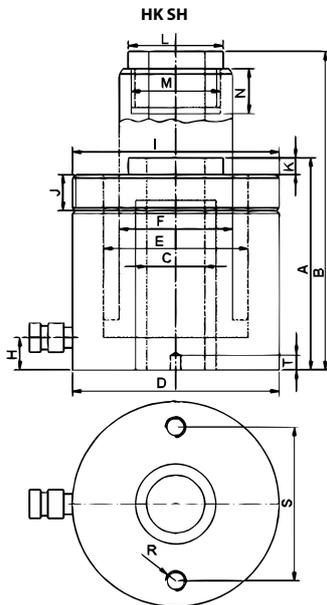

**Operating pressure:** max. 700 bar

**Scope of supply:** with female quick coupling 3/8"-18 NPT

**Note:** Attention: Please observe separate safety precautions for working with 700 bar equipment (see technical information)!

## HK SM

## Universal cylinders 700 bar single-acting with spring retraction

Universal cylinder for a wide range of applications.

Care must be taken that no lateral forces are transmitted to the guide rings.

Compact design

Plunger wiper seals to prevent soiling

Mounting bores for stationary applications

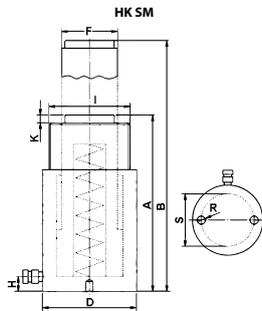

**Design:** Hardened valvehead, hard chrome-plated pistons, max. stroke 257 mm, spring return

**Operating pressure:** max. 700 bar

**Scope of supply:** with female quick coupling 3/8"-18 NPT

**Note:** Attention: Please observe separate safety precautions for working with 700 bar equipment (see technical information)!

A10 with inorganic filter (10 µm), absolute filtration P10 paper filter (10 µm), nominal filtration Qmax - max intake volumetric flow

Web: <http://cat.hansa-flex.com/en/FIRL>

Spare parts:

- FI RL E MP - Filter element for return filter MP
- FI RL GEH - Housing for return flow filter

Accessories:

- HK VA MAN - Clogging indicator pressure gauge
- FI RL RVL - Tube extension for return flow filter

**Housing for return flow filter**

Return flow filter for fitting into the tank cap; dimensions for drilling pattern see graphic.  
 Connector for clogging indicator G 1/8" closed with bolt

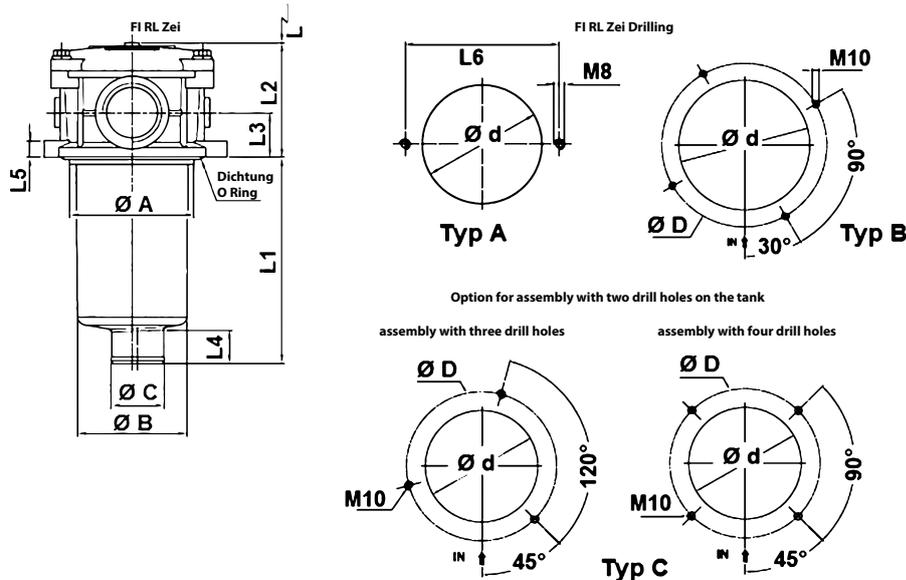

**Design:** with bypass valve 1.75 bar, without clogging indicator  
**Material:** Gasket: NBR  
**Operating pressure:** max. 8 bar  
**Scope of supply:** without filter element

**Note:** Dimension "L": clearance required for changing the filter element

**Ordering information:** Filter element is not included. Please order separately.

## HK RTR

### Return flow filter compact tank installation

Compact return flow filter for direct installation in the return pipe in the tank below the oil level.

Design (Qmax.) for medium ISO VG 46 at 50°C (30 mm<sup>2</sup>/s) at Δp<sub>tot</sub> = 0.4 bar

**Design:** with bypass valve 1.75 bar

**Operating pressure:** max. 8 bar

**Ordering information:** Filter materials for other types of oil, viscosities or temperatures available on request

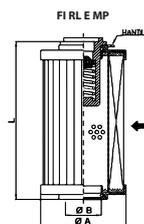

Identification	Filter area cm <sup>2</sup>	Line connection	Q max. L/min	A mm	Weight kg
HK RTR 050 1CG1 P10	300	G 3/8"	10	78	0,2
HK RTR 050 2 CG1 P10	600	G 3/8"	20	121	0,4
P10 paper filter (10 μm), nominal filtration Qmax - max intake volumetric flow					

**Web:** <http://cat.hansa-flex.com/en/HKRTR>

**FI RL E MP**
**Filter element for return filter MP**

Pressure differential for filter element paper (P) max. 3 bar  
 Pressure differential for inorganic filter element (A) max. 10 bar

**Temp. min.:** -25 °C  
**Temp. max.:** 120 °C  
**Material:** Gasket: NBR  
**Use:** For return flow filter FI RL

**Accessory for following products:**  
 FI RL - Return flow filters  
 FI RL GEH - Housing for return flow filter

## FI SP R 1

## Spin-on return flow filter type 1

Spin-on filters for pipeline installation

Pressure differential for paper filter element (P) max. 4 bar

Pressure differential for filter inorganic element (A) max. 4 bar

Design (Qmax.) for medium ISO VG 46

at 50°C (30 mm<sup>2</sup>/s) at  $\Delta p_{tot} = 0.4$  bar

**Design:** with bypass valve 1.75 bar

**Temp. min.:** -25 °C

**Temp. max.:** 110 °C

**Material:** Filter head in aluminum, Gasket: NBR

**Operating pressure:** max. 12 bar

**Filter mesh size:** 10  $\mu$ m

**Note:** For utilization as a suction filter a suction filter head FI SP S FK \*\*\* must be used.

**Ordering information:** Other filter materials and filters for other types of oil, viscosities or temperatures available on request

## FI SP R 2

## Spin-on return flow filter type 2

Spin-on filters for pipeline installation

Pressure differential for paper filter element (P) max. 4 bar

Pressure differential for filter inorganic element (A) max. 4 bar

Design (Qmax.) for medium ISO VG 46

at 50°C (30 mm<sup>2</sup>/s) at  $\Delta p_{tot} = 0.4$  bar

**Design:** as return filter, with bypass valve 1.75 bar, without clogging indicator

**Temp. min.:** -25 °C

**Temp. max.:** 110 °C

**Material:** Filter head in aluminum, Gasket: NBR

**Operating pressure:** max. 12 bar

**Filter mesh size:** 10  $\mu$ m

**Note:** For utilization as a suction filter a suction filter head FI SP S FK \*\*\* must be used.

**Ordering information:** Other filter materials and filters for other types of oil, viscosities or temperatures available on request

Identification	Filter area cm <sup>2</sup>	Filter material	Line connection	Q max. L/min	A mm	C mm	D mm	E mm	Weight kg

## HK FI AD E0/EV

## Adsorber filter single use without valve

These adsorber filters are used for the ventilation of hygroscopic substances of any kind.

<b>Design:</b>	Disposable with activated charcoal filter, Integrated filter element 3 µm
<b>Connection:</b>	at bottom
<b>Installation position:</b>	vertical
<b>Temp. range:</b>	-40 °C to +70 °C
<b>Material:</b>	Housing: Aluminium and acrylic, Gasket: NBR

**Note:** Design bases are medium, air flow rate or clunk pick-up volume.

To replace the adsorber cartridge, the connector remains on the machine.

Other variants with housing in aluminum or stainless steel as well as for aggressive media are available on request.

**Ordering information:** For tank mounting the mounting flange HK FI AD FS must be ordered if necessary.

Identification	Design	Air volume L/min	for tank size	A mm	B mm	C mm	G	Weight kg

Air volume: Recommended air throughput for optimum drying efficiency

**Web:** <http://cat.hansa-flex.com/en/HKFIAD E0EV>

**Additional info:** In the adsorber the water molecules contained in the air are bounded in the pores of the adsorbent (silica gel). The saturation (charging) and then the necessary replacement of the filter cartridge is indicated by a color change from orange to green. The valve system prevents unnecessary water absorption from the ambient air during the standstill times. This allows longer service lives of the adsorbent filling. Silica gel consists of about 99 % of silicon dioxide (SiO<sub>2</sub>) and is classified as a synthetic polar and hydrophilic desiccant. It possesses due to its high porosity, a large internal surface area of up to 800 m<sup>2</sup>/g. This enables a very high water holding capacity.

In adsorber filters silica gel is often added with a color indicator. Color changes indicate the water content and therefore the progress of the loading of the desiccant.

According to EU legislation (Regulation EC No 1272/2008) silica gel is not classified as a dangerous substance. It is not subject to classification according to EC Directives (67/548/EEC and 1999/45/EC). Silica gel is not among the health and environmentally hazardous substances.

#### Spare parts:

**Web:** <http://cat.hansa-flex.com/en/HKFIADMV>

**Additional info:** In the adsorber the water molecules contained in the air are bounded in the pores of the adsorbent (silica gel). The saturation (charging) and then the necessary replacement of the filter cartridge is indicated by a color change from orange to green. The desing of the reusable adsorber filters, in combination with the activated carbon allows an unlimited number of regenerations of the adsorbents. Additionally, the valve system protects against unnecessary water uptake from the ambient air during the downtime. This allows longer periods of use. Silica gel consists of about 99 % of silicon dioxide (SiO<sub>2</sub>) and is classified as a synthetic polar and hydrophilic desiccant. It possesses due to its high porosity, a large internal surface area of up to 800 m<sup>2</sup>/g. This enables a very high water holding capacity.

In adsorber filters silica gel is often added with a color indicator. Color changes indicate the water content and therefore the progress of the loading of the desiccant.

According to EU legislation (Regulation EC No 1272/2008) silica gel is not classified as a dangerous substance. It is not subject to classification according to EC Directives (67/548/EEC and 1999/45/EC). Silica gel is not among the health and environmentally hazardous substances.

HK FI AD E0/EV - Adsorber filter single use without valve

## HK FI AD ETS

## Refill-kit for reusable adsorber

**Scope of supply:** Adsorbent silicagel orange, Activated carbon filters, Sealing rings and O-rings, Dust filter element

Identification	for filter type	Weight kg
HK FI AD ETS 005	HKFIAD005MVNAF	0,6
HK FI AD ETS 010	HKFIAD010MVNAF	0,6
HK FI AD ETS 020	HKFIAD020MVNAF	1,0
HK FI AD ETS 040	HKFIAD040MVNAF	1,5
HK FI AD ETS 100	HKFIAD100MVNAF	2,2
HK FI AD ETS 180	HKFIAD180MVNAF	3,2
HK FI AD ETS 020 VPA	HKFIAD310MVNAFVPA	1,0
HK FI AD ETS 040 VPA	HKFIAD330MVNAFVPA	1,9
HK FI AD ETS 100 VPA	HKFIAD510MVNAFVPA	2,0
HK FI AD ETS 210 VPA	HKFIAD560MVNAFVPA	4,6

**Web:** <http://cat.hansa-flex.com/en/HKFIADETS>

**Additional info:** Silica gel consists of about 99 % of silicon dioxide (SiO<sub>2</sub>) and is classified as a synthetic polar and hydrophilic desiccant. It possesses due to its high porosity, a large internal surface area of up to 800 m<sup>2</sup>/g. This enables a very high water holding capacity.

In adsorber filters silica gel is often added with a color indicator. Color changes indicate the water content and therefore the progress of the loading of the desiccant.

According to EU legislation (Regulation EC No 1272/2008) silica gel is not classified as a dangerous substance. It is not subject to classification according to EC Directives (67/548/EEC and 1999/45/EC). Silica gel is not among the health and environmentally hazardous substances.

**Spare part for following products:**

**HK FI AD MV** - Adsorber filter reusable with valve

**HK FI AD MV VARIO PA** - Adsorber filter reusable with valve

## HK FI AD SK

## Adsorbent silicagel

**Note:** for refilling of adsorber filters

Identification	Design	Weight kg
HK FI AD SK 025	2,5 kg bundle	2,6
HK FI AD SK 040	4,0 kg bundle	4,1
HK FI AD SK 250	25 kg bundle	27,0

**Web:** <http://cat.hansa-flex.com/en/HKFIADSK>

**Additional info:** Silica gel consists of about 99 % of silicon dioxide (SiO<sub>2</sub>) and is classified as a synthetic polar and hydrophilic desiccant. It possesses due to its high porosity, a large internal surface area of up to 800 m<sup>2</sup>/g. This enables a very high water holding capacity.

In adsorber filters silica gel is often added with a color indicator. Color changes indicate the water content and therefore the progress of the loading of the desiccant.

**Spare part for following products:**

**HK FI AD MV** - Adsorber filter reusable with valve

**HK FI AD MV VARIO PA** - Adsorber filter reusable with valve

## HK FI AD FS

### Mounting flange for adsorber

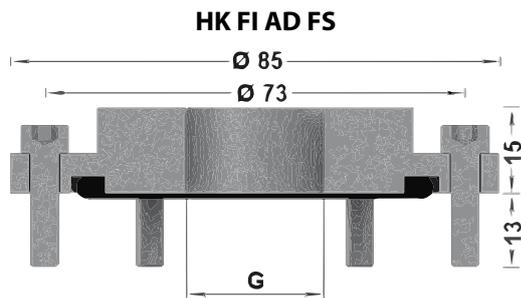

Mounting flange (hole circle 73 mm / according to DIN 24557) for attachment of adsorber filters

**Material:** Aluminium, Gasket: NBR

**Scope of supply:** inkl. O-ring and set of screws (6x M5 x 20)

Identification	G	Weight kg
HK FI AD FS 73 G34	G 3/4"	0,14
HK FI AD FS 73 G1	G 1"	0,14

**Web:** <http://cat.hansa-flex.com/en/HKFIADFS>

**Accessory for following products:**

HK FI AD E0/EV - Adsorber filter single use without valve

HK FI AD MV - Adsorber filter reusable with valve

HK FI AD MV VARIO PA - Adsorber filter reusable with valve

## HK FI AD FS FILL

## Mounting flange for adsorber

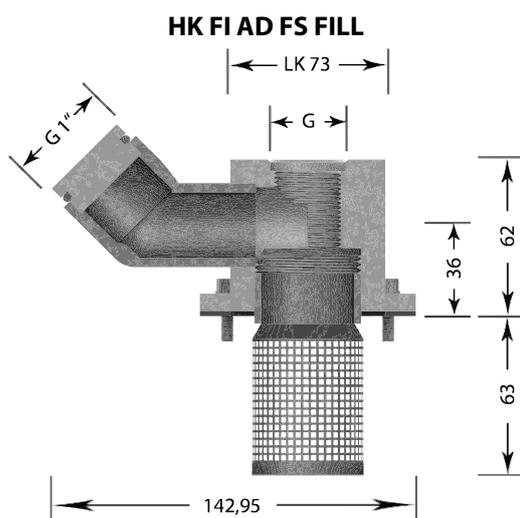

Filling flange (pitch circle 73 mm in accordance with DIN 24557) for attaching adsorber filters. Furthermore, refilling with hydraulic oil can be done without the need to remove the filter.

**Material:** Aluminium, Stainless steel, Gasket: NBR

**Scope of supply:** including sieve, flat seal and screw set (6 No. M5 x 20)

Identification	G	Weight kg
HK FI AD FS 73 FILL G34	G 3/4"	0,9
HK FI AD FS 73 FILL G1	G 1"	0,9

**Web:** <http://cat.hansa-flex.com/en/HKFIADFSFILL>

**Accessory for following products:**

HK FI AD E0/EV - Adsorber filter single use without valve

HK FI AD MV - Adsorber filter reusable with valve

HK FI AD MV VARIO PA - Adsorber filter reusable with valve

## HK FI AD FS BY

### Mounting flange for adsorber

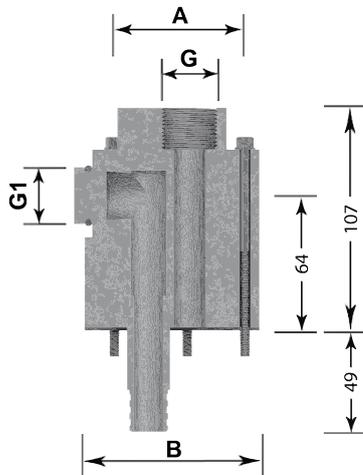

Flange connection (pitch circle 41.3 or 73 mm in accordance with DIN 24557) for attaching adsorber filters. Furthermore, a bypass flow filter system can be connected without additional special fittings or the need to remove the filter.

**Material:** Aluminium, Gasket: NBR

**Scope of supply:** including side threaded connectors, seals and screw set (6 No. M5 x 100)

Identification	Design	A mm	B mm	G	G1	Weight kg
HK FI AD FS 41 BY 2 G12	2 bypass connections	41,3	62	G 1/2"	G 3/8"	0,9
HK FI AD FS 73 BY 1 G34	1 bypass connection	73,0	99	G 3/4"	G 3/4"	1,3
HK FI AD FS 73 BY 2 G34	2 bypass connections	73,0	99	G 3/4"	G 3/4"	1,3

### HK FI AD FS BY

**Web:** <http://cat.hansa-flex.com/en/HKFIADFSBY>

**Accessory for following products:**

HK FI AD E0/EV - Adsorber filter single use without valve

HK FI AD MV - Adsorber filter reusable with valve

HK FI AD MV VARIO PA - Adsorber filter reusable with valve

**HK VA MAN**

**Clogging indicator pressure gauge**

Clogging display, pressure gauge version, for return flow, suction and pressure filters

**Connection:** G 1/8"

**Note:** Cannot be used for pressure filters FI HD 400, FI MD 315 or their housings FI HD GEH, FI MD GEH

Identification	Type	Design	Nominal size Ø	Weight kg
HK VA V1	Pressure gauge	Bottom connection	40	0,04
HK VA VR	Pressure gauge	Connection at rear	40	0,04
HK VA VS	vacuum pressure gauge for suction filter	Connection at rear	40	0,04

**Web:** <http://cat.hansa-flex.com/en/HKVAMAN>

**Accessory for following products:**

- FI RL - Return flow filters
- FI RL GEH - Housing for return flow filter
- FI SP R 1 - Spin-on return flow filter type 1
- FI SP R 2 - Spin-on return flow filter type 2
- FI SP R 3 - Spin-on return flow filter type 3
- FI SP R/S FK - Filter head for spin-on return flow filter / suction filter

**HK VA EL**

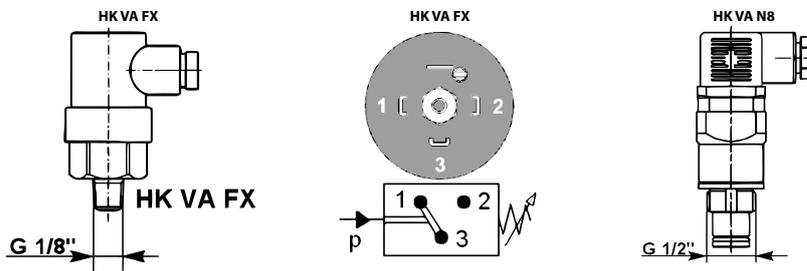

**Clogging indicator electrical**

Clogging display, electrical version, for return flow and pressure filters

**Note:** With the electric switches the switching point setting is "rising"  
Cannot be used for pressure filters FI HD 400, FI MD 315 or their housings FI HD GEH, FI MD GEH

Identification	Thread	Type	Design	Dimensions	Switching point bar	Weight kg
HK VA FX	G 1/8"	elektrical, max. 250VAC	changeover contact	Height 74mm	1,3	0,06
HK VA N8	G 1/2"	elektrical, max. 115VDC	changeover contact	Height 65mm	7,0	0,16

**Web:** <http://cat.hansa-flex.com/en/HKVAEL>

**Accessory for following products:**

- FI RL - Return flow filters
- FI RL GEH - Housing for return flow filter
- FI SP R 1 - Spin-on return flow filter type 1
- FI SP R 2 - Spin-on return flow filter type 2
- FI SP R 3 - Spin-on return flow filter type 3
- FI SP R/S FK - Filter head for spin-on return flow filter / suction filter

**HK VA PIS M****Clogging indicator mechanical**

Clogging display, mechanical version, for pressure filters

**Connection:** M 20x1.5

**Use:** For pressure filters FI MD 315, FI HD 400

Identification	Type	Switching point bar	Weight kg
HK VA PIS 3095 5 M	optical	5,0	0,10

**Web:** <http://cat.hansa-flex.com/en/HKVAPISM>

**Accessory for following products:**

FI MD 315 - Medium pressure filter 315 bar

FI MD GEH - High pressure filter 400bar

FI HD 400 - High pressure filter 400bar

FI HD GEH - High pressure filter 400bar

**HK VA PIS EL****Clogging indicator electrical**

Clogging display, electrical version, for pressure filters

**Connection:** M 20x1.5

**Use:** For pressure filters FI MD 315, FI HD 400

**Note:** The switching function can be changed (opener or closer) by replugging the electrical switching unit through 180°. The unit status is set as opener at the factory.

Identification	Type	Switching point bar	Weight kg
HK VA PIS 3092 5 EL	elektrical, max. 250VAC	5,0	0,25

**Web:** <http://cat.hansa-flex.com/en/HKVAPISEL>

**Accessory for following products:**

FI MD 315 - Medium pressure filter 315 bar

FI MD GEH - High pressure filter 400bar

FI HD 400 - High pressure filter 400bar

FI HD GEH - High pressure filter 400bar

## HK FES DMM

## Fluid sampling set, dynamic

The fluid sampling set is used for safely collecting fluid samples at measuring connections in hydraulic systems (even while the system is running). The equipment consists of several individual parts and is delivered fully assembled.

**Application:** General hydraulic systems

**Connection 1:** Measuring connection M 16 x 2

**Note:** Work on hydraulic systems must only be carried out by technically qualified personnel and compliance with the safety regulations in force.

The operating manual for this equipment must be followed to prevent injury to personnel and damage to the environment!

Identification	Weight kg	Max. working pressure bar
HK FES-DMM	0,75	315

**Web:** <http://cat.hansa-flex.com/en/HKFESDMM>

**Additional elements:**

HK PROBEF GL - Glass sample bottle

HK PROBEF LDPE - Plastic sample bottle

OELANALYSE SET 2 - Oil analysis set for mineral oil

OELANALYSE SET 3 - Oil analysis set for bio oil

OELANALYSE SET 4 - Oil analysis set for gear oil

## HK FES SUP

## Fluid sampling set, static

The fluid sampling set is used for safely collecting fluids from containers and systems

The fluid is sucked through the 1000 mm long hose and directly into the glass sample bottle by the vacuum pump.

**Application:** General hydraulic systems

**Scope of supply:** 1 x vacuum pump, 3 x 250 ml sample bottles, glass, 2 x 500 ml sample bottles, glass, 2 x 500 ml sample bottles, plastic, 1 x adapter for sample bottles, 2 x PVC hoses, 1 x pipe section

Identification	Weight kg
HK FES-SUP	1,45

**Web:** <http://cat.hansa-flex.com/en/HKFESSUP>

**Spare parts:**

HK PROBEF LDPE - Plastic sample bottle

HK PROBEF GL - Glass sample bottle

HK PROBEF ADA AL - Adapter for sample bottle

HK VAK PUMPE - Vacuum hand pump

**HK VAK PUMPE**

## Vacuum hand pump

Vacuum hand pump for fluid collection.  
Fits HK FES SUP and HK VAK FILTRA-GL.

**Connection:** Hose fitting = 6 mm diameter

Identification	Weight kg
HK VAK-PUMPE	0,37

**Web:** <http://cat.hansa-flex.com/en/HKVAKPUMPE>

**Spare part for following products:**

HK FES SUP - Fluid sampling set, static

**Accessory for following products:**

HK VAK FILTRA GL - Glass vacuum filtration device

**HK PROBEF LDPE**

## Plastic sample bottle

Plastic sample bottle for fluid sampling set.

**Scope of supply:** Sample body, Version "MD": Sample bottle with cap

Identification	Weight kg	Content mL	Material	Colour
HK PROBEF-LDPE500	0,05	500	Plastic	white, transparent
HK PROBEF-LDPE500 MD	0,07	500	Plastic	white, transparent

**Web:** <http://cat.hansa-flex.com/en/HKPROBEFLDPE>

**Accessories:**

HK PROBEF LDPE DEK - Cover for plastic sample bottle

**HK PROBEF LDPE DEK**

## Cover for plastic sample bottle

Sealing cap for sample bottle of plastic.

Identification	Weight kg	Material	Colour
HK PROBEF-LDPE-DEK	0,02	Plastic	white, transparent

**Web:** <http://cat.hansa-flex.com/en/HKPROBEFLDPEDEK>

**Accessory for following products:**

HK PROBEF LDPE - Plastic sample bottle

**HK PROBEF GL****Glass sample bottle**

Glass sample bottle for fluid sampling set.

**Scope of supply:** Sample body, Version "MD": Sample bottle with cap

Identification	Weight kg	Content mL	Material
HK PROBEF-GL250	0,24	250	Glass
HK PROBEF-GL250 MD	0,25	250	Glass
HK PROBEF-GL500	0,36	500	Glass
HK PROBEF-GL500 MD	0,37	500	Glass

**Web:** <http://cat.hansa-flex.com/en/HKPROBEFGL>

**Accessories:**

**HK PROBEF GL DEK** - Cover for glass sample bottle

**HK PROBEF ADA AL** - Adapter for sample bottle

**HK PROBEF GL DEK****Cover for glass sample bottle**

Sealing cap for sample bottle of glass.

Identification	Weight kg	Material	Colour
HK PROBEF-GL-DEK	0,01	Plastic	black

**Web:** <http://cat.hansa-flex.com/en/HKPROBEFGLDEK>

**Accessory for following products:**

**HK PROBEF GL** - Glass sample bottle

**HK PROBEF ADA AL****Adapter for sample bottle**

Cover with 2 hose connections for extracting the fluid.

**Note:** Only suitable for glass sample bottles.

Identification	Weight kg	Material
HK PROBEF-ADA-AL	0,33	Aluminium

**Web:** <http://cat.hansa-flex.com/en/HKPROBEFADAAL>

**Spare part for following products:**

HK FES SUP - Fluid sampling set, static

**Accessory for following products:**

HK PROBEF GL - Glass sample bottle

HK VAK PUMPE - Vacuum hand pump

## HK PART

## Particle counter

The HKPART-Z particle counter serves as a mobile service for temporary measurement of solid contaminants in hydraulic systems, e.g., in control circuits, pressure circuits, and unpressurised containers.

With the integrated Aqua-Sensor, the equipment is also able to measure moisture and temperature.

The data collected can be transmitted to a PC via Bluetooth, and analysed there using the software supplied with the equipment.

**Application:** Service in mobile hydraulics, Servicing hydraulic machines

**Scope of supply:** HKPART-Z particle counter, Mains adapter with mains connection cable, High-pressure adapter (pressure limiter) for pressurised lines, Pressure hose with screw connection for M16 x 2 measuring coupling, length = 2 m, Suction hose with screw connection, transparent, length = 0.3 m, Return hose with plug-in connection, open end, transparent, length = 1 m, USB Bluetooth dongle, Software, Operating and maintenance manual / Calibration certificate

**Additional feature:** Suitable for hydraulic oils having a viscosity up to 350 mm<sup>2</sup>/s, Purity classes conforming to ISO and SAE or NAS, Integrated AquaSensor for measuring moisture and temperature

**Note:** When used in systems with a pressure above 45 bar, the high pressure adapter (P<sub>max</sub> = 345 bar) must be used.

Work on hydraulic systems must only be carried out by technically qualified personnel and compliance with the safety regulations in force.

The operating manual for this equipment must be followed to prevent injury to personnel and damage to the environment!

Identification	Max. working pressure bar	Weight kg
HK PART-Z	45	13

**Web:** <http://cat.hansa-flex.com/en/HKPART>

**HK ICM**

**Inline Contamination Monitor**

Optical particle sensor with LED-counter  
 for mounting in pressure line or return line  
 8-channel contamination measurement  
 & display  
 Measures and displays according ISO 4406:1999, NAS 1638, AS 4059E and ISO 11218  
 Data logging and 4000 test result memory  
 Measuring accuracy: ±1/2 code for 4,6,14 µm(c); ±1 code for larger particles;  
 ±3% for moisture and temperature  
 Test time adjustable 10 - 3600 sec. (factory setting 120 sec.), free programmable test intervals  
 Previous ten result viewing capability  
 Power supply by USB-interface HK ICM USB I  
 Version R with Multicolour LED and remote alarm signaling  
 Robust die-cast aluminium housing  
 Protection class IP 65

**Application:** for direct mounting in systems and applications, for ongoing measurement also in limited space applications

**Scope of supply:** with LPA-View software

**Operating voltage:** 9 - 36 V DC

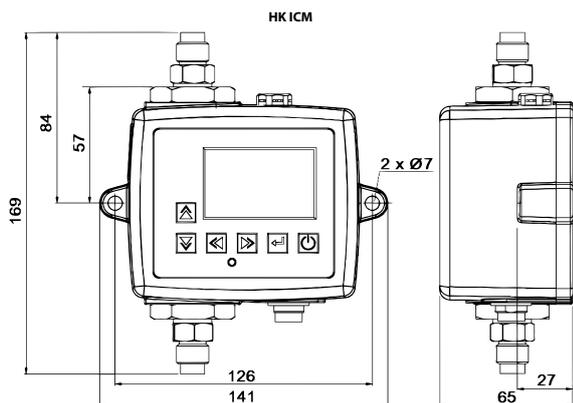

**Operating temperature:** -25 °C bis +80 °C

**Flow rate:** 20 - 400 ml/min

**Power input:** max. 2,2 W

**Additional feature:** Suitable for hydraulic oils having a viscosity up to 1000 mm<sup>2</sup>/s, Purity classes conforming to ISO and SAE or NAS, Integrated AquaSensor for measuring moisture and temperature

Identification	Connections	Max. working pressure bar	Weight kg
HK ICM WMKR G1	Minimes M16x2	400	1,2

**Web:** <http://cat.hansa-flex.com/en/HKICM>

**Accessories:**  
 HK ICM USB - USB adapter

**HK ICM USB****USB adapter**

allows power supply and control function (connected to computer) for contamination monitor HK ICM WMKR G1

**Application:** USB-interface for contamination monitor

**Scope of supply:** with power supply unit and wire 3m

**Use:** For particle sensor HK ICM

Identification	Weight kg
HK ICM USB I	0,5

**Web:** <http://cat.hansa-flex.com/en/HKICMUSB>

**Accessory for following products:**

HK ICM - Inline Contamination Monitor

**HK VAK FILTRA GL****Glass vacuum filtration device**

Glass vacuum filtration device for visual evaluation of liquids.

**Connection:** Hose fitting = 6 mm diameter

**Note:** Highly viscous media should be diluted with a technical solution (e.g. NHEPTAN-TECH).

**Ordering information:** Diaphragm filters, vacuum pump and extraction hose must be ordered separately.

Identification	Weight kg
HK VAK-FILTRA-GL	1,7

**Web:** <http://cat.hansa-flex.com/en/HKVAKFILTRAGL>

**Additional info:** The oil sample is drawn through the filter and into the filter bottle with the aid of a vacuum pump.  
The residue in the filter provides a preliminary indication of the degree of contamination of the oil.  
The filtrate bottle can hold up to 1000 ml,  
the glass top can hold up to 250 ml,  
the filtration area is 12.5 cm<sup>2</sup> with a filter diameter of 50 mm.

**Accessories:**

HK VAK MEM - Filter for vacuum filtration

**Additional elements:**

HK VAK PUMPE - Vacuum hand pump

## OELANALYSE SET 2

### Oil analysis set for mineral oil

With the oil analysis set, the condition of an oil can be analysed precisely in the lab. The condition of the system can also be deduced from the result of the oil analysis.

**Scope of supply:** 1 x sample container, 1x Sample data sheet, 1x shipping case

**Additional feature:** Analysis costs are included in the price., All oil samples will be evaluated within 24 hours of receipt at the laboratory.

Identification	Colour	for medium	Weight kg
OEL ANALYSE SET 2	black cover	Mineral oil-based hydraulic oil	0,2

**Web:** <http://cat.hansa-flex.com/en/OELANALYSESET2>

**Additional info:** The oil analysis set 2 includes the following analyses:

- Wearing metals (iron, chrome, tin, aluminium, nickel, copper, lead, molybdenum),
- PQ index (magnetisable iron parts),
- Additives (calcium, magnesium, zinc, phosphorus, barium, boron),
- Contaminants (silicon, potassium, sodium, water as %),
- Oil condition (viscosity at +40° and +100°C),
- Viscosity index,
- Oxidation,
- Appearance of the oil,
- Particle count according to ISO 4406, SAE 4059.

## OELANALYSE SET 3

### Oil analysis set for bio oil

With the oil analysis set, the condition of an oil can be analysed precisely in the lab. The condition of the system can also be deduced from the result of the oil analysis.

**Scope of supply:** 1 x sample container, 1x Sample data sheet, 1x shipping case

**Additional feature:** Analysis costs are included in the price., All oil samples will be evaluated within 24 hours of receipt at the laboratory.

Identification	Colour	for medium	Weight kg
OEL ANALYSE SET 3	yellow cover	Biologically degradable hydraulic fluids	0,2

**Web:** <http://cat.hansa-flex.com/en/OELANALYSESET3>

**Additional info:** The oil analysis set 3 includes the following analyses:

- Wearing metals (iron, chrome, tin, aluminium, nickel, copper, lead, molybdenum),
- PQ index (magnetisable iron parts),
- Additives (calcium, magnesium, zinc, phosphorus, barium, boron),
- Contaminants (silicon, potassium, sodium, water as %),
- KF water,
- Oil condition (viscosity at +40° and +100°C),
- Viscosity index,
- Oxidation,
- Neutralisation value,
- Appearance of the oil,
- Colour number,
- Density,
- Particle count according to ISO 4406, SAE 4059.

**OELANALYSE SET 4****Oil analysis set for gear oil**

With the oil analysis set, the condition of an oil can be analysed precisely in the lab.  
The condition of the system can also be deduced from the result of the oil analysis.

**Scope of supply:** 1 x sample container, 1x Sample data sheet, 1x shipping case

**Additional feature:** Analysis costs are included in the price., All oil samples will be evaluated within 24 hours of receipt at the laboratory.

Identification	Colour	for medium	Weight kg
OEL ANALYSE SET 4	red cover	Gearbox oil	0,2

**Web:** <http://cat.hansa-flex.com/en/OELANALYSESET4>

**Additional info:** The oil analysis set 4 includes the following analyses:

- Wearing metals (iron, chrome, tin, aluminium, nickel, copper, lead, molybdenum),
- PQ index (magnetisable iron parts),
- Additives (calcium, magnesium, zinc, phosphorus, barium, boron),
- Contaminants (silicon, potassium, sodium, water as %),
- KF water,
- Oil condition (viscosity at +40° and +100°C),
- Viscosity index,
- Oxidation,
- Neutralisation value,
- Appearance of the oil,
- O.P.A. with particle count

**HK VAK MEM****Filter for vacuum filtration**

The white cellulose nitrate filter is printed with a black mesh pattern.  
Each filter is packaged separately and under sterile conditions.

**Ordering information:** Other filter units are available upon request.

Identification	Diameter mm	Filter mesh size µm	Packaging unit	Weight kg
HK VAK-MEM-FILTER	50	0,8	100 piece	0,14

**Web:** <http://cat.hansa-flex.com/en/HKVAKMEM>

**Spare part for following products:**

**HK VAK FILTRA GL** - Glass vacuum filtration device

## NSFA Typ C

### Bypass flow filter system Type C

Partial flow filter systems increase the reliability and operational readiness of many hydraulic and lubricating oil systems. Oil filtering prolongs the service life not only of the machine, but also of the entire system. When a partial flow system is used, the filter can work permanently without being affected by changes in pressure or volume flow in the main system.

The equipment is particularly notable for its compact construction and low noise level.

**Media:** Mineral oil, Synthetic oils, turbine oils, vegetable oils

**Ordering information:** All filter systems are supplied without filter elements.  
Other volume flows and motor outputs available upon request.

Identification	Voltage	Power kW	Volumetric flow max. L/min	System size*	Weight kg
NSFA TYP C 80/380 V 3.0	380 V	3,0	80,0	up to 2500 litres	45

System size serves only a reference value

**Web:** <http://cat.hansa-flex.com/en/NSFATYPC>

**Additional info:** Double filter system, 2 filter elements are needed. The filter systems can be rented by the day, the week, or by the month.

Our service technicians will then install and commission the equipment for a fee.

Duration of filtration depends essentially on the degree of contamination of the medium.

**Accessories:**

FI ND E UF - Filter element for low-pressure filter UF

## NSFA Typ D

### Bypass flow filter system Type D

Partial flow filter systems increase the reliability and operational readiness of many hydraulic and lubricating oil systems. Oil filtering prolongs the service life not only of the machine, but also of the entire system. When a partial flow system is used, the filter can work permanently without being affected by changes in pressure or volume flow in the main system.

The equipment is particularly notable for its compact construction and low noise level.

**Media:** Mineral oil, Synthetic oils, turbine oils, vegetable oils

**Ordering information:** All filter systems are supplied without filter elements.  
Other volume flows and motor outputs available upon request.

Identification	Voltage	Power kW	Volumetric flow max. L/min	System size*	Weight kg
NSFA TYP D 40/24 V 035	24 V	0,35	40,0	up to 1200 litres	15
NSFA TYP D 40/230 V 1.5	230 V	1,50	40,0	up to 1200 litres	18
NSFA TYP D 10/380 V 055	380 V	0,55	10,0	up to 1000 litres	20
NSFA TYP D 40/380 V 1.5	380 V	1,50	40,0	up to 1200 litres	23
NSFA TYP D 60/380 V 1.5	380 V	1,50	60,0	up to 1200 litres	23

System size serves only a reference value

**Web:** <http://cat.hansa-flex.com/en/NSFATYPD>

**Additional info:** The filter systems can be rented by the day, the week, or by the month.

Our service technicians will then install and commission the equipment for a fee.

Duration of filtration depends essentially on the degree of contamination of the medium.

**Accessories:**

FI ND E MA - Filter element for low-pressure filter MA

## NSFA Typ E

## Bypass flow filter system Type E

Partial flow filter systems increase the reliability and operational readiness of many hydraulic and lubricating oil systems. Oil filtering prolongs the service life not only of the machine, but also of the entire system. When a partial flow system is used, the filter can work permanently without being affected by changes in pressure or volume flow in the main system.

The equipment is particularly notable for its compact construction and low noise level.

**Media:** Mineral oil, Synthetic oils, turbine oils, vegetable oils

**Ordering information:** All filter systems are supplied without filter elements.  
Other volume flows and motor outputs available upon request.

Identification	Voltage	Power kW	Volumetric flow max. L/min	System size*	Weight kg
NSFA TYP E 150/380 V 55	380 V	5,5	150,0	above 2500 litres	175
System size serves only a reference value					

**Web:** <http://cat.hansa-flex.com/en/NSFATYPE>

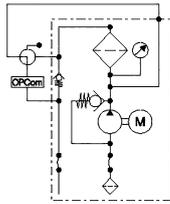

**Additional info:** The filter systems can be rented by the day, the week, or by the month.  
Our service technicians will then install and commission the equipment for a fee.  
Duration of filtration depends essentially on the degree of contamination of the medium.

**Accessories:**

**FI ND E MA** - Filter element for low-pressure filter MA

**HK FAPC**

**Oil service appliance**

With the filter unit, hydraulic or lubricating oil systems can simply be filled and cleaned in the bypass flow. The unit is suitable for use with mineral oils and eco-friendly hydraulic fluids. The compact design allows easy access to the oil tank. The HK FAPC 016 is equipped with hoses and ready to connect. The superfine filter elements can be replaced without any special tools required. The suction and pressure hoses are coiled up directly on the device. Remaining oil droplets are collected in the oil drip tray. The heart of the filtration appliance are the EXAPOR® superfine filter elements. High separation rates guarantee very high degrees of cleanliness, and hence maximum component protection. The high soiling absorption capacity of the EXAPOR® ultrafine filter elements permit cost-effective operation of the unit. A pressure gauge indicates when the filter element has to be replaced. The water-absorbing filter element EXAPOR® Aqua can be installed briefly to remove small amounts of water from hydraulic oils - available on request - The HK FAPC 016 is equipped with a purity class monitor OPCOMII. The purity class achieved during the filling or cleaning process is continuously monitored. When monitoring the purity level a ball cock can be used to select between "downstream of filter" (e.g. when filling systems) or "upstream of filter" (e.g. cleansing oil fillings). Selection between particle sizes 4, 6, 14 and 21 µm can be made on the display. The reference number for the selected particle size according to ISO 4406:1999 is displayed on the monitor. The monitor can be configured by PC using the infrared interface. The data can be transferred to the computer via the RS232 interface, where it can be displayed graphically or in tabular form and tracked.

**Note:** Length of suction/pressure hose 1.8 / 2.0 m  
The device is equipped with a data memory (storage of 500 purity classes with date and time; download in Excel-compatible format).

HK FAPC - Oil service appliance

## OEL HLP

### Mineral oil-based hydraulic oil

Hydraulic oil based on mineral oil with agents against corrosion, oil ageing and wear.

**Application:** as universal oil, e.g. hydraulic presses, injection moulding machines, construction machinery etc.  
**Classification:** HLP  
**Standard:** DIN 51524-2

**Note:** Note: Do not mix different oils.

Identification	Viscosity class	Packaging unit
OEL HLP 32	ISO VG 32	20 litres
OEL HLP 46	ISO VG 46	20 litres

**Web:** <http://cat.hansa-flex.com/en/OELHLP>

## OEL HLPD 46

### Mineral oil-based hydraulic oil

Detergent hydraulic oil based on mineral oil containing agents against corrosion, oil ageing and wear.

**Application:** as universal oil, e.g. hydraulic presses, injection moulding machines, construction machinery etc.  
**Classification:** HLPD  
**Additional feature:** Especially suitable for systems with sensitive control valves.

**Note:** Note: Do not mix different oils.

Identification	Viscosity class	Packaging unit
OEL HLPD 46	ISO VG 46	20 litres

**Web:** <http://cat.hansa-flex.com/en/OELHLPD46>

**Additional info:** The detergent properties remove deposits from the hydraulics and prevent adhesion. HLPD oils demonstrate a unique property of absorbing certain amounts of water without causing operating problems in the hydraulic system.

## OEL PANOLIN

### Hydraulic oil, synthetic (Panolin)

Environmentally compatible, fully synthetic and zinc-free hydraulic oil based on saturated esters. Very good high pressure properties with excellent cold flow behaviour and good oxidation behaviour during long periods of use.

**Application:** Forestry-, construction- and agricultural machines, Steel hydraulics construction, Circular lubrication systems  
**Classification:** HEES  
**Standard:** DIN ISO 15380

**Note:** Note: Do not mix different oils.

Identification	Viscosity class	Packaging unit
OEL PANOLIN	ISO VG 46	25 litres

**Web:** <http://cat.hansa-flex.com/en/OELPANOLIN>

## OEL SYNT

## Synthetic ester-based hydraulic oil

Zinc- and ash-free hydraulic oil. Particularly suitable for use in ecologically sensitive areas.

**Application:** e.g. mobile hydraulics

**Classification:** HEES

**Standard:** DIN ISO 15380

**Note:** Note: Do not mix different oils.

Identification	Viscosity class	Packaging unit
OEL SYNT	ISO VG 46	20 litres

**Web:** <http://cat.hansa-flex.com/en/OELSYNT>

2

## OEL W

## Mineral oil-based engine oil

**Application:** for petrol and diesel engines (Note releases of the manufacturer!)

**Note:** Note: Do not mix different oils.

Identification	Area	Packaging unit
OEL 10 W	Monograde oil	20 litres
OEL 10 W 40	Multigrade oil	20 litres

**Web:** <http://cat.hansa-flex.com/en/OELW>

## OEL ATF

## Transmission and hydraulic oil

**Application:** Forestry-, construction- and agricultural machines, Gear boxes and self-lubricating differentials

**Note:** Note: Do not mix different oils.

Identification	Specification	Packaging unit
OEL ATF		20 litres
OEL ATF 66	Suffix A	20 litres
OEL ATF 86	Dexron II	20 litres

**Web:** <http://cat.hansa-flex.com/en/OELATF>

**OEL MATTE****Oil binding agent, (matt)**

Oil binder for receiving oil-based non-woven fabrics from polypropylene homopolymer (PP)

**Additional feature:** 1 pack = 10 pieces

**Identification**

OEL MATTE

**Dimension**

43 x 33 cm

**Web:** <http://cat.hansa-flex.com/en/OELMATTE>

**OEL BIND****Oil binding agent, (granular)**

Material: Calcined diatomaceous earth (Moler), no chemical and synthetic additives.  
Oil binder, Type III R

**Note:** Insoluble in water and acids.

**Identification**

OEL BIND

**Weight**

kg

15

**Web:** <http://cat.hansa-flex.com/en/OELBIND>

**Additional info:** No risk to persons, animals, plants and ground water. 1 litre oil binder, coarse grain, 1 - 3 mm binds approx. 0.4 litres of oil.

Flow switch BFS	466

**HK S**

**Analogue Q gauge**

Independent of position, direct reading, one flow direction.  
 Linear gauge scale in l/min.  
 Sturdy and resistant to shock and vibration.  
 Accuracy ±2 % of range limit value.

**Application:** Volumetric flow measurement  
**Operating temperature max.:** 120 °C  
**Material:** Stainless steel housing

Identification	Thread	Measuring range	Pressure max. bar	L mm	Weight kg
HK 602 S 005	G 1/2"	2 to 20 l/min	420	168	0,90

**Web:** <http://cat.hansa-flex.com/en/HKS>

**HK S TK**

**Analogue QPT gauge**

Independent of position, direct reading, one flow direction.  
 Linear gauge scale in l/min.  
 Sturdy and resistant to shock and vibration.  
 Accuracy ±2 % of range limit value.

**Application:** Volumetric flow measurement  
**Design:** with thermometer up to 120 °C and pressure gauge coupling M16 x 2 with pressure gauge  
**Operating temperature max.:** 120 °C  
**Material:** Stainless steel housing

Identification	Thread	Measuring range	Pressure max. bar	L mm	Weight kg
HK 702 S 020 TK	G 3/4"	10 to 75 l/min	350	226	1,9
HK 702 S 030 TK	G 3/4"	10 to 115 l/min	350	226	1,9
HK 762 S 040 TK	G 1"	15 to 150 l/min	350	226	1,9
HK 762 S 050 TK	G 1"	19 to 190 l/min	350	226	1,9

**Web:** <http://cat.hansa-flex.com/en/HKSTK>

**HK S TKV**
**Analogue QPT-K gauge**

Independent of position, direct reading, one flow direction.  
 Linear gauge scale in l/min.  
 Sturdy and resistant to shock and vibration.  
 Accuracy  $\pm 2\%$  of range limit value  
 Ideal for service tests on hydraulic pumps, units and drives in mobile and stationary hydraulics  
 Overload protection is integrated into the pressurising valve for device protection, overload rupture (without oil leakage) at 420 bar

**Application:** Volumetric flow measurement  
**Design:** with thermometer up to 120 °C and pressure gauge coupling M16 x 2 with pressure gauge, with pressurising valve, internal overload protection and protective case

**Operating temperature max.:** 120 °C

**Material:** Stainless steel housing

Identification	Connection	Measuring range	Pressure max. bar	L mm	Weight kg

HK 762 S 050 TKV	G 1"	19 to 190 l/min	350	303	7,9

**Web:** <http://cat.hansa-flex.com/en/HKSTKV>

**HK PTQ CHECK**
**Digital hand-held gauge, 5-channels**

5-channel gauge for simultaneous measurement of pressure, differential pressure, volumetric flow and temperature.

Simultaneous connection of max. 4 sensors (2x pressure, 1x temperature, 1x volumetric flow).

A speed sensor can be connected in place of the volumetric flow sensor.

Graphic display with background lighting.

Oil-resistant film keypad.

Convenient menu navigation, different languages and unit systems can be selected.

Data interface RS 232 / USB adapter.

Sensor detection, self-diagnostics and battery check integrated.

Automatic zero-point correction.

Min/max storage (no storage of complete measurement sequence).

Average value memory of 10sec or 20sec.

**Design:** for pressure, differential pressure, temperature, volumetric flow and speed, 50/sec measurement rate

**Scope of supply:** incl. PC connection cable and software, incl. power supply 230 V / 50 Hz

**Note:** For storing the measurement sequence during measuring the appliance must be connected to a PC on which the enclosed software has been installed

**Ordering information:** This gauge can be combined with the included accessories to a measuring case.

1 gauge, 1 measuring turbine and various sensors incl. cable and operating manual can be packed into the HK KS33 case.

Further accessories and gauges with additional options available on request.

Identification	Weight kg
HK PTQ CHECK5	0,5

**Web:** <http://cat.hansa-flex.com/en/HKPTQCHECK>

**Accessories:**

**HK 622** - Measuring turbine

**HK PTA** - Pressure sensor

**HK TS TP** - Temperature sensor

**HK DS 100** - Speed sensor

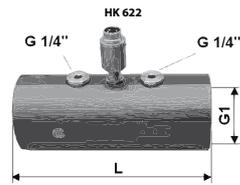

**HK PML** - Single instrumentation cable

**HK PQT** - Combination instrumentation cable

**HK KS33** - Protective case for measuring instrument

## HK 622

### Measuring turbine

Independent of position, one measuring direction  
 Various measuring ranges up to 600 l/min  
 Measuring accuracy  $\pm 2\%$  of range limit value  
 Output signal: Frequency

**Connections:** 1/4 - female thread"  
**Design:** with connections for volumetric flow, pressure and temperature

**Temp. min.:** 0 °C

**Temp. max.:** 90 °C

**Material:** Aluminium housing

**Surface:** anodised

**Use:** For gauge HK PTQCheck

**Ordering information:** Further accessories and gauges with additional options available on request.

Identification	Measuring range	Pressure max. bar	Overload pressure max. bar	G1	L mm	Weight kg
HK 6222 025	1 to 25 l/min	400	420	G 1/4"	120	0,45
HK 6226 300	15 to 300 l/min	400	420	G 1.1/4"	150	0,90
HK 6228 600	40 to 600 l/min	400	420	G 1.1/2"	173	1,70

**Web:** <http://cat.hansa-flex.com/en/HK622>

**Accessory for following products:**

HK PTQ CHECK - Digital hand-held gauge, 5-channels

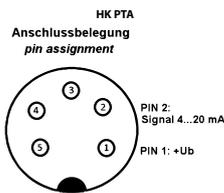

**Additional elements:**

HK PQT - Combination instrumentation cable

HK PML - Single instrumentation cable

## HK PTA

### Pressure sensor

Resistant to pressure peaks, extremely shock and vibration-resistant  
 Output signal 4 to 20 mA

Various measuring ranges up to 600 bar

Measuring accuracy  $\pm 0.5\%$  of range limit value

Outer thread 1/4" fitting

**Connections:** 1/4" - male thread

**Material:** Stainless steel

**Use:** For gauge HK PTQCheck

**Ordering information:** Further accessories and gauges with additional options available on request.

Order adapter HFM MMD 1/4 (when connecting pressure transmitter and measuring turbine) separately

Identification	Measuring range	Pressure max. bar	Overload pressure max. bar	Connection	Weight kg
HK PTA 101	-1 to 10 bar	10	20	G 1/4" - male thread	0,1
HK PTA 060	0 to 60 bar	60	120	G 1/4" - male thread	0,1
HK PTA 200	0 to 200 bar	200	400	G 1/4" - male thread	0,1
HK PTA 400	0 to 400 bar	400	600	G 1/4" - male thread	0,1
HK PTA 600	0 to 600 bar	600	800	G 1/4" - male thread	0,1

**Web:** <http://cat.hansa-flex.com/en/HKPTA>

**Accessory for following products:**

HK PTQ CHECK - Digital hand-held gauge, 5-channels

**Additional elements:**

HK PML - Single instrumentation cable

HK PQT - Combination instrumentation cable

HFM MMD HKO - Measuring connection, M16 x 2 series

**HK TS TP**

**Temperature sensor**

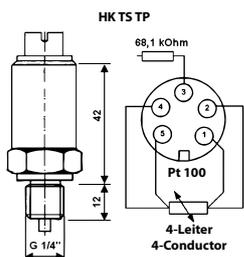

Measurement range -50 °C to +120 °C  
 Measuring accuracy ±0.2 °C  
 Outer thread 1/4" fitting  
 Output signal 4 to 20 mA

**Material:** Stainless steel  
**Use:** For gauge HK PTQCheck

**Ordering information:** Further accessories and gauges with additional options available on request.

Identification	Measuring range	Pressure max. bar	Overload pressure max. bar	Connection	Weight kg
HK TS TP 140	-50 to +120 °C	400	420	G 1/4" - male thread	0,1

**Web:** <http://cat.hansa-flex.com/en/HKTSTP>

**Accessory for following products:**

HK PTQ CHECK - Digital hand-held gauge, 5-channels

**Additional elements:**

HK PML - Single instrumentation cable

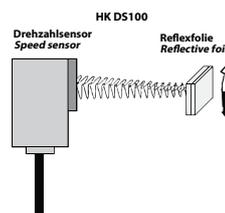

HK PQT - Combination instrumentation cable

**HK DS 100**

**Speed sensor**

Speed sensor, opto-electronic  
 Incl. 5 m measuring lead and 25 reflective markers

**Use:** For gauge HK PTQCheck

**Ordering information:** Further accessories and gauges with additional options available on request.

Identification	Measuring range	Weight kg
HK DS 100	500 to 9999 rpm	0,18

**Web:** <http://cat.hansa-flex.com/en/HKDS100>

**Accessory for following products:**

HK PTQ CHECK - Digital hand-held gauge, 5-channels

## HK PML

### Single instrumentation cable

**Design:** for connecting one pressure sensor, Plug M12 5-pin  
**Use:** For gauge HK PTQCheck

**Ordering information:** Further accessories and gauges with additional options available on request.

Identification	Length mm	Weight kg
HK PML 03 SS	3000	0,1

**Web:** <http://cat.hansa-flex.com/en/HKPML>

**Accessory for following products:**

HK PTQ CHECK - Digital hand-held gauge, 5-channels

## HK PQT

### Combination instrumentation cable

Practical spiral cable for easy handling  
 Length 3 m

**Design:** Combination cable for pressure, volumetric flow and temperature sensor, Plug M12 5-pin  
**Use:** For gauge HK PTQCheck

**Ordering information:** Further accessories and gauges with additional options available on request.

Identification	Length mm	Weight kg
HK PQT 03 SS	3000	0,2

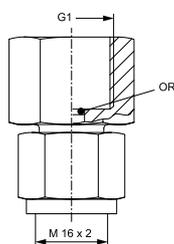

**Web:** <http://cat.hansa-flex.com/en/HKPQT>

**Accessory for following products:**

HK PTQ CHECK - Digital hand-held gauge, 5-channels

## HFM MMD HKO

### Measuring connection, M16 x 2 series

**Connection 1:** BSP cylindrical internal threads  
**Sealing form 1:** O-ring seal  
**Connection 2:** Metric nut thread M 16 x 2  
**Design:** Direct pressure gauge connection  
**Scope of supply:** with O-ring  
**Temp. min.:** -20 °C  
**Temp. max.:** 100 °C  
**Material:** Steel  
**Surface:** electro galvanised

**Note:** When assembling with HK PTA sensor, remove the existing O-ring in the fitting if available.

Identification	Max. working pressure bar	OR	G1
HFM MMD 1/4	630	5.0 x 1.5	G 1/4" -19

**Web:** <http://cat.hansa-flex.com/en/HFMMMDHKO>

**Accessory for following products:**

HK PTA - Pressure sensor

**HK KS33**

**Protective case for measuring instrument**

Plastic with padding

For protected transport of 1 gauge with PSU, 1 measuring turbine, various sensors and cables

**Use:** For gauge HK PTQCheck

**Ordering information:** Further accessories and gauges with additional options available on request.

Identification	Weight kg
HK KS 3300	1,7

**Web:** <http://cat.hansa-flex.com/en/HKKS33>

**Accessory for following products:**

**HK PTQ CHECK** - Digital hand-held gauge, 5-channels

**HK MH 2025**

**Digital gauge set**

Compact measuring device  
 Direct handling by 5 softkeys  
 2 channels for industrial sensors (optional 0-20 mA, 4-20 mA, 0-10 V, 2-10 V, frequency, counter)  
 Calculation of differential pressure or power from 2 channels  
 ISDS automatic sensor detection  
 LCD graphic display with switched-mode backlight and automatic display adjustment  
 2,0 MB memory (5 series of measurements with 120,000 measured values)  
 Scanning rate selectable in 5 stages between 1 ms and 10 s  
 Display rate selectable between 0,5 ms and 10 ms  
 High-speed data transmission to the PC via USB interface  
 With software HYDROlink Base  
 Lightweight plastic housing with battery compartment for commercially available NiMH rechargeable batteries  
 Case dimensions: W=235 mm / L=185 mm / H=48 mm

**Scope of supply:** 1 measuring device HK MH 2025, 1 USB-power supply unit 5 VDC, 500 mA, 2 NiMH rechargeable batteries, 2 pressure sensors with moulded cable (length 2.5 m), pressure ranges, see table, 2 MINIMESS® direct connectors for pressure sensors, Software, Operating manual, Plastic case

**Temp. range:** -20 °C to +70 °C

Identification	Pressure sensors included	Weight kg
HK MH2025 400 400	2x 0 - 400 bar	3,5
HK MH2025 060 600	1x 0 - 60 bar/1x 0 - 600 bar	3,5

**Web:** <http://cat.hansa-flex.com/en/HKMH2025>

**Accessories:**

**HK PT2020** - Pressure sensor

**HK PT2020****Pressure sensor**

Signal output 0-20 mA  
 Accuracy  $\pm 0.5\%$  of range limit value  
 Max. pressure = 1.5x nominal pressure  
 Medium temperature -40°C to +130°C  
 ISDS automatic sensor detection  
 Incl. moulded cable 2.5 m

**Material:** of stainless steel  
**Use:** Only for gauge set MH 2025

**Note:** Attention: These sensors are only suitable for gauge HK MH 2025!

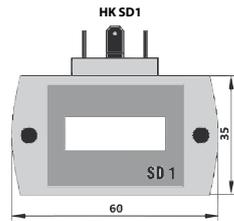

Identification	Measuring range	Weight kg
HK PT2020 006	-1 to 6 bar	0,12
HK PT2020 060	0 to 60 bar	0,12
HK PT2020 200	0 to 200 bar	0,12
HK PT2020 400	0 to 400 bar	0,12
HK PT2020 600	0 to 600 bar	0,12

**Web:** <http://cat.hansa-flex.com/en/HKPT2020>

## HK SD1

### Plug-in display digital

The on-site display for the gear flow meter HK VCA with plug-in connection in accordance with DIN 43650 is usable in the widest possible range of applications. The display is simply inserted between the plug and socket of the flow meter. As with standard meters, square wave signal output is available to allow external processing.

The plug-in display is freely programmable. All the necessary settings can be made using two buttons. The programmed data are stored on an EEPROM and are therefore permanently retained, even in the event of power outages.

Display: 7-segment LED

Keypad: 2 keys behind front panel

Supply voltage: 24 VDC

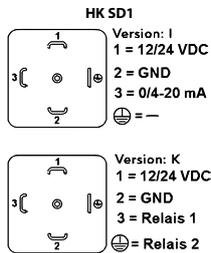

Protection class IP 64 DIN 40050

**Operating temperature max.:** 80 °C

**Material:** Housing: Aluminium

**Use:** For gear flow meters HK VCA

Identification	Design	Weight kg
HK SD1 I 24	Output 0-20 mA / 4-20 mA	0,2
HK SD1 K 24	Output 2x relay contact 24VDC / 1A	0,2

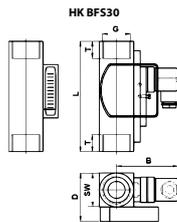

**Web:** <http://cat.hansa-flex.com/en/HKSD1>

**Accessory for following products:**  
 HK VCA - Gear flow meter

## HK BFS 30

### Flow switch

Flow switch for any mounting position for liquids from 30 up to 600 cSt.

Changeover contact (250 V / 1,5 A / 50 VA)

Protection class IP 65

Measuring accuracy  $\pm 10\%$  of range limit value

**Operating pressure:** max. 250 bar

**Operating temperature max.:** 120 °C

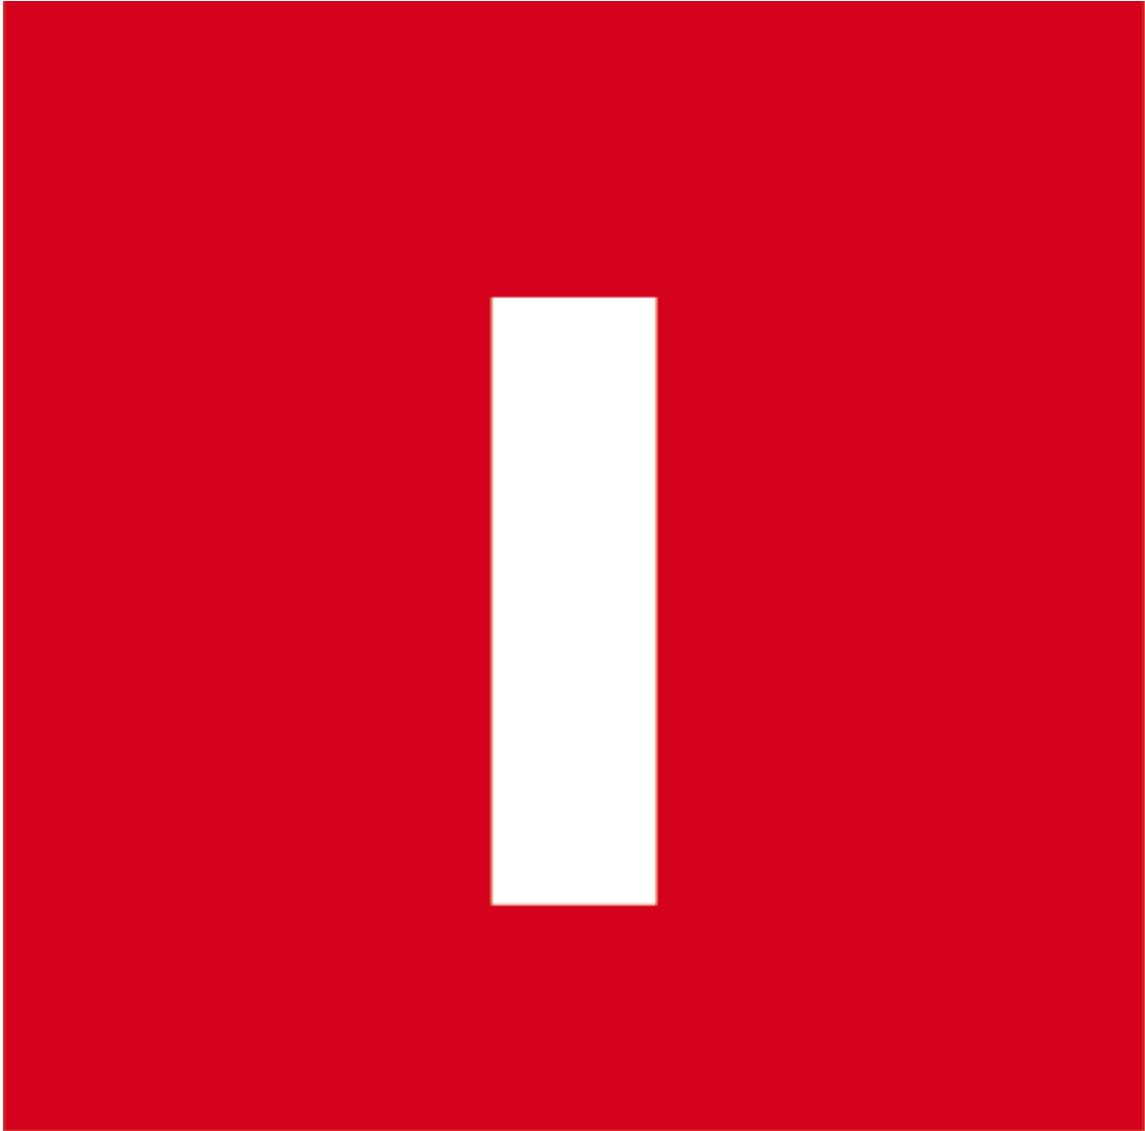

**Material:** Brass

**Note:** To avoid the risk of measure faults, the upstream line should be 10x ND and the downstream line 5x ND. (ND = internal tube diameter)

Identification	Volumetric flow min.	Volumetric flow max.	B mm	D mm	G	L mm	T mm	AF mm	Weight kg

Needle shut-off valve 700 bar	398
Non return valve RB	117-118,122
Non return valve RK	121
Non return valve with housing type E	119
Non return valve with housing type F	120

Non-return valve 700 bar	399
Non-return valve CK	135
Non-return valve for plate mounting Cetop P	243
NSFA Typ C	448
NSFA Typ D	448
NSFA Typ E	449

<b>O</b>	
OEL ATF	453
OEL BIND	454
OEL HLP	452
OEL HLPD 46	452
OEL MATTE	454
OEL PANOLIN	452
OEL SYNT	453
OEL W	453
OELANALYSE SET 2	446
OELANALYSE SET 3	446
OELANALYSE SET 4	447
Oil analysis set for bio oil	446
Oil analysis set for gear oil	447
Oil analysis set for mineral oil	446
Oil binding agent, (granular)	454
Oil binding agent, (matt)	454
Oil fitting	375
Oil fitting for pipe connection	376
Oil fitting with bleeding	375
Oil service appliance	450
Oil sight glass	315
Oil tray for alu tank, Type BAK	305
Oil tray for steel tank, Type BSK	308
Oil/air coolers	301
Oil-air cooler	300
Optical/electrical fill level indicator with temperature switch	314
Overcentre valve	207,219
Overcentre valve CB	136

<b>P</b>	
Particle counter	443
Piston for hand-operated directional control valve BM	274
Piston protection nut, self-locking	389
Piston protection nut, self-locking, flat-headed	389
Pivot yoke	364
Pivot yoke with regreasable bearings	365-366
Plastic sample bottle	440
Plug-in display digital	466
Plug-in non-return valve	194
Pneumo-hydraulic pump 700 bar	391
Poppet valve NG6	193
Pressure gauge adapter 700 bar	401
Pressure gauge shut-off valve FT290	276
Pressure gauge shut-off valve FT291	276
Pressure reduction valve	201-202,213-214
Pressure relief valve	198-200,211-212,223,226
Pressure relief valve 700 bar	400
Pressure relief valve ARAM	102
Pressure relief valve ARE	101
Pressure relief valve FPMD (shock valve)	126
Pressure relief valve RD	132
Pressure relief valve RP	133
Pressure relief valve RVPS	131
Pressure relief valve V012	98
Pressure relief valve with SAE connection and relief valve	246
Pressure relief valve with SAE connector	245
Pressure sensor	460,464
Pressure sensor controller DSR	319
Pressure sensor controller PN2070	318
Pressure sensor regulator PT77	319
Pressure sensor with analogue and digital display	320
Pressure sequence valve	209,221
Pressure transmission for hand-operated directional control valve BM	275
Proportional amplifier digital	257
Proportional pressure reducing valve size 10	253
Proportional pressure reducing valve size 6	251,255

Proportional pressure relief valve size 6	252-254
Proportional solenoid-operated directional control valve size 10	249-250
Proportional solenoid-operated directional control valve size 6	247-248
Protective case for measuring instrument	463
PTO shaft gearboxes	70
Pump carrier PK	336
Pump mount PT	335
Pump supports	68-69
PVPC axial piston pump	71

<b>R</b>	
Radial pivot bearings GE	367
RBS IR	109
RBS M	110
Reducer plate NG10 - NG6	236
Refill-kit for reusable adsorber	433
Regulating check valve 700 bar	399
Regulating check valve DRV IR	107
Regulating check valve DVR 1700	106
Repair kit for bladder accumulator	294
Resistance thermometer for level/temperature switch	332
Return flow filter compact tank installation	412
Return flow filters	409-410
Ring for pivot bearing	367-368
Rotex coupling for axial piston and vane pumps	335
Rotex coupling for gear pumps	334
Rubber-metallic buffer	339

<b>S</b>	
Safety and isolation block with manual relief	296
Sandwich body with measurement connection	209,221
Screw kit for non-return valve Type HK AGRL	288
Screw kit for shock valve HK V0590	95
Screw set for flow control valve Type HK QV	288
Screw set for NG 6 valves type HK DH / DG4V3	285
Screw-in tubular heaters	316
Seal kit for hydraulic planetary motor	96
Seal kit for hydraulic planetary motor CN	96
Sealing cap	312
Sealing cap / oil dipstick	312
Sealing tape for tanks	308
Serial connection plate NG10	234
Serial connection plate NG16	237
Serial connection plate NG25	238
Serial connection plate NG6	230
Set of bolts for NG 10 valves types HK DK11/DKE/DG4V5	285
Set of bolts for NG10 valves type HK 42 C	287
Set of bolts for NG16 valves type HK DPH 2	286
Set of bolts for NG25 valves type HK DPH 4	286
Set of bolts for NG6 valves type HK 41C	287
Shock valve	94
Short inserted piston for hydraulic cylinders	383
Short threaded piston for hydraulic cylinders	381
Single connection plate NG10	234
Single connection plate NG16	237
Single connection plate NG25	238
Single connection plate NG6	229,231
Single connection plate with relief valve size 10	235
Single connection plate with relief valve size 6	232
Single instrumentation cable	462
Software for ATOS proportional electronics	259
Solenoid-operated directional control valve NG10	185-190
Solenoid-operated directional control valve NG6	175-180
Solenoid-operated directional control valve size 6 without coil	171-174
Solenoid-operated directional control valve size 6, Ex-protected	197
Solenoid-operated directional control valve size 10 without coil	181-184
Speed sensor	461
Spidex coupling for gear pumps	334
Spin-on return flow filter type 1	415
Spin-on return flow filter type 2	415
Spin-on return flow filter type 3	416
Spring for shock valve	95
Spring for VMPBL pressure relief valve	128
Sprocket for coupling	338

Standard double-acting cylinders with fastening	353-355
Standard double-acting cylinders without fastening	357-359
Standard single-acting cylinders with fastening	356
Standard single-acting cylinders without fastening	360
Start relay for DC electric motor	352
Steel cap for hydraulic tank BAKRA	304
Steel housing sandwich plate NG6/10 for SAE 2-way cartridge valve	150
Steel housing ZP NG16 for SAE 2-way pressure relief valve	151
Steel housing ZP NG25 for SAE 2-way pressure relief valve	151
Swivel bearing bushing	361
Swivel bearing bushing with bore	361
Synthetic ester-based hydraulic oil	453

<b>T</b>	
Tank for PAM manual pump	48
Tank venting and filler filters	310
Tank venting filters	309-311
Temperature contact for level/temperature switch	332
Temperature sensor	461
Temperature transmitter for level/temperature switch	333
Thermostat for oil/air cooler	302
Threaded piston for hydraulic cylinders	380-382
Throttle check valve AQFR	107
Throttle valve	103
Throttle valve DV IR	104
Tool for line break safety valves	129-130
Traction cylinders 700 bar	397
Transmission and hydraulic oil	453
TS temperature switch	330
TSK1 temperature switch	331
Tube extension for return flow filter	414

<b>U</b>	
Unit carrier	451
Universal cylinders 700 bar single-acting with spring retraction	396
USB adapter	445
USB infrared adapter	259

<b>V</b>	
V1501 non-return valve	111
V1710 non-return valve	112
V1865 non-return valve	113
V1866 non-return valve	113
V2190 lowering valve	123
V2290 lowering valve	124
Vacuum hand pump	440
Valve housing for cartridge valve T-10A	156
Valve housing for cartridge valve T-11A	155,160
Valve housing for cartridge valve T-13A	157
Valve housing for cartridge valve T-2A	152,159
Valve housing for cartridge valve T-31A	158
Valve housing for cartridge valve T-3A	153
Valve housing for cartridge valve T-5A	154
Valve housing for line break safety valve	109
Valve housing ZP NG10 with ball valve	222
Valve housing ZP NG6 with ball valve	210
Vane pump	74
Vent screws	389
Venting filter element	311
Venting valve unit	72
VGU tester and charging unit	299
Visual fill level indicator	313
VMP BL pressure relief valve	99
VMPP BL pilot-controlled pressure relief valve	100
VRDE non-return valve for cylinder installation	114

<b>W</b>	
Workbench press 700 bar	397

<b>Y</b>	
Yoke end with thread	364
Yoke end, long	363
Yoke end, short	363

**Catalogue 1:  
Hose Technology**

 Hoses	
 Hose fittings	
 Couplings	
 Measuring equipment	

**Catalogue 2:  
Connection Technology**

 Pipe fittings ISO 8434-1	 Mounting technology
 Pipes	 Accessories and tools
